These Paperhangings are imported direct from the best Manufacturing Establish ments in England, France and United States. Great care has been taken in their selection with regard to colour. The ground tones are soft and pleasing to the eye, especially those toned with silver mice; but above all they are from the mineral poisons that many of the tawdry-coloured Paperhangings of the day are surcharged with. The Subscriber's long experience as a colourest, and bein thoroughly acquainted with the chemical compound of the pigments used in Painting, enables him to reject, in his selection of Paperhangings, those coloures with poisonous pigments, so deleterious to health. The Public are respectfull invited to examine his STOCK of WALL PAPER before purchasing elsewhers.
