Consequently, in 1770, it became necessary for the Imperial lovernment-even in the first year the place a sum on the imperial estimates to apport a Government in Prince Edward granted up to a comparatively period, when what known as responsible Government was established there. No sooner had the first Local Government been established than some of the very first acts of the Assembly were directed toward an effort to induce the proprietors either to per-form the conditions of their grants or else have them cancelled, that the land might revert to the Crown, Every effort which the people's representatives had made in hat direction had prove l fruitless. In

It was also to be remarked that the hon, seconder of the motion was likewise a proprietor of land. It was therefore satisfactory to know that a charge was coming over the spirit of the ence, they were willing to dispose of their lands, this Government should have no hesitation in permitting measures to remedy the grievance complained of.
