PIANO - FORTES!

DRIGGS' NEW PATENT RE THE ONLY INSTRUMENTS A constructed on a truly Scientific Principle.—
They have greater strength, and will remain longer
in Tune, than any other Piano. The construction
is simple and natural, all the extraneous lumber in the body of the instrument is dispensed with; the sound boards are merely two arched planks of this wood, like the front and back of a violin; the strings are attached to a strong iron frame, which is separated and entirely independent of the case, thereby dispensing with the old harp form of string ing by substituting straight bridges, preserving at the same time the Over Strong lines, of which Mr DRIGGS is the Inventor. By these improvements we gain much more vibratory power, at the same time preserving all its purity and richness of tone. They have received the highest testimonials from the press, and all the principal artists in the coun-

try, among which are: Barry handerson, L. M. Gottechalk A. Thatberg. W'm. . Meson, M. btrechosch.

tone or power I have never heard excelled in depth, purity, and sympathetic sweetners.

WM. HENRY FRY, late musical critic of The

N. Y. Tribunesays:- I have examined your newly invented Piano-Fortes. They merit all the praise given to them by Messrs. Thalberg, Gottschalk Struckosch, Mason and others. As regards structure, they are original and philosophical; in purity, volume, and continuity of tone; is vocal versimilitude, that crowning excellence which enables the planists to " sing" on the instrument. Your Plance ever deserve the highest rank. Your invention, in my opinion, is destined to work radical changer in the manufacture of Pinnes throughout the

From The N. Y. Herald, Sept. 5.—Upon a careful examination of Dauge's Plane Forte, we find the results obtained are a very fine singing tone, great purity and brilliancy throughout the entire instru-ment, not often found in Pianos constructed upon the old plan.

The N. F. Times, July 12, says: - We have now an instrument without an equal. It can sing with a smooth delicacy, perfectly unattainable on any other instrument; an ordinary player obtains with no exertion, the fullness of a Grand Piano-Forte, and they must speedily supercede the old style.

. GENTLEMEN:—Having thoroughly examined and tested the Pinno-Forter, invented and patented by Mr. S. B. Driggs, I am of the opinion that the tone resulting from his improvements as exhibited in the instruments under examination, in point of richness, depth and brilliancy, equals that of the best Grand Piano-Fortes, and excels them in pure, niusical intenation and actual tone, power thus approximating closer to what I consider perfection in the instru-

ment than has yet been achieved by any other system of L. M. GOTTSCHALK. BOLE AGENTS WM. HALL & SON, 543 Brondway NEW YORK

Ottawa, Dec. 18th, 1865.

WHEREAS, BY AN ACT PASSED IN the twenty-ninth year of Her Majesty's Reign, intituled "An Act to provide against the introduction and spreading of disorders affecting certain animals," authority is given to the Governor in Council to take such measures as may appear to be necessary in order to prevent the introduction of contagious or infectious disorders affecting sheep, cattle, horses, and other animals, and check such disorders from spreading, if introduced;

And whereas a contagious disease or epidemic affecting cattle prevails in many parts of Europe, and is increasing and extending its ravages, and whereas it is expedient, in order to prevent the introduction of the same into this Province, that the importation by sea of certain animals and articles should be prohibited—
