The pens devoted to swine are always an ustructive if not a very attractive part of the exhibition : and this year they will be as numerous and as well filled as on any previous occasion. Although little is exported from canada the yearly product is valuable. Every affort to improve the animal should therefore be encouraged, for the least improvement would realize a large sum to the farmer by adding to the market value of his pork. It is gratifying to know that in this respect we do not fall behind our neighbors in the United States. Improvements are every year being made which aild largely to the wealth of the

One of the inert varieties of Sarsaparılla grows wild in our own forests, while several others, nearly worthless, abound in Central and South America. The intelligent agent assured us that the virtues of this drug had never been fully told, and that the reason of the low esteem in which many hold it is mainly due to the importation of such immense quantities of the worthless varieties. His accounts of his trips to Hondaras and his business excursions along the Gulf of Dulce and the rivers of Montagna and Santlago and among the adjacent mountains were of intense interest We can but commend and honor his employers for the faithfulness and energy with which they execute their trust as ministers to the ublic health; and we suspect that this course is at least one of the reasons why their medicines are held in such extraordinary favor
