two lated and published in French.

NOT AT ALL DISCONTENTED. There could not possibly be a greater misdue process of time, Canada may be no longer a depen lency of Great Britain, the people of this Dominion are discontented. There is nothing whatever to produce discontent in Canada at present. Bread is cheap, business is good, and the only genuine political grievand has been removed. It was the silver popular measures. There is not a "cry' country believes that some protection ought to be obtained against the United States manufseturer, and that fishing should not be their exclusiveness, as regards foreigners, a source of annoyance, but here, there is no complaint at all in respect of measures, but only a sad grumbling about men in office. The lament of the opposition journals is that different members of the Ministry are somewhat jealous of each other. Two of the leading grumbling exponents of public opinion seem literally to regret that Sir George Cartier and Sir John A. Macdonald and Mr. Tilley and Mr. Howe do not pull more harmoniously together. The Hamilton Ecening Times, following the example of the Globe, deplores the constrained subserviency of Sir John A. Macdonald to Sir George E. Cartier, regrets that Mr. Tilley should have so few supporters, and speaks of Mr. Howe as the most effete specimen of houry headed statesmassinp this country has ever witnessed. That organ of a discontent, non-existent among the people, goes further, and declares that the Hon. Joseph Hove is "weak, vain, egotistic prosy, gesticulative, inaudible, a superannuated beau, and an intolerable humbug." This is a fair specimen of the among the people, and the New York Albion who, by the way, compliments Sir Alexande Gal, and Mr Huntington as the champs no dently states that it has been the mist rtune ben men of nerrow views. This exponent of English feeling in New York goes still further and states that the great mass of the British American people, in and out of the Dominion, not sat sfled with Confederation, hing for a equivalent for the ben-fit reaped, is simply system which shall give them more of a na- pangulous. How, on the other hand, have dependency of the Crown, however great an ! tective tariff imposed upon Dominion proprosperous and practically independent. This duce? During the time the Treaty was in fireis not true. There is not a journal to the four people never for one moment imaginal Domination in which such dissatisfaction is ex- that a nation whose prosperty was pressed. The Parliament of Canada does obvious to the world, would fall back upon not represent any such dissatisfaction.
