FIRST AID TIP

TO CONTROL SEVERE BLEEDING

Apply hand pressure to the bleeding part over a dressing if available. If one dressing becomes ineffective, don't remove it - place another over it. Use the casualty shown with the injured part above the level of the heart. Cover opening with a pad of soft material and hold dressing and pad in position with a firm hand. If there is a foreign object embedded in the wound, don't remove it. Removal may cause more serious bleeding. Loosely cover the object with a soft cloth to prevent infection; then apply pressure around the object.
