A DESPATCH was received from Hon. Mr. the contrast between position, name and Howk yesterday, dated at St. Paul, Minn. services of the principal opposing candidates Mr. Howe says he would leave that morning cannot fail to impress everybody who is (1st Nov.) by boat down to the river to present. On the one hand a distinguished Prarie Du Chien, thence by rail through and well tried public servant, honoured at Special to THE TIMES. Chicago to Oswego, by boat to Kingsten and home and abroad with a long record of valuwould probably reach Ottawa in a week or able and brilliant services which have gainten days.

IT appears that there is some probability of a short season of quiet succeeding the anarchy which had almost become chronic in Spain. Madrid despatches state that at a meeting of the different parties at that capital, the Drug of Genoa was selected to fill the vacant throne by a majority of 122 to 44. The majority would seem to be sufficiently st ong to secure the King elect a sufe seat upon the throne for some years at least, and if it be correct, as stated, that the Liberal Pogressive party has acquiesced in the selection, the most dangerous element in the State may reasonably be judged to be quieted. The report says that the meeting was a stormy one, despite the endeavours of equal confidence that his majority. will PRIM to secure union in their choice; but it is to be hoped that as a decisive election has | ed lesson to all the young political sprigs in been made, the Government will now be able the country, who can find no better employto turn its attention towards the development of the material resources of the country, which have been so long neglected, and to the amelioration of the condition of the peasant class, which is described by all observers as being lamentably ignorant and depressed, socially and politically.

THE Times comments editorially upon Secretary Bourwell's advocacy of paying the United States debt in gold, considering the very necessity of such advocacy as a proof of the strength of the repudiators. Any observations, however, of the course of American politics during the last year will show that the danger of an adoption of the repudiation policy by Congress has passed away. The leading Democrats who put that space should be covered, but an excuse for plank in their platform have been defeated that will be recognised in the necessity of all over the country, and ANDY JOHNSON's rejection by Tennessee the other day is about the worst blow the party has yet received' There is no doubt that if it had gone into the Senate, he would have brought up the question with all the vigour and obstinacy which | dancing they might as well attempt to extort distinguishes him; not that he would have been able to carry his point, but that even other day for enjoyment but Sundays, and no the attempt would have have had an anpleasantly marked effect upon the finances of the country. When experinents are made at Tegal, Prussia, if the shell does not burst immediately the socalled ball thieves rush out of their cover in the neighbourhood, seize the shell, knock off the leaden coating with a few sharp blows with a chisel, and make of with their booty. Sentries are posted near the line of flight, but they often fail in catching the depredators, who regardless of danger, place themselves just where the shell is expected to fall. the shell is a large one, the value of the lead is very considerable. If it is a small one, the thieves carry it off bodily, and perform their dangerous manipulations at their leisure.
