MANAGING DIRECTOR, HUGH BAINES, Esq., & E. BROKERS:

Messrs, CAMIBELL & CASSELLS, Toronto. This Company has been projected for the purcose of co strucing cars of all classes (passenger and freight) and to lease and sell the same, also to contract for building according to the specifications of Railway Companies, and to manufacture from the raw material the requisites for their completion, viz; Axles, Wheels and Springs.

As a rule Car Building Companies in Canada are at present purchasing their axles, wheels and are at present purchasing their axles, wheels and It is believed that there are no works for axle making in the Province of Ontario; scrap iron for making axies for our Hallroads is daily purchased in Toronto, and carried to Buffalo, paying duty and freight both ways, amounting in the

States, it is well known that a large number of cars now running over our failways are American built. This is principally owing to their being no car building shops sufficiently large and conducted on grinciples which will most the requirements of the different Railway Companies.

It is also well-known that at present the freight passing over the lines of the existing Railways so far exceeds the carrying capacity of the cars owned and leased by those Railways, that frequently goods are detayed for many days before they can be forwarded to their destination. The projectors of the Canada Car Company, having ascertained the above facts, resolved that the car manufacturing capability of Canada was not sufficiently utilized, and that the car shops were most implequate to the present requirements of the exising rowls, leaving aside what must be the demand arising from the Railways the country, if Car Building Companies of an ex-tensive character are not established.

So favorably has the project of establishing Car Manufacturing Company in Toronto been re-ceived by some of our most wealthy and influen-tial men of business, believing, as they express themselves, that the time of its inception is so well ch sen, and that great advantages are cer-tain to accrue to the locality of its choice, and the Dominion at large, from the promotion of such works, that, within a period of a few days from its origination, enough capital was promised to be subscribed, to warrant an application for "Letters Patent" for the "Canada Car Company (limited)," under the "Joint Stock Act," and to secure the "Toronto Steel Works" property for the Canada Car Company's Works, after infor the Canada Car Company's Works, after inspecting, and having the same valued by Frank Shanly, Esq., C. E., Toronto.

This Property is most eligibly situated for the purpose of Car Building, it being contiguous, and connected by side tracks to the Railway System of Canada, with Buildings, Wells, Tanks and Machinery, &c., well adapted for the commencement of Car Building.

The gentlemen forming the Steel Works Company, on hearing the intention of the projectors

pany, on hearing the intention of the projectors of the Canada Car Company, viz: that of converting their property in Car, Axia and Wheel Shops, expressed their confidence in the undertaking by offering to take stock for the value of their works, and signifying their willingness to subscribe for additional stock in the Company. The Company has secured the services of an emicently practical Manager.

It is intended to apply for a Special Act next Session of Parliament, and increase the capital to \$2,000,000. First issue of stock, \$250,000,—of which ten per cent is payable when stock book is closed. All particulars can be had on application to the
