THIS COMPANY has been organized for the purpose of affording increased faciliation in transaction of LIFE INSURANCE, especially in the Dominion of Canada's in which not withstanding the vast expent of its territory, and yearly increasing population, there is as yet, only one on their Lives, and this money, which is sent out of the country, might with more profit be retained in it, and invested in securities equally as safe as those of the United States or Great Britain.

Life Insurance rests upon a solid foundation of truth and reason. It results from a conviction, which is every day gaining strength of the incalculable benefits of the system.

No other plan has yet been devised by which duty and affection can so adequately, and so securely which is every day gaining strength of the incalculable benefits of the system.

No other plan has yet been devised by which duty and affection can so adequately, and so securely that the merits and beneficent workings of the system should be more fully understood and appreciated, in order that life should be secured against the hasards of untimely death, as universally as the prudent in sure their material possessions against the portl of devastation by the elements.

The prevalence of Life Insurance may justly be regarded as the measure of advancing refinement and social virtue, and every man on whom the lives and well being of others depend, will by the enlightent of a growing intelligence of public opinion be deemed guilty of inexcusable selfishness and criminal imprudence if he fails to avail himself of that protection which the system offers.

It is believed that not more than one in twenty of the heads of families in the United King dom have good and the United States is greatly lewer in proportion. There is thus a most anaple field for its operation, because of the benefits of Life Insurance, and the number who have done so in Canada and the United States is greatly lewer in proportion. There is thus a most angular leavaged facilities in the United States is greatly

and the United States is greatly tewer in proportion. There is thus a most ample field for its operation, Rich Flavo and more so now than ever in consequence of the abundance of money placing Insurance within the Very Fine

From the connections and arrangements which have been made by the Directors, there is little doubt but an extensive business will be transacted in Canada, as well as in the United States and in doubt but an extensive business will be transacted in Canada, as well as in the United States and in Great Britain. The success which has attended many of the existing properly conducted Life Insurance Companies (especially those which have avoided the speculative, and always hazardous risks of Marine and Fire, the combination of which with life risks is opposed to correct principes of Insurance, and is wisely prevented by the laws of some countries) affords satisfactory evidence of their value as an investment, the shares being at a premium ranging from 100 to 2000 per cent.

There is therefore no reason why this Company, which will be founded on those principles, which experience has shown to be the most approved, and conducted with prudence and economy, should not attain a measure of success as great as some of those referred to.

A very influential Board of Directors has been formed, and the necessary amount of capital has been secured to enable business to be commenced as soon as the Act has been obtained. As it is, however, very desirable to have a numerous body of shareholders, who will interest themselves in promoting the
