Probably never before in the whole history of medicine, has anything won so widely and so deeply upon the confidence of mankind, as this excellent femedy for pulmonary complaints. Through a long series of years, and among most of the races of men it has risen higher and higher in their estima-tion, as it has become better known. Its uniform character and power to cure the various affections of the lungs and throat, have made it known as a reliable protector against them. be kept on hand in every family, and indeed as all
are sometimes subject to colds and coughs, all
should be provided with this antidote for them.

Although settled Consumption is thought incurable, still great numbers of cases where the discase seemed settled, have been completely cured,
