BOARD AND LODGING.—Two gentlemen can obtain accommodated with good board and comfortable lodging at Mrs. McINTYRE'S, corner Hough and Maria streets.

CHALYBEATE WATERS.

The Celebrated Mineral Water, which has been so highly used in this City during the past season, has proved the best cure for Kidney Disease and Dyspepsia ever known, is now for sale at H. F. Dupuis' Drug Store, Chaudiere, Ottawa, and at Dr. Carmichael's, Lower Town.

1874. 3678-3m

THE OTTAWA.

(From Blackwell's "Water Highways.")

The Ottawa is a magnificent river, having three points of confluence with the St. Lawrence: one passing by Vaudreuil, entering at the foot of the Cascade Rapids, another by St. Anne's, at the upper part of Lake St. Louis, about twenty-four miles above Montreal, and the third opposite Varennes, thirty miles below that city. The northern stream (which flows to the north, and thus insulates the district of Montreal), bifurcates near the village of St. Eustache, and further insulates the district of Laval, known by the name of Isle of Jesus. The two re-uniting once more, close to the lower confluence with the St. Lawrence, both branches of the river pour down their brown, peaty-coloured waters, and stain the north-west side of the St. Lawrence nearly into Lake St. Peter, the blending there being favoured by the various currents induced by the low alluvial islands occupying the river, which is about six miles wide (between Sorel and Berthier).

From St. Anne's passing up the Ottawa, we pursue an almost westerly course to Ottawa, one hundred and ten miles above Montreal, where the Fall known as the "Chaudierre" interrupts the navigation; the Fall itself, with six miles of rapid water above it, having a total descent of sixty-seven feet.

In that part of the river now described, the Ottawa receives many very important affluents from the northern side, draining the front and vast plateau in rear of the Laurentian Hills. The chief of these are the "Du Lievre," and the "Gautineau," the latter joining close to the town of Ottawa, and having its sources as far north as the forty-eighth parrallel, its head waters lying closely contiguous to the head waters of the St. Maurice and the Saguenay. A very limited extent of settlement has been carried out in this direction, and the region is comparatively unexplored and unknown,—still less surveyed; although those who have crossed it in various directions report it as being filled with uncounted lakes, which regulate the annual supply to the rivers of the whole of this vast region.

The affluents on the south side are the Petite Nation, and the Rideau Rivers, the head waters of the former draining back into the country, within nine miles of the main stream of the St. Lawrence, at Prescott, where its head water is forty nine feet above it, and about ninety feet above its confluence with the Ottawa. The line of the main channel of this small stream extends its tortuous course through deep alluvial soil, for upwards of a hundred miles, passing through and producing swamps which have the same effect, to a certain extent, as the lakes on the northern side. The Rideau River has proportionately a very large drainage area, filled with lakes and streams flowing chiefly from, and determined in outline by the outerop of the Laurentian formation, which has been described as sweeping down from the Chats Falls to the Thousand Isles, near Kingston.

Above Ottawa there is rapid water extending for upwards of six miles, and from this point the stream, although less direct, passes on in the direction of the north-west, over and through a wilder country of the Laurentian Hills, with heavy forests of pine and other timber extending down to its very margin. The irregular and tortuous channel, swelling occasionally into deep, wide lakes, terminates immediately above Allumette Island; and from this point the river, taking a slight bend once more in a west-north-west direction, pursues its course through a series of long reaches, separated from one another by short, abrupt falls or rapids, with a tolerably uniform width and depth, as far as the affluence of the Mattawan; then turning to a direction almost northward, it is described as terminating in a series of lakes, the largest of which, in the direct course of the river, is "Temiscaming," "Tamagaminque," and "Grand Lake," the one lying some distance to the west, and the other about as far to the east of Temiscaming, pouring their waters into it by the "Montreal" and "Moose" Rivers respectively, and the drainage occupying the whole district lying as far north as the forty-ninth parallel, and generally separated from the drainage into the river below Ottawa by the meridian of seventy-six and a half degrees. The affluents upon both sides of the river, for the portion west of Ottawa, are much more numerous, and are all very much smaller than the streams previously mentioned. On the north side they consist of the "Colonge," uniting close to Portage du Fort, the "Du Moine," the "Bear," and the "Kippeway." On the south side, the chief of these streams are the Missisippi, the Madawaska, the Bonne Chere, the Petawawee, and the Mattawan. These drain a vast extent of Laurentian formation, covered for the most part with heavy pine timber, the district of the chief lumbering operations in Canada at the present moment. The country is very much broken, and the bottoms of its valleys and creeks are occupied by numerous streamlets and lakes lying at elevations extending up to fourteen hundred feet above tidewater; at which elevations may be found the sources of the stream last mentioned, draining into the Ottawa, and the head waters of the Maganatawan, flowing into Lake Huron.

One tributary, on the right bank of the river, unites with the main Ottawa, at Mattawan, the point of northern divergence just mentioned; and it is important as being the favorite route of early voyageurs in their journeys to Lake Huron and Lake Superior. Starting from the Hudson's Bay Post, at its confluence with the river, the Mattawan is traceable in a course generally westerly, through five or six small lakes, terminating in Trout Lake, which is the head of the drainage in this direction, and about six hundred and fifty-nine feet above the sea.

Among the various schemes which have been proposed for the improvement of the navigation between the upper lakes and the Atlantic, that of Mr. Shanly, which is gaining (and perhaps deservedly) the most favour, is one which proposed, after improving the River Ottawa, up to the mouth of the Mattawan, to follow the line of this tributary up to its head water in the Trout Lake. From this point it is proposed to lock down into Lake Nipissing, which is only about twenty-three feet below it, through the valley of the "Vase." Lake Nipissing, which receives the drainage of the "Sturgeon," the "Namaniiigung," and other rivers, with that of numerous lakes, at their several head waters, communicates with the Georgian Bay, through French River, the length of the river being about sixty miles, and the descent, effected in a series of weir-like falls, sixty-four feet.

The entire distance from the Georgian Bay to Montreal, by the route which has now been described (and which, of course, includes improvements of the river to overcome the falls at Ottawa, the Chats, and other points of interruption, as well as the reconstruction of the small canal near Carillon and Grenville), being four hundred and thrity miles,—the lockage upwards from Lake Huron to the summit would be eighty-seven feet, and the fall downwards would be six hundred and nineteen feet, to the harbor of Montreal.

FOWLER'S

FILE AND HUMOR CURE.

For Internal and External Use

WARRANTED A SURE & PERFECT CURE For all kinds of Piles, Leprosy, Scrofula, Tetter or Ring-Worm, Salt Rheum, and all diseases of the Skin.

One Bottle warranted to Cure all cases of Piles; From One to Three Bottles in all Cases of Humours.

This remedy has been faithfully tested and found to be an almost infallible cure for the above named diseases. Its success has been so universal that the Proprietor guarantees a cure to those who will use his medicine, or in case of failure to refund the money. Since it was first introduced he has received many thousands of testimonials, proving its efficacy for the cure of the awful diseases it is recommended for. The File and Humor cure is entirely vegetable in its composition, and can be used in perfect safety in all cases. There is no danger of its driving the humor in, as it cures on the surface, and the patient's bodily health continually improves while under this treatment.

PRICE $1 PER BOTTLE. SOLD BY ALL DRUGGISTS. 3718

Dec. 14, 18

Thomas' Excelsior Electric Oil—Worth Ten times its weight in Gold.

Pain cannot stay where it is used. It is the cheapest medicine ever made. One bottle has cured bronchitis. Fifty cents worth has cured an old standing cough. It positively cures Catarrh, Asthma and Croup. Fifty cents worth has cured crick in the back, and the same quantity a lame back of eight years' standing. The following are extracts from a few of the many letters that have been received from the different parts of Canada, which, we think, should be sufficient to satisfy the most sceptical. J. Collard, of Sparta, Ontario, writes: "Send me six dozen Dr. Thomas' Electric Oil. Have sold all I had from you and want more now. Its cures are truly wonderful." William Maguire, of Franklin, writes: "I have sold all the agent left; it acts like a charm—it was slow at first, but takes splendidly now." H. Cole, of Iona, writes: "Please forward six dozen of Thomas' Electric Oil, I am nearly run out; nothing equals it. It is highly recommended by those who have used it." J. Bedford, Thamesville, writes: "Send at once a further supply of Electric Oil, I have only one bottle left. I never saw anything sell so well, and give such general satisfaction." J. Thompson, Woodford, writes: "Send me some more Electric Oil. I have sold entirely out. Nothing takes like it." Miller & Reed, Ulverton, P. Q., write: "The Electric Oil is getting a great reputation here, and is daily called for. Send us a further supply without delay." Lemoyne, Gibb, & Co., Buckingham, P. Q., write: "Send us one gross Electric Oil. We find it takes well."

Sold by all medicine dealers. Price 50 cents.

S. N. THOMAS, Phelps, N. Y. and NORTHROP & LYMAN, Toronto, Ontario, sole agents for the Dominion.

Note.—*Electric*—Selected and Electrized. 3727

WHOLESALE

Ready-Made

CLOTHING.

HAVING disposed of my Dry-Goods Establishment, I am now giving my personal attention to my Wholesale and Retail Clothing Business. My stock is now ready for inspection, and will be found to compare favourably with any in the market.

Having had a long experience in the Ottawa Trade, I understand its requirements, and have my Clothing manufactured with a view to meet the wants of this market. It is my intention to keep on hand nothing but the best of Goods, both in point of quality and finish; believing as I do, that never in the history of the trade was there such a demand for a first-class article in Ready-made Clothing. I have employed

ONE OF THE BEST CUSTOM CUTTERS

Ever in this section, as Foreman.

He also has a good knowledge of the growing wants of this market. The party to whom I refer is

Mr. GEORGE DIXON

So very favourably known throughout the Ottawa Valley.

This representation is merely mentioned to show that it is my purpose to place in the market a class of Clothing to meet the growing tastes of the public.

Hair Cutting.

THE BURLINGTON

HAIR-CUTTING, DRESSING AND BATH ROOMS,

74 AND 76 SPARKS-ST., OTTAWA.

The Proprietor respectfully informs his numerous patrons that his

New Establishment

is now complete in every department.

Ladies' Entrance—The door nearest O'Connor-St.

His stock of REAL HAIR cannot be surpassed either in quantity or quality. In price he guarantees 25 per cent. less than any house in the Dominion.

For the Gents' Room he has every comfort possible to obtain for money. With five efficient workmen gentlemen will not have to waste their time in waiting at this establishment.

The Manufacturing Department employs seven hands, and with the large amount of room he now has, will be able to meet the increasing demands of his patrons.

For Combings, he begs to say that although his price may seem a little higher in quotation than some others, when ladies take into consideration what they receive for their money, it will be found cheaper to buy their work at this establishment.

T. E. M. also begs to say that he will continue as a system of business, his sale of Magic Photographs for 25cts., both for ladies and gentlemen, which gives the purchaser each time present varying from 25cts to $100.

Perfumes, Cosmetiques, Combs, Brushes, and all Toilet Goods in endless variety.

T. E. MOORE,

Oct. 28, 1874. 2567

Government Notices

Notice to Contractors.

BAIE VERTE CANAL.

INTENDING Contractors are hereby informed that about January next, Tenders will be received for the works connected with the construction of what is called the BAIE VERTE CANAL, to connect the Bay of Fundy and the Gulf of St. Lawrence.

Commencing near the outlet of the River Au Lac, the line follows in a South Easterly direction to a point between Tongue's Island and Fort Cumberland; thence in a nearly direct course along the valley of the Missiquash to a place between Hacmatack Lake, and Miner's Point; thence curving round still further to the South East to the Main Line of the Tidnish River, near Chapell's Farm, where it takes a North Easterly direction to near the mouth of the river, and at or about the Tidnish Head in an Easterly course to deep water in Baie Verte.

The works will be divided into Sections suited to circumstances and the locality.

The outline of the route above indicated will enable Contractors to examine the dry portions of the line before winter sets in, and three parts through bogs after the ground is sufficiently frozen.

To facilitate this examination, a Lithographic map of the locality will be furnished on application by letter, or otherwise to this office.

When plans, specifications, and other documents are prepared, due notice will be given Contractors will then have an opportunity of examining them, and be furnished with Blank Forms of Tender at this office, or at such places as may be designated.

By Order,

F. BRAUN, Secretary.

Department of Public Works, Ottawa, 3rd Nov., 1874.

Notice to Contractors.

LACHINE CANAL ENLARGEMENT.

CONTRACTORS are hereby informed that about January next, Tenders will be received for the execution and completion of the works connected with the enlargement of the present line of the LACHINE CANAL, or for the enlargement of the lower part of it, and the formation of a new line through the low ground on the North West side of the existing channel up to what is called the "Round Oak," thence following a line north of the Village of Lachine, to near Leishman's Point.

The line to be adopted depends in some measure on the arrangements which can be made for the right of way; but the information supplied will enable Contractors to fully examine both routes before winter sets in.

The works are to be let in sections of a length suited to circumstances and the locality.

When plans, specifications, and other documents are prepared, due notice will be given, Contractors will then have an opportunity of examining them, and be provided with Blank Forms of Tender at this Office, or at such other places as may be designated.

By Order,

F. BRAUN, Secretary.

Department of Public Works, Ottawa, 4th Nov., 1874.

MESSRS. COCKBURN, WRIGHT & CLEMOW.

SECRETARY:

pro tem,

R. W. CRUICE, Esq.

This Company has been formed for the purpose of purchasing and working the valuable iron mines situate in the Townships of Templeton and Hull, in the County of Ottawa, and Province of Quebec, called the Haycock Iron Location. The Company holding the power under the Act to "carry on the business of exploring for, mining, "smelting, manufacturing, dealing in and disposing of iron and other ores and metals "and the manufacturing selling dealing in, and disposing of steel workings, or the "products of iron and steel."

The property to be acquired is fully described in the report of the Provincial Mining Engineer, Dr. E. J. Chapman, Professor of Mineralogy and Geology in the University College, Toronto, (Vide prospectus) it may be briefly described as follows:—

1.—SITE AND GENERAL CHARACTER OF THE PROPERTY:—The Haycock Iron Location comprises a compact area of 309 acres of mineral land, and 100 acres of timber land, situated in the Province of Quebec, about eight miles north-east of the City of Ottawa, together with an additional piece of land of 10 acres near the head of navigation on the River Gatineau, as described in the following statement:—

1.—The North half of Lot 1, in the 11th Range of Hull, comprising 100 acres of mineral land.

2.—The adjoining lot 28 (North and South Halves) of the 6th Range of Templeton, comprising 200 acres of mineral land.

3.—The contiguous South half of Lot 27, in the same Range, comprising 100 acres of timber land.

4.—Ten acres in Lot 2, on the 6th Range of Hull, on the left bank of the River Gatineau which has been secured partly to serve as a storing place and loading ground for shipping the ore, but chiefly as a convenient site for the erection of Furnaces. This area is connected with the mineral or iron area proper by a tramway of 6¼ miles in length. This tramway, of three-feet gauge, has been very solidly constructed, and is now in complete working order. It runs for a short distance through the Haycock property, and is then continued along the town line between Hull and Templeton, on to the furnace site on the Gatineau.

In addition to 6¼ miles of tramway in complete running order, with full rights of way from the ore beds to the furnace site and shipping ground on the River Gatineau, the assets of the property include a Steam Sawmill of 20-horse power, 8,000 feet of logs; a Boarding House; Store House; Office; Stables; Powder House, and Blacksmith's Shop. Also a Derrick and other mining plant, tools, &c.; together with about 5,000 tons of raised ore, and 30 tramway cars.

The quantity of the ore, as described by Professor Chapman, is practically inexhaustible, it lies close to the surface and is easily mined, while its quality may be estimated from the fact that *steel has been made direct from the ore.* The fullest particulars of analyses and experiments proving these statements can be had at the Head Office of the Company, and from the Agent at Montreal.

The price to be paid for the purchase of the property is $250,000. One-half in cash, and the balance in fully paid-up shares of the Company, in consideration of which the proprietor will make over the freehold of the estate free from all encumbrances whatsoever.

And further, as a proof of his *bona fides*, and his entire confidence in the prospects of this undertaking,

He will guarantee to the Shareholders a minimum dividend of not less than

TEN PER CENT. PER ANNUM

on the paid-up capital *for three years* from the date of the allotment of shares, and as security for the due payment thereof, he will deposit in the hands of the Company the whole of his paid up shares, and give such further security in cash as may be thought necessary for the carrying out of his guarantee.

The capital will be called up as follows:—

On application	$2 per share	15th April 1875	$5 per share
On allotment	5 "	15th May "	2 "
15th January, 1875	2 "	15th June "	2 "
15th February "	"	15th July "	2 "
15th March "	"	15th August "	2 "
		15th Sept. "	1 "

The share lists will close on the 10th December, 1874, and as the shares will be allotted *pro rata* according to priority, an early application is desirable.

Prospectus and any further information, relative to the Company, can be had on application to the Head Office, or at the Montreal Agents, Messrs. Drummond, Cassels & Co.
