ALF LABARRAQUE & CO.

Approved by Imperial Academy of Medicine.

QUININIUM—LABARRAQUE,

By Imperial Academy of Medicine.

The QUININIUM LABARRAQUE is an eminent tonic and shrub wine, destined to replace all the other preparations of Peruvian bark.

The bark wine usually employed in medicine is not so strong as to which they possess the desired properties. Besides, owing to the manner in which they are prepared, these wines are not so strong as the Quininium, nor are they of active principles and these always in variable proportions.

The QUININIUM LABARRAQUE is approved by the Academy of Medicine, contained, on the contrary, a mixture of determined composition rich in active principles, and on which the physician can rely.

The QUININIUM LABARRAQUE is prescribed with great success for persons of weak constitution, or those debilitated by various exhausting diseases, especially those who have suffered by too rapid growth for young girls whose development takes place with difficulty; for women in child birth; and for aged persons who have lost their vivacity. It is the best preventive against fevers.

In cases of tertian, ague, or gout, this wine is a powerful analgesic, and sometimes, in conjunction, for example, with VALLET'S PILLS, the rapidity of its action is really marvellous.
