the Berg Split Chute

The most important forward step in durable, efficient barn cleaning since the development of the barn cleaner itself. By eliminating a reverse curve and one corner wheel it reduces wear, tension and adjustment problems and gives you more dependable performance. The return chute is full width for greatest cleaning efficiency. The Berg Split Chute, as well as the Berg Conventional Chute, can be used with any manure stacker or thrower. The new Berg 3-inch flites move a third more liquid and reduce roll-back problems. Write or phone for more details about this exceptional new equipment.

An organizational meeting will be held Thursday April 3 at 7:30 p.m. in the Arena Lounge to form an executive for both boys and girls softball for the coming year. If you are at all interested please come to the meeting and volunteer your services. Coaches, managers umpires, trainers and executive personnel are needed. These people are desperately needed if an active league is to get off the ground this summer.

The Scrap Craft course will be held Saturday, April 12, in the Arena Lounge. Kay St. Amant is the contact person for this course.

The stretch and sew course will be half over by the time you read this but keep in mind that Friday is the bathing suit workshop which you can attend for the one evening for a \$3.00 fee.

A new yoga course will begin Monday, April 7, beginning at 7 p.m. at Burkevale School. Registration forms are available at the town office. Please pick them up and return as soon as possible.

I would like to remind all softball teams wanting to use McGuire Park this summer, that they should send their requirements to me as soon as possible so that a schedule can be worked out.

Medonte Mountain SKI RESORT

Ski clinic

by Ron Blanchet
Ski School Director

The ski season is pretty well over and now it's time to think about storing equipment. Those who have wood skis or wood cored skis should strap the skis base to base, placing a one inch block in the middle. This will assist in maintaining the camber.

Store the skis with the tips resting on a hard dry surface to prevent the tips flattening out.

Be sure to oil or grease all metal parts to avoid rust. Otherwise, toe and heel bindings may seize and require complete

overhauling or replacement next season. Do the same to the steel edges of the skis.

Metal and fibreglass skis should be stored, by placing the ski across the rafters of your basement with the top side facing down and only the tip and tail supported. This will result in the same effect as placing a block of wood between strapped skis.

Clothing is generally stored in moth and mildew proof containers. Repair clothing now, saving time and inconvenience next season. Keep all your ski wear together. This way you won't misplace or lose items.

Air out your ski boots as they have a tendency to retain moisture. If necessary, remove the inner bladder and dry out thoroughly. It prevents mildew and odour.

Keep boots in a press. Most plastic boots today have a steel shank in the base of the sole to prevent warpage, so a boot-press is not imperative in some cases. Place your boots in a cool, dry place. If kept in warm or hot areas, it may affect the shell or padding material of the inner bladder or liner.

To prevent the possibility of leakage, I find it helpful to put ski creams etc., in plastic bags. This way, if something should occur, at least it won't ruin your kit-bag or whatever else is in it.

When you remove the ski rack from the car and find the rubber suction cups have left an undesirable impression on the paint, take some rubbing compound and with a cloth, using rapid motion, remove the discolouration. Afterward, apply car polish or wax to restore the paint.

I'm sure you enjoyed the season, even though it got off to a slow start. I would welcome all readers to write in and express their views on the column as well as suggesting what else they may like to see contained in "Ski Clinic", for next year.
