These periodicals constitute a wonderful miscellany of modern thought, research, and criticism. The cream of all European books worth reviewing is found here and they treat of the leading events of the world in masterly articles written by men who have special knowledge of the matters treated. The American Publishers urge upon all intelligent readers in this country a liberal support of the Reprints which they have so long and so cheaply furnished, feeling sure that no expenditure to literary matter will yield so rich a return as that required for a subscription to these the LEADING PERIODICALS OF GREAT BRITAIN.
