Ayer's Cherry Pectoral, For Diseases of the Throat and Lungs, such as Coughs, Colds, Whooping Cough, Bronchitis, Asthme,

upon the confidence of mankind, as this excellent remedy for pulmonary complaints. Through a long series of years, and among most of the races of men it has risen higher and higher in their estimation, as it has become better known. Its uniform character and power to cure the various affections of the lungs and throat, have made it known as a reliable protector against them. While adapted to milder forms of disease and to young chifdren, it is at the same time the most effectual remedy that can be given for inclpient consumption, and the dangerous affections of the throat and lungs. As a provision against sudden attacks of Cromp, it should be kept on hard in every family, and indeed as all are sometimes subject to colds and coughs, all should be provided with this antidote for them.

Although settled Consumption is thought incurable, still great numbers of cases where the disease seemed settled, have been completely cured, and the patient restored to sound bealth by the Cherry Pectoral. So complete is its mastery over the disorders of the Lungs and Throat, that the most obstinate of them yield to it. When nothing else could reach them, under the Cherry Pectoral they subside and disappear.

Singers and Public Speakers find great protection from it.

Asthma is always relieved and often wholly

Cherry Pectarat in small and frequent doses.

So generally are its virtues known that we need not publish the certificates of them here, or do more than assure the public that its qualities are fully maintained.

without a parallel in the history of Ague medicine.
Our pride is gratified by the scknowledgments we receive of the radical cures effected in obstinate cases, and where other remedies had wholly failed. For Bilious Disorders and Liver Complaints, it is an escalent remedy, producing many truly remarkable cures, where other medicines had failed.

Prepared by Dr. J. C. Aver & Co., Practical and Analytical Chemists, Lowell, Mass., and sold all round the world.

Ottawa, August 17, 1869.

Perhaps no one medi-eine is so universally re-quired by everybody as a cathartic, nor was ever

Pill. The obvious reason is, that it is a more reliable and far more effectual remedy than any other. Those who have not, know that it cures their neighbors and friends, and all know that what it does once it does always—that it never fails through any fault or neglect of its composition. We have thousands upon thousands of certificates of their remarkable cures of the following complaints, but such cures are known in every neighborhood, and we need not publish them. Adapted to all ages and conditions in all climates; sontaining neither calcural of any deleterious drug, they may be taken with safety by anybody. Their sugar coating preserves them ever fresh and makes them pleasant to take, while being purely vegetable no harm can arise from their use in any quantity.

They operate by their powerful influence on the internal viscers to purify the blood and stimulate it into healthy action—remove the obstructions of the body, restoring their irregular action to health, and by correcting, wherever they exist, such derangements as are the first origin of disease.

Minute directions are given in the wrapper on the boz, for the following complaints, which these Pills rapidly cure:—

dose is generally required.

For Ethenmatism, Gout, Gravel, Palpitation of the Heart, Pain in the Side.

Back and Loins, they should be continuously laten, as required, to change the diseased action of the system. With such change those complaint

bowels into healthy action, restores the appetite, and invigorates the system. Hence it is often advantageous where no serious derangement exists. One who feels tolerably well, often finds that a dose of these Pills makes him feel decidedly better, from

PRICE-5 CENTS THE BRITISH GARVEST.

The Mark Lane Express of the 30th ult, has the following with regard to the

harvest in England :-He was very large and massive in "The week opened with a most brilfigure, and finely proportioned. He mea- liant day, and such has continued from sured six feet and two inches in height, its commencement to the close, sunny week has been favoarable for harvest

tarmers in this neighbourhood to make The consideration of his manner and good progress. A few more fine days Shiloh, upon which he depended so much has already been stacked in fine conmediate neighbourhood to proce I rapidly and striking manhood for those to dwell yield-two quarters per acre being spoken of in several places. Several tion of which is gathering in, but with a week of continued fine weather the greater portion would be housed in useful order. The quality generally is not spoken of favourably by g swers, being small, harsh and bad in colour.' On Thursday, from Suffolk, our advices ran thus: We have pleasure at least to report a week of real harvest weather fine and hot. Farmers have taken ad vantage of it, and a great quantity of wheat has been secured in good condition still there are a great many samples of new wheat offering quite out of condition and unfit for present use, From the now having most magnificent weather,

THE WAIST OF THE PERIOD .- The themselves with their feet in order to keep from being jolted around promisenous ly while the galloping was going on. This fast traveling is rather startling to participants, no doubt; but it has one recommendation—the employers are wide awake and on the alert all the time, and this is not always the case on slower trains.

The matter is one that 'is day the sentiments by which we are animated. Let us celebrate worthily this centenary, in affirming our fidelity to the sovereign set over us by the will of the people, tended to increase it."
