## DELAYING THE WRITS.

The Untario Government are charged by the Mail with having delayed the issue of the writs of election in certain con stituencies, viz.: West Wellington, South Oxford, East Kent and South Essex This delay as alleged is described as shame ful, and a severe lecture, all, for the best to our erring administrators, is freely given. There was a time, and not very long ago, when our contemporary would promptly defend its own friends from the charge of wrong doing when they kept back the writs to serve their partizan pur poses. It is the offender not the offence that constitutes guilt or innocence, as the case may be, in the estimation of the organs of the Conservative party.

We do not care to meet the Mail upon the legal question involved. It may be resumed with safety that the Government, how far soever they may strain the law in order to make it cover their case, will yet keep within its letter. In case they have violated the law, however, we may be quite certain that its penalties can be sued for, and feel equally well assured from our knowledge of the temper of the more prominent oppositionists that if the penalty can be invoked for the illegality of delaying the issue of the writs there will be no negligence in the setting about

If the law has not been violated, and we are not at all convinced that it has then the Government have done precisely what was right in delaying the writs Ever since the first of July the farmers in all the constituencies named have been busily engaged in securing t1 eir crops. They could not spare a day for election purposes, because at this season time emphatically money to them. What object could there be in having elections now, or at any time within the last six weeks, more worthy of being considered than the urgency of securing the crops? age of 1874 consisted of light gold sent in We cannot think of any, nor can our con temporary name one. There is no prob ability of Parliament being obliged to ability of Parliament being obliged to meet before the usual time, and ere that time arrives there will be ample opportion to the colories. The issue comprised the body. They have no religion, no tunity to hold the elections without in any measure interrupting the more urgent operations in the field. The fact that the Government have de-

layed the issue of the write on this ground tells largely in their favour. They have shown thereby their considerateness and forethought They have given evidence of a practical acquaintance with the movement, and the several stages, of our greatest industry. And to whatever extent the faith in them of the Congret a tive organs has been shaken, to a much greater extent assuredly will the faith of the substantial yeomanry be es-
