Mothers Read This!—Holloway's Worm Lozenges are a certain and safe remedy for Worms in Children and Adults.—As it is a well-known and melancholy fact that one great cause of death among children is from Worms alone, it cannot be too deeply impressed upon the minds of parents the necessity of closely watching their children. By so doing; and understanding the symptoms and true cause of the disease thousands of children might be saved from early graves. SYMPTOMS OF WORMS.—The following are a few of the very numerous symptoms and diseases which are caused by Worms: deranged appetite, emaciated extremities, offensive breath frequent picking at the nose, grinding of the teeth during sleep, hardness of the belly, with frequent slimy stools, and sometimes convulsive fits; itching of the arms, pain in the head and stomach, unquiet sleep, faintings, tremblings, coughs, indigestion, low spirits, frightful dreams, and a gradual wasting away of flesh.
They are palatable and self-administered to the child—drive out the worms thoroughly without pain and completely cleanse the stomach—thereby doing away with the necessity of administering Castor Oil or other unpleasant cathartics—as in the use of other Worms.
Each box contains the fac-simile signature of NORTHROP & LYMAN, Newcastle, C.W., who are he sole proprietors.
N.B. Ask for *Holloway's Worm Lozenges* and take no other. Sold by all the druggists in Ottawa, and medicine deals every where. 578y

Mothers! Mothers! Mothers!—Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of Mrs. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it: there is no mistake about it. There is not a mother on earth who has ever used it, who will not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Price 25 cents. Sold everywhere. Be sure to call for "MRS. WINSLOW'S SOOTHING SYRUP." Having the *fac-simile* of "Curtis & Perkins" on the outside wrapper. All others are base imitations

ENGLAND AND AMERICA.

A Call for English "Public Opinion" Against America's Demands—Is Grant Determined to "Pick a Quarrel" with England?

From the London Times, May 7.

In republics as much as in monarchies the responsibility of national relations—of peace and war—must of necessity rest in a great degree with the rulers. It is not merely that demagogues like Mr. Sumner exert a dangerous power of misguidance; but it is possible for governments to assume positions from which national pride may render it difficult to retreat. The only means of averting such a peril is to render it plain from the first what the consequence of such conduct would be; and for this reason it may be of great consequence at this juncture that the public opinion of England should be firmly declared on the points raised by Mr. Sumner's speech. The Americans may be assured that Englishmen would be unanimous in refusing so much as to entertain such demands. We can well understand that they are purposely put in there most extravagant form, on the plan of asking more than you expect to obtain. But it is the principle of the demands to which we must refuse to listen. They involve nothing less than a claim that the Americans shall be the judges in their own cause—that they shall be the arbiters of international right and wrong when ever it affects themselves. We never pretended to please the Americans in this matter. We endeavoured to do whatever was just between them, our own people, and the other nations of the world. We refuse to compromise our honour by admitting that we were actuated by any other motive. Whether or not we were culpably negligent in performing what we believe to have been our duty is a point we have offered to submit to arbitration. But further we cannot go and we could not but regard any attempts to force us beyond this point as a cloak for ulterior designs. After all, however, we return to our conviction that, unless there be a settled design to pick a quarrel with us—which there certainly is not on the part of the American people—Mr. Sumner's policy is too preposterous to be entertained. The attempt to reawaken buried animosities is, indeed, little short of criminal; but the extravagant misrepresentations found necessary for the purpose afford us no slight assurance of the destined failure of the attempt.

English Patience has Limits.

From the Saturday Review.

The people of the United States should understand that English patience, unexhausted by any amount of vituperation, has its limits where language passes into action. If the impending danger is to be noticed at all, there would be little advantage in substituting fanciful risks for the practical object which must be contemplated by those who wish to force a quarrel. Mr. Sumner, who is not the less a man of great ability because he shows himself the implacable enemy of England, cannot be suspected of having really hoped to extort a confession of error, and a payment of half the cost of the civil war. His speech, if it is translated into diplomatic documents, will be altered into the demand of territorial cession, which has already been started by Mr. Chandler.

DIAMONDS AT THE CAPE.

Advices received in London from the Cape announce the finding of another diamond much larger than any yet met with in the colony. The following particulars are from a letter received by Messrs. Goodliffe & Smart from their correspondents at Cape Town, dated 31st of March:—"The news will reach you by this opportunity of the finding of the large diamond—our Cape 'Koh-i-noor'—valued at £32,000. There is no delusion in this, as in the gold fields, so you may believe it implicitly. This diamond was found near the orange River, in the diamond territory, was bought of a native doctor for 500 sheep and a few cattle, by Mr. Neikerk, a Dutchman, who again resold it to Messrs. Lillenfield, of Hope Town, for £11,200, and it is now on its way to Algoa Bay. We need hardly say that this news, confirmed by the Civil Commissioner to our Colonial Secretary, has caused great excitement here, as there can be know doubt of the immense wealth of this diamond country. What would a systematic search effect, when over forty diamonds have now been found, chiefly by natives?"

Letters from Fort Hayes, in Kansas, give an account of the killing of some Indians who were in confinement in that place. The chiefs were ordered to remove, in charge of a guard, from the corral to the guard-room, when they gathered in their tents, began the death-whoop, and taking out their knives, immediately attacked the soldiers. "Cardigon attacked the sergeant of the guard, and was knocked senseless by a blow with the butt of a musket. "Sallie," a ferocious squaw, wielding a knife tried to sheath it in the body of an officer, when one of the guard shot her dead. "Big-Head" looked with scorn on the circle of bayonets surrounding him, and stabbed Sergeant Hazen, dangerously wounding him in the back. One of the guard shot him dead. "Dull-knife" tried to stab everybody near him, and he was pricked severely by bayonets. He and the senseless Cardigon were then disarmed and placed in the guard-room.

SCIENCE RUN MAD.—The *Lancet* quotes from certain medical journals published in Berlin an account of certain ugly experiments recently made in that city by Dr. Von Trautvetter. After operating upon a number of dead bodies, the learned doctor selected for further experiment a woman of twenty-eight, almost in *articulo mortis* from "cavities in the lungs," and proceeded to subject her to an experiment far too horrible to detail. The patient died an hour afterward, "whether from the progress of the disease or the effects of the experiment is not clear." How would Dr. Von Trautvetter have liked it if, after he got through with this experiment, he himself had been operated upon—by Jack Ketch,?

MILITARY COLONIZATION FOR NEW ZEALAND.

A project for the establishment of military industrial settlement in New Zealand is, the Pall Mall *Gazette* understands, now under the consideration of the Government, which, our contemporary says, seems peculiarly adapted to the present exigencies both of the mother country and the colony. The project before the Government is, in a few words, substantially as follows:—It is proposed to establish a small colony, or rather several small colonies, on the frontiers of such portions of the north island as are most in danger of inroads from hostile natives, these colonies to be at once industrial and military, "containing within themselves all the necessary force requisite alike for their own defence, and therefore also for that of existing British settlements in their rear; the force to be under the orders of the local Government, and capable of co-operating with other forces in the event of any serious outbreak in their neighbourhood." The proposed colony would be composed half of soldiers who have seen five years' service in the army, and half of young men from the artizan and agricultural classes, the whole body being enlisted for five years, and commanded by officers selected from the army and militia. Each colonist would have a grant of land according to his rank. For the first year pay and rations would be allowed. For the second year rations only, except for such periods as the men would be under arms, when they would be entitled to pay as before. After the second year there would be no pay or rations at all, except during active military service. Moderate advances would be made on the security of the land, and repayable by easy instalments over a number of years, for the purpose of enabling the settlers to cultivate their holdings effectually. At the expiration of the five years' enlistment each man would be a freeholder of the land alloted to him, provided he had brought a certain portion into cultivation. In the case of protracted military service, unfavourable seasons, &c., the period allowed for the fulfilment of this condition might be extended. Mr. W. Fitzherbert, Colonial Treasurer of New Zealand, when recently in this country, expressed his cordial approval of the scheme as well devised and adapted for New Zealand.

London letters mention a new telegraph scheme from Havana to Porto Rico, and thence through a chain of the West India Islands to South America. The company has the exclusive privilege for landing cables in Cuba and Porto Rico for forty years and subsides for ten years, amounting to over $70,000 annually.
