What are the advantages of a diesel?

There are many advantages in diesel engine operation, such as up to 25% better fuel economy than with gas engines of comparable horsepower, the use of diesel fuel which is traditionally less expensive than unleaded gasoline and traditionally high trade-in values.

Plus, the diesel has a relatively clean exhaust so the engine meets today's exacting emissions standards without the need for many emission control devices. All in all, there are a lot of advantages to owning a diesel-powered automobile.
