Take, tor instance, the framing That of the "Glatton" is on the combined longitudinal and bracket system of framing with a complete double bottom, as first introduced by the present Chief Constructor of the Such are the words of a correspondent of the | navy; that of the "Dictator" consists merely of the ordinary floorplates and angle iron The enthusiasm which prevailed at the frames, obviously very weak to support the kindly permitted to publish, is from the letter of muster, on Friday evening last, of the Brigade enormous weight she has to carry. Both vestellative of Dr. Wolfe, of this city, now residing muster, on Friday evening last, of the Brigade enormous weight she has to carry. Both vestellative of Dr. Wolfe, of this city, now residing muster, on Friday evening last, of the Brigade sels have lams, but while the "Dictator's" is Garrison Artillery, gives the lie direct to this | sels have 1ams, but while the "Dictator's" is "Find out if the Express charges are too high, assertion, and proves how dangerous and mis. formed by a prolongation of the side armour, and if not, arrange with Mortimer to let you have leading it is to trust to mere statements witha box of the bottles of CHOLERA MIXTURE, I out regard to facts. The condemnatory adcould make a good little fortune with them. The bottle I brought with me here brought two ladies jectives used will, upon inquiry, be found to ted ram-stem projecting several feet at such a round from decided cholera; one on board the apply only to the correspondent in question, distance below water as would enable her to boat, and the other in Berlin, United States. Both | and not to our able and patriotic Minister of | pierce an enemy's side under the armour, instead of striking the armour itself as the " Dictator's" ram would do. The side armour, in each case, is carried on a projecting armourshelf, which though not a very strong method, tends to check rolling. In the "Glatton' this armour consists of solid 12-inch and 10inch fron plates, worked on a teak backing, and fastened with through bolts. In the " Dictator" the armour is made on of six 1lion are adapted to that branch of the service | inch plates, backed for half of their depth by three narrow iron planks 41 inches thick; there is also an oak backing about 3 feat tion" given, Li ut -Colonel James Ferrier, the | thick, which is increased at the part where the officer commanding, spoke to the following solid iron planks are discontinued. The total depth of the "Dictator's " armoured side is 6 feet, but the two inner layers of 1-inch plates only reach to about 3 feet 9 inches from the forage caps again, and your attendance here upper deck (about 2) feet below water), and other, in st-ps, so that at about 31 feet b low water the protection consists of a single 1 inch to be got through to-night, I shall read Lord | plate, which extends to 4 feet 8 inches below water. The "Glatton's" armour, when in fighting trim, extends to 5 feet below water,

the system of through bolts is very superior to ly superior to any, or all other preparations for a pleasant one; he obtains his discharge (the plates in place; while if one of the American monitors went into action after a tolerably long commission, it is probable that the plates, on being struck, would bodily come off its most novel feature and at the same time the have introduced in their monitors is the armour-plated breastwork defending the base freeboard to be adopted, thus securing the immunity from rolling which is such a valuathe digestive organs corrected, softening the skin, | cially interested these present, viz. : sects. 4, | ble quality of the monitor, and at the same time giving us a height of portsill equal to that in many broadside ships. It moreover encloses the principal archways, thus preventin the possibility of the vessel being sunk by water getting into the hold. There is no doubt that this is the most valuable improvement in this class of vessel since the day when the appearance of the "Monitor" in Hampton Roads saved the Northern fleet from destruc-

the vast superiority of the English plan. In

the first place we use solid instead . f laminated

really sea-going monitor A comparison of the English and American systems of constructing the turret, although too long to enter upon in the present article, will show a similar balance in our favour. On the whole it appears evident that while we are no doubt indebted to the Americans for act in concert; in a word to know something | them in the mechanichal construction of these

CHAMELEONS.

[Saturday. Review.] The distinctive characteristic of the human chamelon is his intense and incessant su-ceptibility to every new atmospheric influence

in which circumstances place him. He is open to every intellectual and motal impression which chance or design brings to bear upon him. Is he with artists? then he is all aflame with the conviction that political activity is only fit for interior minds who cannot rise to the far higher sphere of colour, I know you have, and that I will be enabled form, composition, and beauty. For a For the relief and cure of Epilepsy, St. Vitus' Dance, Puerperal Hysteris, &c., &c. This preparation is from the relief and cure of Epilepsy, St. Vitus' high soldierly efficiency will, we are constitution is from the relief and cure of Epilepsy, St. Vitus' high soldierly efficiency will, we are constituted boiling point. Form, colour, composition, beauty, sink down to the low depth of trivoticed, be fully available at the first moment loss dilettantism, mere idleness with a welllous dilettantism, mere idleness with a well-We must not forget the Brass Band of the sounding name pinned on to it. The paint-Brigade, which, under the able and painstak- box is huddled into a corner, the master has subscriber to give it every possible publicity. The ing leadership of Mr. Prince, performed in a peremptory conge, and the easel is speedily laden, not with canvas, but with heavy tomes, The following is a list of the officers at- atlases, charters, and we know not what besides, that are going to the making of the Lieut, Col.
