### American (Waltham) Watches.

THE true value of Machinery applied to Watchmaking is not that by it a z Watches are made rapidly, but that they are made correctly. Very few people know why Waltham Watch should be superior to any other. In the first place, at Waltham the Watch is regard ed as only a machine, to be constructed, like any other machine, on mechanical principles. The fac. 2 is indeed little else than a vast machine shop, the principal work in which is not more upon wat ches than upon machinery to make watches with. If the watches are good, it is because the machinery is good. Of course there must be no defect in the principle or plan of the movemen, no mistake in the sizes or shapes of the pieces of which it is composed nothing wanting in their properties, and no error in their positions. These points once thoroughly settled in regard to each part of every variety of watch. the night, perhaps, it would not be just to the ling of a very great bridge in one of the far liver positions. These points once thoroughly section in regard to each part of every great bridge in one of the far it rests wholly with the machinery constructed with infinite diversity of form and function, expressly for the purpose, to produce the finished pieces. The method established in every department is the repudiation of parts by mechanical means, and this is carried out on the system of the most thorough sub-

By means of multiplying guages and microscopes, tests, and inspection for the detection of wear in cutting tools and for faults and flaws in steel or stone are made to accompany the work in every stage from beginning to end. As a necessary result, the Watch goes together a perfect machine. Every out reserve. At eleven o'clock, they go in highest mainspring, vibrates with a wide and free motion, and the beat has the clear and ringing sound, always characteristic of the Waltham Watch. The machine is a timekeeper from the start. This system of watchmaking is unknown in foreign countries, and is entirely original with the

Waltham Company. The company claim that by it they produce watches that cannot be equaled for every quality which makes a watch valuable. Simple in plan and correct in principle, the movement we are not in a position to apply for a repeal Rifles, by the kind permission of Major Buller not easily damaged, easily repaired, and when repaired always as good as new.
