Hides-Slaughter, per 100 lbs .... 6 00 @ 00 00 THERE is scattered over all countries a class of psuedo philosophers to whom change is the essence of all that is good and desirable in human affairs. To them old systems of government, of commerce, of warfare and even of religion, is arrant folly; and the moment anything new is propounded, they | years; store and dwelling attached; storehouse, seize upon it as the ne plusultra of human wisdom, and at once turn their batteries upon that which the new invention or dis covery is destined to supersede; or, as is oftener the case, to supplement. Whether there is real value in the new idea or no is of little importance so long as it affords an opportunity of attacking something old; and often the avidity with which utterly worthless theories are embraced and forced upon the convictions of the ignorant, is productive of incalculable mischief; but these in their turn must after a brief popularity give way to the sober attack of practical intelligence, and the wrong is repaired cast aside, as old fogy and useless, if not injurious. But there are inventions and discoveries which are of vast importance as additions to our stock of knowledge and power, but only as additions; and the great danger of these is, that while practical would also call the attention of ladies to her very common sense accepts them as valuable auxiliaries, the multitude are prone to look upon them as the only things needful, to promptly, and at a very short notice. Ladies' underclothing, and infants' outfits on hand and exaggerate their importance beyond a legitimate point, and to desire the utter abandonment of all previously received ideas. And especially is this the case in this age of economy, when the saving of a few pence or pounds is the only argument necessary to convince the ordinary taxpayer; style notwithstanding the often proved fact that made to order, Corner of Bank and Albert-sts. the saving of a few hundreds of pounds may involve the loss of thousands. And this is the result likely to follow the important invention of the new gun-carriage by Captain Moncriber, a full description of which we published last week, unless prac-tical common sense and prudence is strong or other business with which he may be favored. He is conversant with both languages; and all enough to keep the admission of its impor- business transactions entrusted to his care will be tance within proper bounds. What these attended to with punctuality, and kept strictly conbounds shall be, it will be for scientific and practical artillery engineers to determine by scientific and practical experiments. Beyond the generally-perhaps too generally-admitted fact that this invention will be of much greater service in defensive than offensive warfare, nothing is yet determined; and that it will have the effect of doing away entirely with fortifications is so far undemonstrated that we must look upon the rhapsodies in that behalf, not only as absurd, but absolutely mischievous. During the last session of Canadian Parliament the necessity for a system of fortifications was so well established that the TTAWA CITY requisite sum for erecting them was granted; and we shall be only too happy, i with the adoption of Captain MONCRIEFF's invention, the sum can be reduced; or what is more likely, that by employing that invention, we shall be enabled to make our system of defence so much more effective that our position will be reasonably impregnable, without involving a greater expenditure than the action of last session contemplated. In England it has been assumed that for coast defence Capt. MONCRIEFY's invention will render fortifications undecessary, and we can see no reason why Moncrieff batteries should not be almost as effective against naval artillery, without exended fortifications, as with them. But when a city or position is attacked by a land force the advantage will be to a great extent lost; especially if the ap proaches present elevations upon which the attacking force may establish batteries o the same kind as those employed in the defence, with the old advantage in favor of the attack, that while the defenders have a city or important lines of communication to preserve from capture or destruction, the enemy will have nothing but his war like materiel to destroy. Then again Moncrieff batteries, quite as much as other | n the batteries, must be protected against sud- PROVINCE OF NEW BRUNSWICK. den night surprises, storming parties and 3. Amherst and Folly Lake [about 53 miles] in eavalry, and it is preposterous to assume that this can be done by simply sinking

seize upon Captain MONCRIEFF's im-

proved gun-carriage, and the expressions of

coast fortifications in the Islands, and parade them as proofs of their foresight and wisdom; but before applying even these inconclusive assumptions to Canada, we had a right to expect that they would at least take into consideration the difference in the position which we hold; and Capital Stock, ..... \$500,000, supply at \$3.50 for fore quarters, and \$4.50 for tions were rendered unnecessary by the new invention, have been able to support Oats remain at last quotations with an insuffi- their utterances by the demonstrations of scientific artillery officers and engineers. Hay is the same as last quotations with a mod- There is another point regarding the posicrieff invention prove anything, they prove too much, so far as their reputation for wisdom and consistency is concerned. They stoutly maintained that fortifications were useless and unnecessary; but if they were unnecessary under the old system, Monerieff batteries which will simply take their place under the new system should it be adopted would be equally unnecessary, and we therefore cannot conceive why they should be greatly rejoiced and indulge in so much glorification, at the discovery of an auxiliary aid to defence, the desirability and utility of which they emphatically denied. At all events, whatever the result of Captain Moncriber's invention may be, and we have not a doubt that its tions will be great, it will be imprudence and folly of the most disastrous kind to suppose that it will revolutionize systems of warfare to a degree greatly beyond that effected by rifled ordnance, repeating and breech-loading rifles and iron-clad ships, which one nation can use as well as another, the only difference being in the means and skill used in their manufacture, and the courage and discipline with which they are handled .- United Service Gazette.

## PROSPECTUS.

THE DOMINION TELEGRAPH COMPANY has been organized under the Act respecting Telegraph Companies, chapter 67 of the Consolidated Statutes of Canala. Its object effect upon both naval and military opera- is to cover the Dominion of Canada with a complete net-work of Telegraph lines.

THE CAPITAL STOCK

Is \$500,000, divided into 10,000 shares of \$50 each, 5 per cent to be paid at the time of subscribing, the balance to be paid by instalments, not exceeding 10 per cent per month —said instalments to be called in as the works progress.

### THE BUSINESS AFFAIRS OF THE COMPANY are under the management of a Board of Directors annually elected by the shareholders in conformity

with the Charter and By-laws of the Company. The Directors are of opinion that it would be to the interest of the Stockholders generally to obtain subscriptions from all quarters of Canada, and with this view they propose to divide the Stock amongst the different towns and cities throughout the Dominion in allotments suited to the population and business occupations of the different localities and the interest which they may be supposed to take in such

CONTRACTS OF CONNECTIONS.

A contract, granting permanent connection and extraordinary advantages, has already been executed, between this Company and the Atlantic and Pacific Company of New York; thus, at the very commencement, as the Lines of this Company are constructed from the Suspension Bridge, at Clifton (the point of connection) to any point in the Dominion, all the chief cities and places in the States.

Rimme touched by the Lines of the Atlantic and Pacific Telegraph Company, are brought in immediate con-

A permanent connection has also been secured with the Great Western Telegraph Company of Chicago, whereby this Company will be brought into close connection with all the Lake Ports and other places through the North Western States, and through to California. All classes of Society are interested in extending the use of the Telegraph, at LOW RATES, and the Directors are satisfied, that the adoption of a scale of charges considerably below the rates now exacted in Canada, will by encouraging a much more extended use of this medium of communication, not only Hair Brushes, prove a real and substantial benefit to the public generally, but will also ensure a safe and profitable Nail and T

eturn to the Investor. On the 25th day of June, A.D., 1868, the DOMINION TELEGRAPH COMPANY was duly CHAR-SALE or TO LET.—Premises in the Village of Cantly, Gatineau—about fourteen miles from the city—used as a general store for the past ten had it not been that previous a tempts to establish Telegraph Companies in Canada, to share the

iness with the Montreal Company, had been allowed to fall through. The success of a Telegraph Company will mainly depend on its ability to meet the demands of the public, and consequently it should possess, at least, equal facilities with any other Company, of access to all quarters with which its customers may desire to have communication.

This important requisite has not been, until now, within the reach of any Company entering the field as a competitor with the Montreal Company, in consequence of the close and exclusive connection formed between that Company and the Western Union Company, of the United States, the latter by virtue of certain patents, having until within these two years, monopolized nearly the who'e of the telegraph business of the neighboring republic. The business relations between these two Companies continue in full force, but the patents having

run out, the monopoly so long enjoyed by the Western Union has ceased to exist. The Atlantic and Pacific, the Great Western, and other American Companies have invaded the field, and have become successful competitors for the public patronage and support. These Companies, acting on the cheap postage principle, have forced the old monopolist to a reduction of rates, which has resulted in a more widely extended use of this means of communication, and much to the surprise of the estern Union itself, has increased its profits, whilst sharing its field of operations.

With these new Companies the Dominion Telegraph Company of Canada have entered into most satisfactory business relations, and confident of the soundness of the principle which led to the adoption of the penny-postage system in Great Britain, the voluntary reduction from \$100 to \$16.65 per ten word message by the Ocean Cable Company, and the successful operations of the Companies recently established in the United States, invite the business and mercantile community of Canada to join them in the promotion of an enterprise, based on the principle of moderate rates and extended business which, while injuring no one, they confidently expect will result in securing a large return to the in vestor, and prove a vast benefit to the community.

by a retrograde movement, and a re-adoption of what had, in the excitement protion of what had, in the excitement pro-

proximo, will be further reduced to \$16.65 per ten words.

An advertisement has recently appeared announcing to the public that the rates from 1st Septem-The tollowing table shows the reduction which has been effected in rates in the neighboring States arising out of the construction of competing tines :-

rom New York to	Former Rate.	Present Rate.	
Boston	\$ 60	\$ 30	labor.
Banger	1 20	65	
Portland		50	
Philadelphia	40	25	
Baltimore	70	35	
Washington	75	40	
Augusta, Me	1 20	€0	
Cincinnati	1 90	1 00	
Buffalo		50	
Cleveland		1 00	
Pittsburgh		45	
Louisville	1 96	1 00	

This reduction took place in November, 1867. A comparison of the receipts of the Western Union since that period with the corresponding months of the previous year gives the following results : -December, 1866 .......\$ 551,971 40; December, 1867 .......\$576,135 19; Increase .......\$ 24,163 79 R. R. Depot, and within a few minutes walk | Montreal.

Jany., Feb., March,'67 1,594,644 96; Jany., Feb., March,'68 1,727,939 55; Increase....... 133,294 59 from the Banks and Post Office. April. May, June, '67, 1,559,778 79; April, May, June, '68, 1,749,631 52; Increase......... 159,852 73

While these beneficial results were flowing to the Western Union Company from the reduction of rates, the new Companies had created a business more than sufficient to fill their wires. In proof of this the following extract is taken from the report of the Atlantic and Pacific Company, made July

Irom the Sanks and Post Office.

Terms are exceedingly moderate. Try once and you will be satisfied.

Der Remember the Place "City Hotel," 78, 80 and 82, St. Joseph-street, Montreal. " In April last we reached the maximum capacity of our wires, and have since been compelled to

refuse business daily. The Committee, therefore, have reached the conclusion from the actual experience of building and working the present lines-that "Telegraphic tusiness is growing faster than Telegraphic facilities."

As further proof on this point, the low rates have so pressed the wires of both Companies with business through the day, that posters have been placed in all the main offices proclaiming that double the number of words would be telegraphed at night at the same price as half the number of words by

Corner James and King-sts.,

Opposite the Court House and Public Offices, ST.

CATHARINES, Ont.

E. HOUGHTON, Proprietor,

In support of the observation quoted above, that telegraphic business is growing faster than telegraphic facilities, the following statement exhibiting the wonderful increase in the use of the wire, within the last six years, cannot be without interest to our readers. The gross earnings of all telegraph lines in the United States for the following years were:

Showing an average increase of a million a year for the last five years.

A comparison of the number of messages, and persons using the wire in Canada and the States, furnishes a further proof of the advantage to the public and corresponding benefit to the Companies arising out o a reduction of rates. The published recurns for 1867, show that 600.757 messages were sent in Canada, while the mesrages in the United States for the same period exceeded 20,600,000, the former being less than one message to every six persons, the latter, two to every three. From these returns and results it may be reasonably inferred that a reduction of rates to a tariff at which the wires of both Companies can be

reasonably inferred that a reduction of rates to a tariff at which the wires of both Companies can be filled, will secure a fair field and good prospects to the Dominion Company without in any way projudicing the interests of the Company new monopolizing the ground.

The particulars submitted above are sufficient in the opinion of the Directors to establish the fact that low rates, by encouraging a more general use of the telegraph, are more profitable than high. It is not, however, solely in the light of a safe and good investment that the Directors desire that this enterprise should be viewed. They feel that their object will be but indifferently attained unless they can satisfy the public, the business and commercial men, that ALL who use the telegraph as a medium of rapid communication, are interested in the establishment of what may be called a competing line.

The particulars submitted above are sufficient in the opinion of the Directors to establish the fact furnished suites of apartments, in every seligible for civil or military officers, or particular and provided suites of apartments, in every seligible for civil or military officers, or particular and provided suites of apartments, in every seligible for civil or military officers, or particular and provided suites of apartments, in every seligible for civil or military officers, or particular and provided suites of apartments, in every seligible for civil or military officers, or particular and provided suites of apartments, in every seligible for civil or military officers, or particular and provided suites of apartments, in every seligible for civil or military officers, or particular and provided suites of apartments, in every seligible for civil or military officers, or particular and provided suites of apartments, in every seligible for civil or military officers, or particular and provided suites of apartments, in every seligible for civil or military officers, or particular and provided suites of apartments and provided suites of apartments a As in the administration of public affairs, a strong, watchful opposition, is the best security for good and careful government: so in commercial matters, an honest rivalry in the various pursuits and branches of trade furnishes the best security that the public shall be well served.

To apply the argument to the purpose in hand, the following table showing the inconsistencies, and, in many instances, the excessive rates now charged on messages passing between the cities and towns

of Ontario, Quebec and the United States, will, it is believed, convince the reader that an honest competition is needed, not only for the reduction and adjustment of rates, but also to ensure that attention and care which would of necessity be enforced on the Companies competing for public favor, and thus tend greatly to promote the general interests of the community.

Allen's Lung Balsam!

Consumption, Coughs, Bronchitis, Asthma, Croup, Diseases of the Throat, Pains and Oppression of the Chest or Lungs, Difficult Breathing, and all the Discases of the Pulmonary Organs.

This Balsan is introduced to the suffering public after its merits for the positive cure of such diseases have been fully tested. The formula from which it is prepared is referred to by the leading medical journals as being equal to any prescription that can be made up for such diseases by the medical faculty. The Balsan is, consequently, recommended by physicians who have become acquainted with its great success. As an Expectorant it has no Equal !- It is composed of the active principles of Roots and Plants, which are chemically extracted, so as to retain all their medicinal qualities.

MINISTERS AND PUBLIC SPEAKERS, who are so often afflicted with Throat Diseases, will find a sure remedy in this Balsam. Lozenges and wafers sometimes give relief, but this Balsam, taken a few times, will insure a permanent cure.

Will the Afflicted Clergyman Please Test us Merits!-Testimonia's of Physicians-Dr. Nathaniel Harris, for many years a resident of Middlebury, Vermont, recommends the Balsan as being superior

to all other remedies for Bronchitis. He says: "I have no doubt it will soon become a classical remedial agent for the cure of all diseases of the Throat, Bronchial Tubes, and the Lungs." Dr. Lloyd, of Ohio, surgeon in the army during the war, from exposure contracted consumption.

"I have no hesitancy in stating that it was by the use of your Lung Balsam that I am now alive and enjoying health." Dr. Fletcher, of Missouri, says: "I recommend your Balsan in preference to any other medicine for Coughs, and it gives satisfar-

Dr. A. L. Scovill who has, for many years, been known to the public throughout the United States as the inventor of remedies for the Lungs, recommends ALLEN'S LUNG BALSAM as surpassing any thing that has ever been offered to the public for the cure of Lung Diseases. He has used it in his own family with great success in the case of his sister, who was supposed to be in the last stages of Consumption. This lady is now well, and has been permanently cured by ALLEN'S LUNG BALSAM. Physicians who have failed to cure their patients should try this medicine before they give the case up, as we know very many valuable lives have been saved by being persuaded to give it a trial. Don't despair because all other remedies have failed, but try- this remedy and you will not be deceived. The proprietors of this valuable Balsam take pleasure in calling to it the attention of all medicine

friends. It will stand the test for merits, as has the celebrated PERRY DAVIS' PAIN KILLER, which has been introduced to all parts of the inhabited world, and is everywhere appreciated and Allen's Lung Balsam is the remedy to cure all Lung and Throat difficulties. It should be thoroughly tested before using any other balsam. It will cure when all others fail. Directions accompany each bottle. For sale by all druggists.
