

Provincial Exhibition.

THIRTIETH ANNUAL FAIR.

THE THIRD DAY.

The third day of the great Fair opened under very auspicious circumstances yesterday. The city from early dawn was thronged, and the successive trains and steamers brought in crowds of visitors. It is estimated that upwards of 35,000 strangers were in the city yesterday, and it is likely that number visited the exhibition grounds. The weather, although disagreeable, was not such a nature as to detract from the success of the exhibition. The various avenues leading to the fair grounds were thronged with masses of people and hundreds of vehicles, thus used in conveying them to and from the grounds. All stages, omnibuses and carriages in the city were called into requisition, and some found full and other suburban villages, to do duty, and in addition to this, thirteen steamers had all they could do on the canal. The judges were engaged the greater part of the day in discharging their somewhat onerous duties, but did not succeed in finishing their work. The prize list is so extensive, and space so limited, that it is utterly impossible to give it in full. The live stock, with the exception of four classes of horses that were unfinished last night, is given in full, and our readers will be pleased to find that Ottawa exhibitors have done nobly in their competition with the great men of the West. The winners of prizes for agricultural implements have been obtained by our reporter and will be published to-morrow.

The implements, without exception, were excellent both as regards manufacture and contrivance. Indeed the whole show yesterday was a grand success—our exhibitor from Montreal declaring it to be the largest he had ever seen, and he had himself been an exhibitor at Toronto, Hamilton, London, Montreal and elsewhere. The Canadian Rubber Company of Montreal has some beautiful samples of their manufactures on exhibition; in one of the wings of the Crystal Palace, such as machine belting, engine hydrant and condensing house, tank and suction hose, pump rubber, rubber tubing, leather cloth insertions, vulcanized rubber, steam packing—an article considered by engineers and machinists as indispensable where steam joints are to be made, as no substance has so much elasticity which stands so high a degree of heat. This packing, it is well mentioned, is warranted to stand at least 500 degrees Fahrenheit. They manufacture also other articles, springs, rubber & leather straps, cables, belts, working, hospital sheeting, wagon covers, wagon covers, springs, sheet rubber, horse covers, hoods, ankle rolls, interfering bands, and many other highly useful and desirable articles. The "India" Cables, etc., etc., are made of the finest quality of rubber and are cotton duck of the greatest possible tensile strength woven expressly for the company, and is preserved from rot and decay by being charged with carbolic acid, while air and moisture from the cotton duck is exhausted by the ends being closed with lead. Their specialties are rubber rolls of all kinds and sizes, used as bladders, airdrop works, for squeezing acids and dyes from yarn, wool, or cloth; scales—scales for the use of the paper miller, India rubber stoppers, an improvement upon cork, and now largely used by chemists and apothecaries; and many other articles. The "India" Cables, India rubber, India, and the company's exhibition of their manufacture in one of the highest of its useful arts is not only a credit themselves but to the Dominion.

SLIDES AND WHEEL CARRIAGES COMPARED.

At the Crystal Palace grounds there is now on exhibition one of the most extraordinary pieces of machinery ever exhibited and exhibited is Mr. H. M. Manderson, Maria Post Office, County of Bonaventure, Province of Quebec, and Mr. Manderson's invention is highly spoken of by the Bonaventure and Magog, and by curators, mayors, magistrates, advocates, registrars, judges, sheriffs, professors, engineers, inventors, residents in the County of Bonaventure. It is a wonderfully ingenious contrivance, which in many parts of the country will be useful in a more than ordinary degree. To use the words of the *Miramichi Advocate*, "It is a vehicle to construct that less than a minute, and without taking the hands off the shafts, it can be changed from a sled to a carriage, or vice versa." The arrangements, however, are so ingeniously contrived, that it promises to be of much practical value, more especially in the southern parts of the Province, and in Ontario, and Nova Scotia. The invention can be applied to any ordinary sleigh, or even a "dog-sled" if you will, and can use any wheels that may have belonging to a wagon or other vehicle." Enclosed is a letter from Mr. Manderson's to his friend, Mr. George Rudd, Finslinc, 2nd, 25, George Rudd, Finslinc, 2nd, 12, William Roden, Harper, Hamilton township. Best 3 year old bull, \$33, George Rudd, Finslinc.

Best 1 year old bull, \$25, George Rudd, Finslinc, 2nd, 15, Hamilton Bros., Hawkesbury. Best bull calf (under one year), \$20, F. W. Stone, Guelph; 2nd, 15, F. W. Stone, Guelph. Best 3 years old, \$25, F. W. Stone, Guelph.

Best 3 years old bull, \$20, F. W. Stone, Guelph.

Best 1 year old heifer, \$15, James Guy, Ottawa.
