As the Corporation apparently intends to defy the Ottawa City Passenger Railway Company to take alvantage of the privileges conterred upon them by Act of the Legislature, it will, doubtless, be of interest to our readers to know, as nearly as possible, how the question stands between the Corpopublished a correspondence between the Joint Committee of the Corporation and citizens and the Street Railway Board, which, however, resulted in no satisfactory agreement between the parties. Secretary, O. C. P. R. R. Co It will be seen from the above that no timation was given of any intention to lay "a double track," but that certain specific information was asked for concerning the grade of the streets, and other matters, about which a mutual understanding between the Company and the Corporation would be the greatest advantage to both. We have not heard that such information was given the Company, though common civility would suggest that it ought to have been furnished even if the Corporation authorities were disposed to be indifferent to the interests of the city and the Company alike. Instead of furnishing the information desired the Cir Solieiron is engaged to draft a by-law in the teeth of a Provincial statute. This by-law is introduced and passed through all stages at a single sitting of the Corporation, in obegience to the instructions of His Worship the Mayor, who at the same time informs the Council that it has drawn for the purpose of testing validity of the Company's charter. Now, we should like to know who conceived the brilliant notion of testing the validity of an Act of Parliament by a Municipal by-law Can it be possible that any member of the City Council seriously believes that a Corporation by-law can render void a charter rom the Legislature?

It is also to be observed that the preamble of the by-law asserts (what is not the case that the Company had given notice of their intention to lay a "double track." Probably the enacting clauses of the by-law will prove no more effective in law than is the preamble true as to fact; but as it may be the foundation of legal proceedings which will cost the citizens something, we insert it here for their information:

In this way we believe the interests of the citi zens would be much better served than by trusting an issue with the Company to the "glorious uncertainties of the law," especialwhen all its certainties are against the Corporation. It no doubt would be a delicate, and, perhaps, difficult matter, under present circumstances, to interfere with this action of the Local Government, this proscribing every man who has been firm in his loyalty to his Government and to the laws of his country—the men who have been firm in their support of the policy, urged upon them by the British Government!

But while loyal men are thus being punished by the Local authorities, it behoves the General Government to be careful, to sustain and encourage them, and to let them understand, that the friends and supporters of British rule and of the Union, will not be abandoned by them. There is a feeling creeping in among Unionists, that the Dominion Government, in its desire to conciliate their enemies, may sacrifice their friends. It is to be hoped that such fears are groundless, and that all who have hitherto supported the Union cause may have no reason to regret their choice, and may still be enabled to look

commercial community move in this matter

A fearful tragedy, one that may well cause the blood to curdle in the veins and fill the soul of any sensitive mortal with horror, was enacted at the Planter's House, corner of Bluff and Third-sts., yesterday afternoon. The motives which prompted the commission of the act are still involved in mystery, but of the result enough is known to stamp it as a tragedy which, for the credit of humanity, we are happy to say, is not often witnessed-that of a husband and wife quietly resolving to end their lives together by suicide.

The parties to the tragedy arrived in this city by boat, and took quarters at the Planter's Iouse, where they registered their names as George Baker and lady, of Madison, Wisconsin. Both were well dressed, and apparently used to moving in the best society. The pair were assigned to room No. 19, and remained much of the time in quiet and seclusion, but nothing unusual was noticed in their conversation and demeanor.
