Guyot's tar possesses all the advantages of ordinary tar water without any of its drawbacks. A glass of excellent tar water without any disagreeable taste may be instantaneously obtained by pouring a teaspoonful into a glass of water. Any one can thus prepare his glass of tar water at the moment he requires it, thus economizing time, facilitating carriage, and obviating the disagreeable necessity of handling tar. From the New York World. It has been the pleasing custom poets to compare woman to a clinging tendril upon the trunk of man. And certainly the tragedy whereby Mrs. Mills seems to have been done to death in Brooklyn on Saturday night exhibits her in that touching and remantic capacity. Shakespeare assures us that

the camomile, the more it is trodden " on the faster it grows;" and the camomile is but a type of Mrs. Mills, For Mr. Mills, it appears, was habitually hostile to his wives, and had, to the immediate knowledge of the present Mrs. Mills, removed a former Mrs. Mills from this earthly scene by the murderous medium of a black bottle. That a woman who had not only been cognizant of such a performance as this but who had been a witness to it, and prison on account of it, should subsequent in- ly be induced to occupy the place of the Mrs. Mills, with the expectation, which she must have cherished of living in a continual avalanche of bootjacks and and black bottles, and in the imminence of hatchets and razors, is certainly a fact

to be meditated by the student of morbid psychology. But that this woman did so is unquestionable. So bent was she upon marrying the man that she not only married him in spite of the monitory irregularity of the previous disability for fresh adventure i
