PIANO - FORTES

DRIGGS NEW PATENT RE THE ONLY INSTRUMENTS A constructed on a truly Scientific Principle. They have greater strength, and will remain longerin Tune, than any other Piano. The construction is simple and natural, all the extraneous lumber in the body of the instrument is dispensed with; the sound boards are merely two arched planks of this wood, like the front and back of a violin; the strings are attached to a strong iron frame, which is separated and entirely independent of the case, thereby dispensing with the old harp form of string ing by substituting straight bridges, preserving at the same time the Over Strung Bass, of which Mr. Driggs is the Inventor. By these improvements we gain much more vibratory power, at the same time preserving all its purity and richness of tone.

They have received the highest testimonials from the press, and all the principal artists in the coun-

try, among which are: L. . H. Gottechalk .Haz .Hareteck, Theodore Etakeld, Win . Hason, Herman Wollenhaupt, A. Barill. Chas, Fradel pinnist, says :- I have examined your new Piano-Fortes, and I cordially approve of its system of construction. Its principle, by which great increase of vibratory power is obtained, being very simple and perfectly philosophical. The tone is grand and noble; it has great capacity for sustaining the sound for singing, and its volume of newal as aforesaid, every such Proclamation shall have effect for six months or for any shorter period to LIVERPOOL or LONDONDERRY: tone or power I have never heard excelled in depth, purity, and sympathetic sweetness. purity, and sympathetic sweetness.

WM. HENRY FRY, late musical critic of The

N. Y. Tribanesays:—I have examined your newly invented Piano-Fortes. They merit all the praise given to them by Messrs. Thalberg, Gottschalk Strackosch, Mason and others. As regards structure, they are original and philosophical; in purity, volume, and continuity of tone; in vocal versimilitude that crowning excellence which enables the tude, that crowning excellence which enables the pianists to "sing" on the instrument. Your Pianos ever deserve the highest rank. Your invention, in my opinion, is destined to work radical changes in the manufacture of Pianos throughout the

From The N. Y. Heroid, Sept. 5 .- Upon a careful examination of Dargo's Piano Forte, we find the results obtained are a very fine singing tope, great purity and brilliancy throughout the entire instru-ment, not often found in Pranos constructed upon the old plan, The N. T. Times, July 12, says :- We have now

an instrument without an equal. It can sing with a smooth delicacy, perfectly unattainable on any other instrument; an ordinary player obtains with no exertion, the fullness of a Grand Piano-Forte, and they must speedily supercede the old style.

GENTLEMEN:—Having thoroughly examined and tested the Piano-Fortes, invented and patented by Mr. S. B. Driggs, I am of the opinion that the tone resulting from his improvement. resulting from his improvements as exhibited in the instruments under examination, in point of richness, depth and brilliancy, equals that of the best Grand Piano-Fortes, and excels them in pure, prusical intonation and actual tone, power thus approximating closer to what I consider perfection in the matrice. ment than has yet been achieved by any other system of

The Automatic Organ-In presenting the AUTOMATIC ORGAN, we boldly announce the greatest triumph in musical instru ments of the age. Another objection to this method of blowing was, that both feet being occupied, no opportunity was offered for the management of the swell. Within the past two years, instruments constructed on this European plan of "double blowers," have been manufactured in this country, and to counteract this difficulty (want of a swell) a lever has been pre-jected from the centre of the instrument, to act upon upon the swell, and orgenated at the aner. The nconvenience and contortion necessary to effect this object are disagreeable enough to a gentleman, but to a lady the use of such an appendage is near-Out AUTOMATIC device obviates this difficulty en-

The Melodeon and School Organ-For seventeen years the superior excellence of our Melodeons has not been questioned, and for two years past the enormous demand has made it im possible for us to meet our orders promptly. With our increased facilities, we feel warranted in assuring our patrons that their orders will be promptly met, and solicit a continuance of their patronage. Caution to Purchasers.

All of our instruments have upon the name-board, in full, "GEO. A. PRINCE & CO." When a dealer represents any other instrument as "the same as ours," it is usually a mere attempt to sell an inferior instrument on which he can make a large profit.
