reset upon the material functions. These, if not relieved, reset upon the masters and the surrounding organs, professing general aggravation, suffering, and disease. While in this condition, oppressed by the derangements, take Aver's Pitle, and see how directly they restore the natural action of the system and with it the bnoyant facility of health again. What is true and so apparent in this true and common complaint, is also true in many of the te peauted and dangerous distempers. The same parantire effect expels them. Caused by similar obstructions and decangements of the natural functions of the help, they are rapidly, and many of them surely, cured by the same means. Non-who know the virtues of these Pills, will neglect to employ them when suffering from the disorders they cure. SOMETHING NEW!

THE NORTH AMERICAN

Patented at Ottawa, March 4th, 1807. THE ACKNOWLEDGED CHAMPION OF PATENTS It is Economical,

Durable, and

Simple in Construction,

And can be worked with little labour. FACTS FOR THE PEOPLE. In presenting to the public this Warbing Mascientific, and philosophical principles, we claim for it a superiority over all washers pow in use. This machine operates as a wringer, thereby obviating the wear and tear of clothes, common to the

old rubbing principle. It is adjusted by clartic springs, so that either ladies' lace collars, caps, fine needle work or blankets, can be washed without the least wear and tear, and in one fourth part of the time than when washed by hand We claim for it a superiority over every other washer.

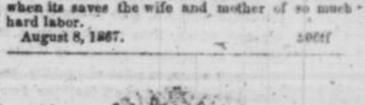

1st. It is worth half of its price for a table. 2nd. It will do the washing for a common family

in one hour. 3rd. It will pay for itself in a family of eight persons, in one year, in saving the wear and tear 4th. It leaves no room for competition, and chal-enges the world to produce its oqual. In fact the North American Washer and froming Table Combined, is acknowledged by all who have witnessed its operations, to be both a should be without it.

DESERVED SUCCESS. This washer is in its infancy in the Develoion of Canada, it having been patented only since Murch the the present year (1867), yet it is no more ourprising than true that the rights for every inch of he territory in Canada East has been sold within he last four weeks, to thorough enterprising men, who will manufacture and furnish machines in all the principal towns in the Lower Provinces.

Itseldom happens that an opportunity presents

itself that the public can avail themselves of an invention of such incalculable benefit to the human No farmer objects to purchasing a Mower and Reaper at a cost of \$150 or more, simply because it saves him so much hard labor, yet he does not use them but five or six weeks in a year; but the washing, the worst of all bousehold drudg eries, has to be done once a week at least the year sound. Then who will not avail themselves of a washer
