FIRST LOVE.

Saturday Review. It is one of the oddest points of differalphabet of her affections is without any distinct end or beginning; she mounts by insensible gradations from dolls and kittens and pet brothers to the zenith of passion, to descend by the same insensible gradations from the zenith of passion through pet brothers to tabby cats. There is no such event as a first kiss forms in a boy's life to mark for woman the transition from girlhood to the sudden maturity of passion; she has been

kissing and purring and fondling and petting from her cradle, and she will pet and fondle and purr and kiss to her grave. Love, in the technical sense of the word, is with her little more than an intensifying of her ordinary life. There is no new picture, but the colours are for the while a little heightened and the tone raised. Presently the vividness of colour will fade again, and the cool greys lower the tone, and the passion of ers representing the leading papers were many of our readers will remember as life will have died away. CANADA LIPE ASSURANCE.

The recent failure of one of the largest Assurance Companies in England has been very generally commented upon by the public press. A sort of distrust has sprung up among the people as to the stability of Insurance Companies in general, and in some cases the agitation has bordered upon a panie similar to what takes place in our banking institutions when one of the oldest firms unexpectedly collapses. This anxiety in Canada has been increased by announcement by the last English mail. that-another large office in England has failed, having at the time many millions When the Ryan expedition was about of assurances. With this view, they placed the accounts of the company in the hands of Mr. Elizur Wright, of Boston, late Insurance Commissioner for the State of Massachusetts, whose entire independence of the company, and high professional character, would give the greatest weight to any opinion be might offer. Mr. Wright, it seems, has made a careful valuation of every policy and annuity obligation of the company basing his calculations upon the net or pure premiums only, entirely disregarding as a source of income the margin or loading for expenses. As the result of such a severe examination, he reports a most satisfactory condition of things, from which it is shown that the company has large surplus funds available for distribution as profit next year, along with what this year may add to it. This is highly gratifying to the directors of the company themselves, and must tend very largely to increase the confidence of the public at large. With such a company there can be little risk; on the other hand there is the prospect of great
