The Accident to the " Anna Foster." The voyage of this vessel to Canada has been a particularly unfortunate one. Leaving London in September last with an assorted cargo it was hoped she would reach Montreal before navigation closed, but on arriving at the mouth of the St. Lawrence the weather was so tempestuous as to prevent her entering the river, and it continued so long that it was found impossible to reach her des Loxpox, May 27 .- The question whether tination in season and she was compelled to death sentences of the Fenian convicts winter at Sydney, Cape Breton, at which place swung round with the current, and in doing so struck with great force against the wharf staving in her stern-posts and causing a serius leak. The captain, upon discovering the state of affairs, cried out to the mate that the vessel was sinking, and ordered the well to be ounded, when it was found the ship was takng in water fast and in fifty minutes six feet of water had accumulated in the hold. The anchor was immediately weighed, the assistance of a steamer procured, and the sinking ship " beached' a short distance below the wharf, nearly opposite to Montcalm-st., whenshe now lies, her bows well down in the water Gangs of men are employed constantly at the pumps, and a diver having to some extent mended the damage, they have gained on the leak and the ship is considerably lightened. The cargo, as may be supposed, is much damaged, but the ship, as soon as the injury is repaired, will be as staunch as ever. The Anne Foster is a wooden barque of about 500 tons

-Mr. Alex. Delmar, an aspiring genius who was recently placed at the head of the Statistical Bureau in the Treasury Department, basbeen making what he calls a Census of the present population of our country, by it he makes out to be 34,505,882, against 31,443,321 in 1860 - an increase of 3,062,561. We presume McCafferty have been commuted to imprison- this is not very far from the actual increase. which has been mainly confined to the Westthe Eastern States having gained very little while the South is presumed to have lost, notwithstanding a heavy gain in Texas. Mr Delmar has been helped by the census taken in several States in 1865; but, aside from these, we infer that his data are much like those supposed to be used by astronomers, by the school-boy, when, in reply to his crony's tions to the contrary, it is thought that the puzzling query, " How do you suppose they Government will not carry into execution the "ascertain the distances of the planets ?" he replied, 4 I suppose they guess at a quarter of " it, and multiply that by four." - N. Y. Tribune.
