OTTAWA MARKETS.

[Compiled expressly for the OTTAWA TIMES.]

Times Office, Ottawa, Feb. 11, 1869.

The markets were again very poorly supplied with provisions of all kinds, excepting only **Beef, Mutton and Hay. Pork**, there was none.

Beef, in moderate quantity, was offering at $6 to $7, and **Hay** at $19 to $22. Some attributed the poverty of the market to the fact of its being Ash Wednesday, and prophesied a good supply to-day.

A FORTUNE ON EASY TERMS.—The Vienna papers give a curious will left by a rich and eccentric octogenarian named Stanislas Poltmary, who lately died on his property near Pesth. After bequeathing pensions to all his old servants, and alms to the poor, he sets down an extraordinary clause, instituting as universal legatee M. Francois Lotz, Hungarian by origin, and a notary by occupation, in a little town near Vienna. But the testator annexes one condition: "My property," he wrote, "will belong to M. Lotz when he shall have sung, either at La Scala in Milan or the San Carlo in Naples, the parts of *Otello* in the opera of that name, and that of *Elvino*, in the 'Sonnambula.' I do not dispose of my wealth in this manner for the sake of being thought an original, but having been present four years ago at an evening party in Vienna, I heard this gentleman sing a cavatina from each of those operas with a beautiful tenor voice. Therefore I believe him likely to become an excellent artist. In any case if the public hisses him he can console himself easily with three millions of florins (£300,000), which I leave him." M. Lotz has been in Naples for a month, preparing to carry out the wishes of the testator. He is not forty, has a well-tuned voice, and works night and day to learn as quickly as possible the two parts with their pronunciation and singing.

—Sun-baths cost nothing and are the most refreshing, life-giving baths that one can take whether sick or well. Every housekeeper knows the necessity of giving her woolens the benefit of the sun, from time to time, and especially after a long rainy season, or a long absence of the sun. Many will think of the injury their clothes are liable to from dampness, who will never reflect that an occasional exposure of their own bodies to the sun-light is equally necessary to their own health. The sun-baths cost nothing, and that is a misfortune, for people are still deluded with the idea that those things only can be good and useful which cost money. Let it not be forgotten that three of God's most beneficent gifts to man—three things the most necessary to good health—sunlight, fresh air and water, are free to all; you can have them in abundance without money and without price if you will. If you would enjoy good health, then see to it that you are supplied with pure air to breathe all the time; that you bathe for an hour or so in the sun-light; and that you quench your thirst with no other fluid than water.—*Journal of Health.*

—No posthumous novel by Eugene Sue has been discovered. Several little sketches, written when the afterwards famous novelist was nineteen years of age, were found, and an unscrupulous publisher tried to force a sale by giving them an importance which their merits did not deserve.

PROSPECTUS.

THE DOMINION TELEGRAPH COMPANY has been organized under the Act respecting Telegraph Companies, chapter 67 of the Consolidated Statutes of Canada. Its object is to cover the Dominion of Canada with a complete network of Telegraph Lines.

THE CAPITAL STOCK

Is $500,000, divided into 10,000 shares of $50 each, 5 per cent to be paid at the time of subscribing, the balance to be paid by instalments, not exceeding 10 per cent per month—said instalments to be called in as the works progress.

THE BUSINESS AFFAIRS OF THE COMPANY

are under the management of a Board of Directors annually elected by the shareholders in conformity with the Charter and By-laws of the Company.

The Directors are of opinion that it would be to the interest of the Stockholders generally to obtain subscriptions from all quarters of Canada, and with this view they propose to divide the Stock amongst the different towns and cities throughout the Dominion in allotments suited to the population and business occupations of the different localities and the interest which they may be supposed to take in such an enterprise.

CONTRACTS OF CONNECTIONS.

A contract, granting permanent connection and extraordinary advantages, has already been executed, between this Company and the Atlantic and Pacific Company of New York; thus, at the very commencement, as the Lines of this Company are constructed from the Suspension Bridge, at Clifton (the point of connection) to any point in the Dominion, all the chief cities and places in the States, touched by the Lines of the Atlantic and Pacific Telegraph Company, are brought in immediate connection therewith.

A permanent connection has also been secured with the Great Western Telegraph Company of Chicago, whereby this Company will be brought into close connection with all the Lake Ports and other places through the North Western States, and through to California.

All classes of Society are interested in extending the use of the Telegraph, at LOW RATES, and the Directors are satisfied, that the adoption of a scale of charges considerably below the rates now exacted in Canada, will by encouraging a much more extended use of this medium of communication, not only prove a real and substantial benefit to the public generally, but will also ensure a safe and profitable return to the Investor.

On the 25th day of June, A.D., 1868, the DOMINION TELEGRAPH COMPANY was duly CHARTERED according to law.

The admitted importance and value of Telegraphy, would, in the opinion of the Directors, have rendered any introduction of the Dominion Telegraph Company to the Canadian public unnecessary had it not been that previous attempts to establish Telegraph Companies in Canada, to share the business with the Montreal Company, had been allowed to fall through.

The success of a Telegraph Company will mainly depend on its ability to meet the demands of the public, and consequently it should possess, at least, equal facilities with any other Company, of access to all quarters with which its customers may desire to have communications.

This important requisite has not been, until now, within the reach of any Company entering the field as a competitor with the Montreal Company, in consequence of the close and exclusive connection formed between that Company and the Western Union Company, of the United States, the latter by virtue of certain patents, having until within these two years, monopolized nearly the whole of the telegraph business of the neighboring republic.

The business relations between these two Companies continue in full force, but the patents having run out, the monopoly so long enjoyed by the Western Union has ceased to exist.

The Atlantic and Pacific, the Great Western, and other American Companies have invaded the field, and have become successful competitors for the public patronage and support. These Companies, acting on the cheap postage principle, have forced the old monopolist to a reduction of rates, which has resulted in a more widely extended use of this means of communication, and much to the surprise of the Western Union itself, has increased its profits, whilst sharing its field of operations.

With these new Companies the Dominion Telegraph Company of Canada have entered into most satisfactory business relations, and confident of the soundness of the principle which led to the adoption of the penny-postage system in Great Britain, the voluntary reduction from $100 to $16.65 per ten word message by the Ocean Cable Company, and the successful operations of the Companies recently established in the United States, invite the business and mercantile community of Canada to join them in the promotion of an enterprise, based on the principle of moderate rates and extended business which, while injuring no one, they confidently expect will result in securing a large return to the investor, and prove a vast benefit to the community.

Allusion has been made to the voluntary reduction of rates by the Atlantic Cable Company. A Chicago paper, writing on the subject of the growing use of the Telegraph, gives the following return as obtained directly from Cyrus W. Field, showing very conclusively the benefit both to the public and the Company of the reduction of rates.

AVERAGE DAILY RECEIPTS.

From $100 per message of ten words		$2,525
do 50	do do	2,895
do 25	do do	3,965

An advertisement has recently appeared announcing to the public that the rates from 1st September, proximo, will be further reduced to $16.65 per ten words,

The following table shows the reduction which has been effected in rates in the neighboring States arising out of the construction of competing lines:—

From New York to	Former Rate.	Present Rate.
Boston	$ 60	$ 30
Bangor	1 20	65
Portland	90	50
Philadelphia	40	25
Baltimore	70	35
Washington	80	40
Augusta, Me.	1 20	60
Cincinnati	1 90	1 00
Buffalo	75	50
Cleveland	1 95	1 02
Pittsburgh	1 15	45
Louisville	1 90	1 00

This reduction took place in November, 1867. A comparison of the receipts of the Western Union since that period with the corresponding months of the previous year gives the following results:—

Gross Receipts for

December, 1866	$ 551,971 40	December, 1867	$576,135 19; Increase $ 24,163 79
Jany., Feb., March, '67	1,591,644 96	Jany., Feb., March, '68	1,727,939 55; Increase 133,294 59
April, May, June, '67	1,559,778 79	April, May, June, '68	1,749,631 52; Increase 189,852 73

While these beneficial results were flowing to the Western Union Company from the reduction of rates, the new Companies had created a business more than sufficient to fill their wires. In proof of this the following extract is taken from the report of the Atlantic and Pacific Company, made July 28th, 1868:

"In April last we reached the maximum capacity of our wires, and have since been compelled to refuse business daily. The Committee, therefore, have reached the conclusion from the actual experience of building and working the present lines—that

"Telegraphic business is growing faster than Telegraphic facilities."

As further proof on this point, the low rates have so pressed the wires of both Companies with business through the day, that posters have been placed in all the main offices proclaiming that double the number of words would be telegraphed at night at the same price as half the number of words by day.

In support of the observation quoted above, that telegraphic business is growing faster than telegraphic facilities, the following statement exhibiting the wonderful increase in the use of the wire, within the last six years, cannot be without interest to our readers. The gross earnings of all telegraph lines in the United States for the following years were:—

1846	$ 4,228 17	1864	$3,792,245 40
1849	63,338 98	1865	4,420,268 88
1853	163,860 84	1866	5,624,401 20
1862	2,734,960 40	1867	7,741,552 47
1863	3,269,442 66		

Showing an average increase of a million a year for the last five years.

A comparison of the number of messages, and persons using the wire in Canada and the States, furnishes a further proof of the advantage to the public and corresponding benefit to the Companies arising out of a reduction of rates.

The published returns for 1867, show that 604,757 messages were sent in Canada, while the messages in the United States for the same period exceeded 20,000,000, the former being less than one message to every six persons, the latter, two to every three. From these returns and results it may be reasonably inferred that a reduction of rates to a tariff at which the wires of both Companies can be filled, will secure a fair field and good prospects to the Dominion Company without in any way prejudicing the interests of the Company now monopolizing the ground.

The particulars submitted above are sufficient in the opinion of the Directors to establish the fact that low rates, by encouraging a more general use of the telegraph, are more profitable than high. It is not, however, solely in the light of a safe and good investment that the Directors desire that this enterprise should be viewed. They feel that their object will be but indifferently attained unless they can satisfy the public, the business and commercial men, that ALL who use the telegraph as a medium of rapid communication, are interested in the establishment of what may be called a competing line. As in the administration of public affairs, a strong, watchful opposition, is the best security for good and careful government: so in commercial matters, an honest rivalry in the various pursuits and branches of trade furnishes the best security that the public shall be well served.

To apply the argument to the purpose in hand, the following table showing the inconsistencies, and, in many instances, the excessive rates now charged on messages passing between the cities and towns of Ontario, Quebec and the United States, will, it is believed, convince the reader that an honest competition is needed, not only for the reduction and adjustment of rates, but also to ensure that attention and care which would of necessity be enforced on the Company's competing for public favor, and thus tend greatly to promote the general interests of the community.

The following extract, which Mr. Mortimer is kindly permitted to publish, is from the letter of a relative of Dr. Wolfe, of this city, now residing in the United States:

"Find out if the Express charges are too high, and if not, arrange with Mortimer to let you have a box of the bottles of CHOLERA MIXTURE, I could make a good little fortune with them. The bottle I brought with me here brought two ladies round from decided cholera; one on board the boat, and the other in Berlin, United States. Both commenced with diarrhœa, then with dysentery, and then vomiting. The one at Berlin was very bad. I gave her three doses of the Cholera Mixture, the third of which stopped the vomiting. The next day she was all right, or nearly so. She was very grateful. I have now only a little left."

VALUABLE FARMS FOR SALE.—Lot 21 in the 3rd Concession, Gloucester, Ottawa Front, 200 acres, about 80 cleared and under cultivation, with comfortable Dwelling and good Barn. The bush land is principally hardwood, and very valuable from its proximity to Ottawa. Also, Lot 20, in 3rd Concession, Gloucester, Ottawa Front, containing 200 acres, 20 acres cleared. The remainder of this lot is heavily wooded with hard and soft wood. These farms will be sold separately or together as may be desired. The short distance of only 3 miles from Ottawa makes the wood of greater value. These lands are well watered, of excellent soil, and would make a fine dairy farm. Apply to the Proprietor, C.
