

## Recreation scene

by Ron Marchildon

I would like to thank all those people who are buying 50-50 draw tickets in support of our girls ringette league. This money will go to help supply the girls with sweaters. Your help is much appreciated.

The 'Teen Dances' have been a tremendous success to date. We would like to see more parents sacrifice one evening and come and supervise this worthwhile effort. Your help in this area is also appreciated.

During this past week a yoga program was organized for the senior citizens. This will be a 10 week course held at the Georgian Manor every Tuesday at 2 p.m. There is no charge for this program.

We are very encouraged by the turnout for the Archery Club. If you are at all interested please do not hesitate to attend on Thursday evenings from 6:30 - 9:30 p.m. at Corpus Christi School. Children are included.

Just a reminder that the Winterama Hockey Tournament will be on again this year. Billets are needed

desperately for these children coming into town for that weekend. If you can spare a bed please contact Frances St. Amant at 549-7137.

Ski clinic

## The snowplow turn

by Ron Blanchet

Ski School Director Medonte Mountain

Beginning with the skis facing downhill on a gentle slope, and in the form of a 'V' with the tips about three inches apart, release the edges by turning the knees outward. The body should be centred between the skis, with a slight bend forward at the ankles and knees. To turn, simply apply steering action to the outside or new downhill ski, turning or pivoting into the turn.

Once this has been accomplished, begin to steer in the opposite direction. To stop, increase the plow by pushing the tails of the skis out, thus increasing the edging power. Repeating the snowplow turn will improve the steering action, stability and control of the skis.

Now you can avoid other skiers, lift towers and trees. At this point, you should start using the ski lifts on the more gentle slopes. Advise the lift attendant you will need assistance and he will be most pleased to help.

Ski Jargon  
Many people do not quite understand the true meaning of ski reports. Poor skiing is when there are many bare spots and only a few inches of snow on the slopes.

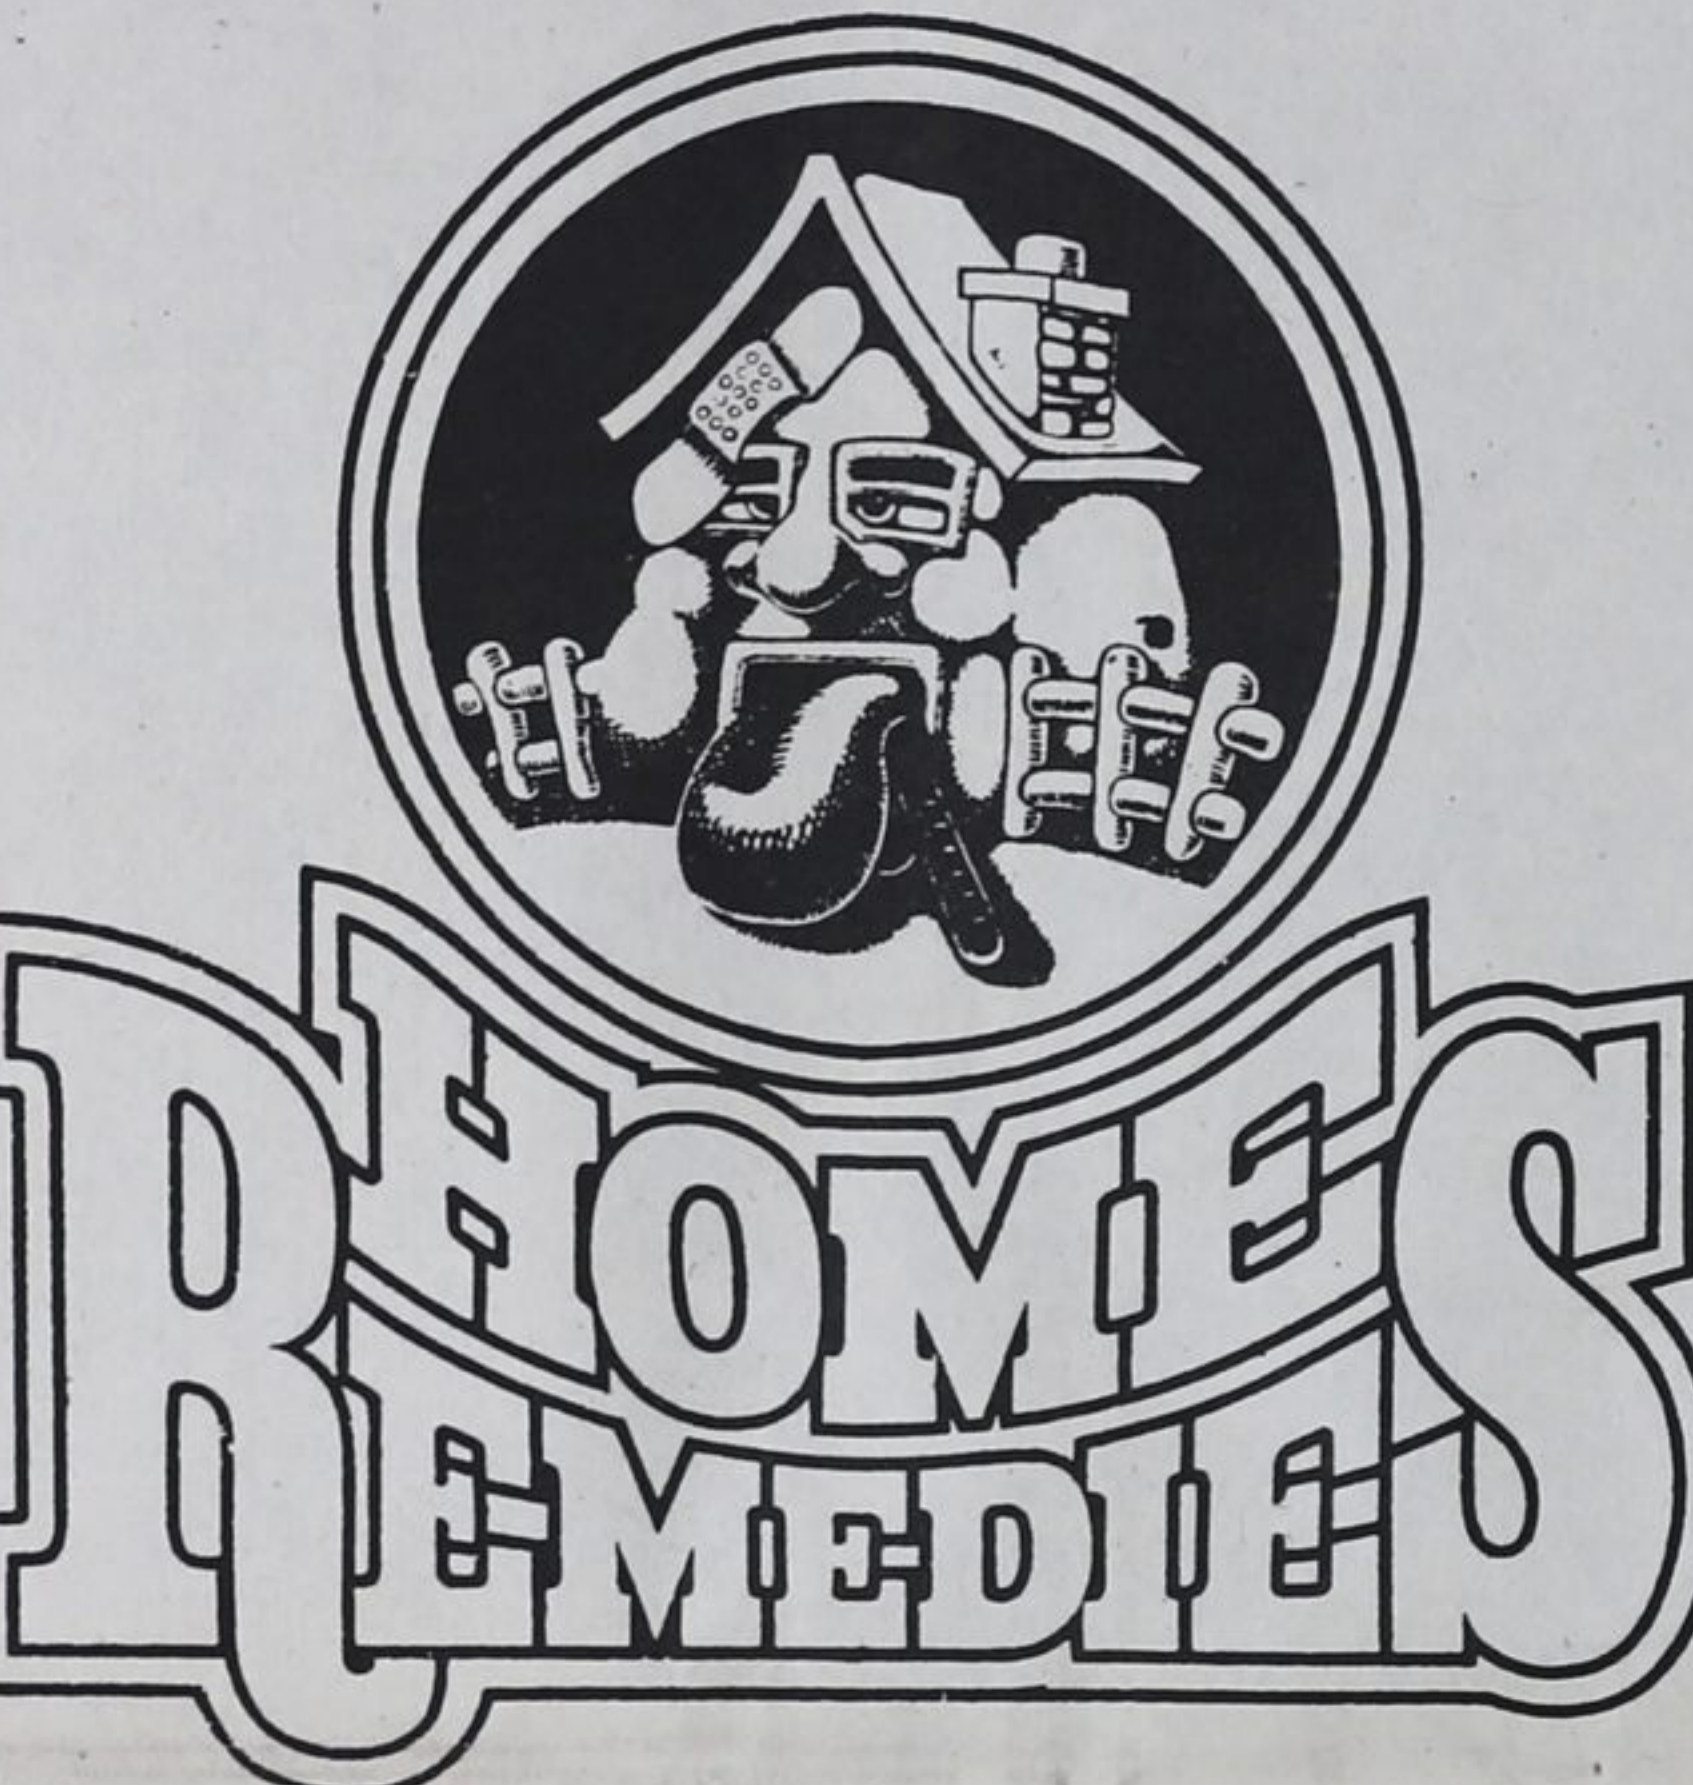

Fair conditions result when there is more snow and fewer bare patches.

Good skiing is what we all hope for. There are no bare spots and there is a good base with new snow.

Moguls are bumps on the hill which often pose difficulties for inexperienced skiers but are a challenge for and expert skiers.

The fall line is an imaginary line, running down the hill. Traversing is a maneuver where the skis are placed parallel and diagonally across the hill. You then ski from one side of the slope to the other. A sitzmark is created when someone falls, leaving an indentation in the snow. This is a hazard because someone may catch a ski tip and have a bad fall, possibly resulting in injury. Always fill in sitzmarks.

Next week, I'll discuss advanced skiing for experts.
