

Horse and rider team up to strut their stuff

Tay Twp. gives go-ahead

Subject to Ministry of Transportation and Communications' approval Tay Township councillors last week accepted the quotation in the amount of \$6,075.65 (plus applicable taxes) from Dura Con to supply manholes and catch basins for Waubaushene.

Meanwhile council cleared the way to have Concrete Pipe Company provide \$13,723.95 worth of concrete pipe in Waubaushene's storm drains while McCoy Foundry received the go-ahead to provide frames and grates worth \$4,205 for storm drains in Waubaushene.

Farm Safety Week hints to follow

Learn artificial respiration as it is often the only means of reviving an individual who has been overcome by toxic gases.

The person must be removed from the danger area before artificial respiration is administered.

This is Farm Safety Week. The Canada Safety Council says always wear self-contained breathing equipment before entering a confined space to retrieve an unconscious person.

Use a lifeline to haul the victim out.

Investigations

During June, Penetanguishene town police investigated 316 complaints and assisted other police forces 24 times.

Three cases of shopbreaking and one case of housebreaking were also noted on the department's monthly activity report.

The value of property stolen in the month totalled \$10,730.32; in the same period \$2,297 of property was recovered.

AXIAL-FLOW COMBINES

***Harvest more of what you grow.**

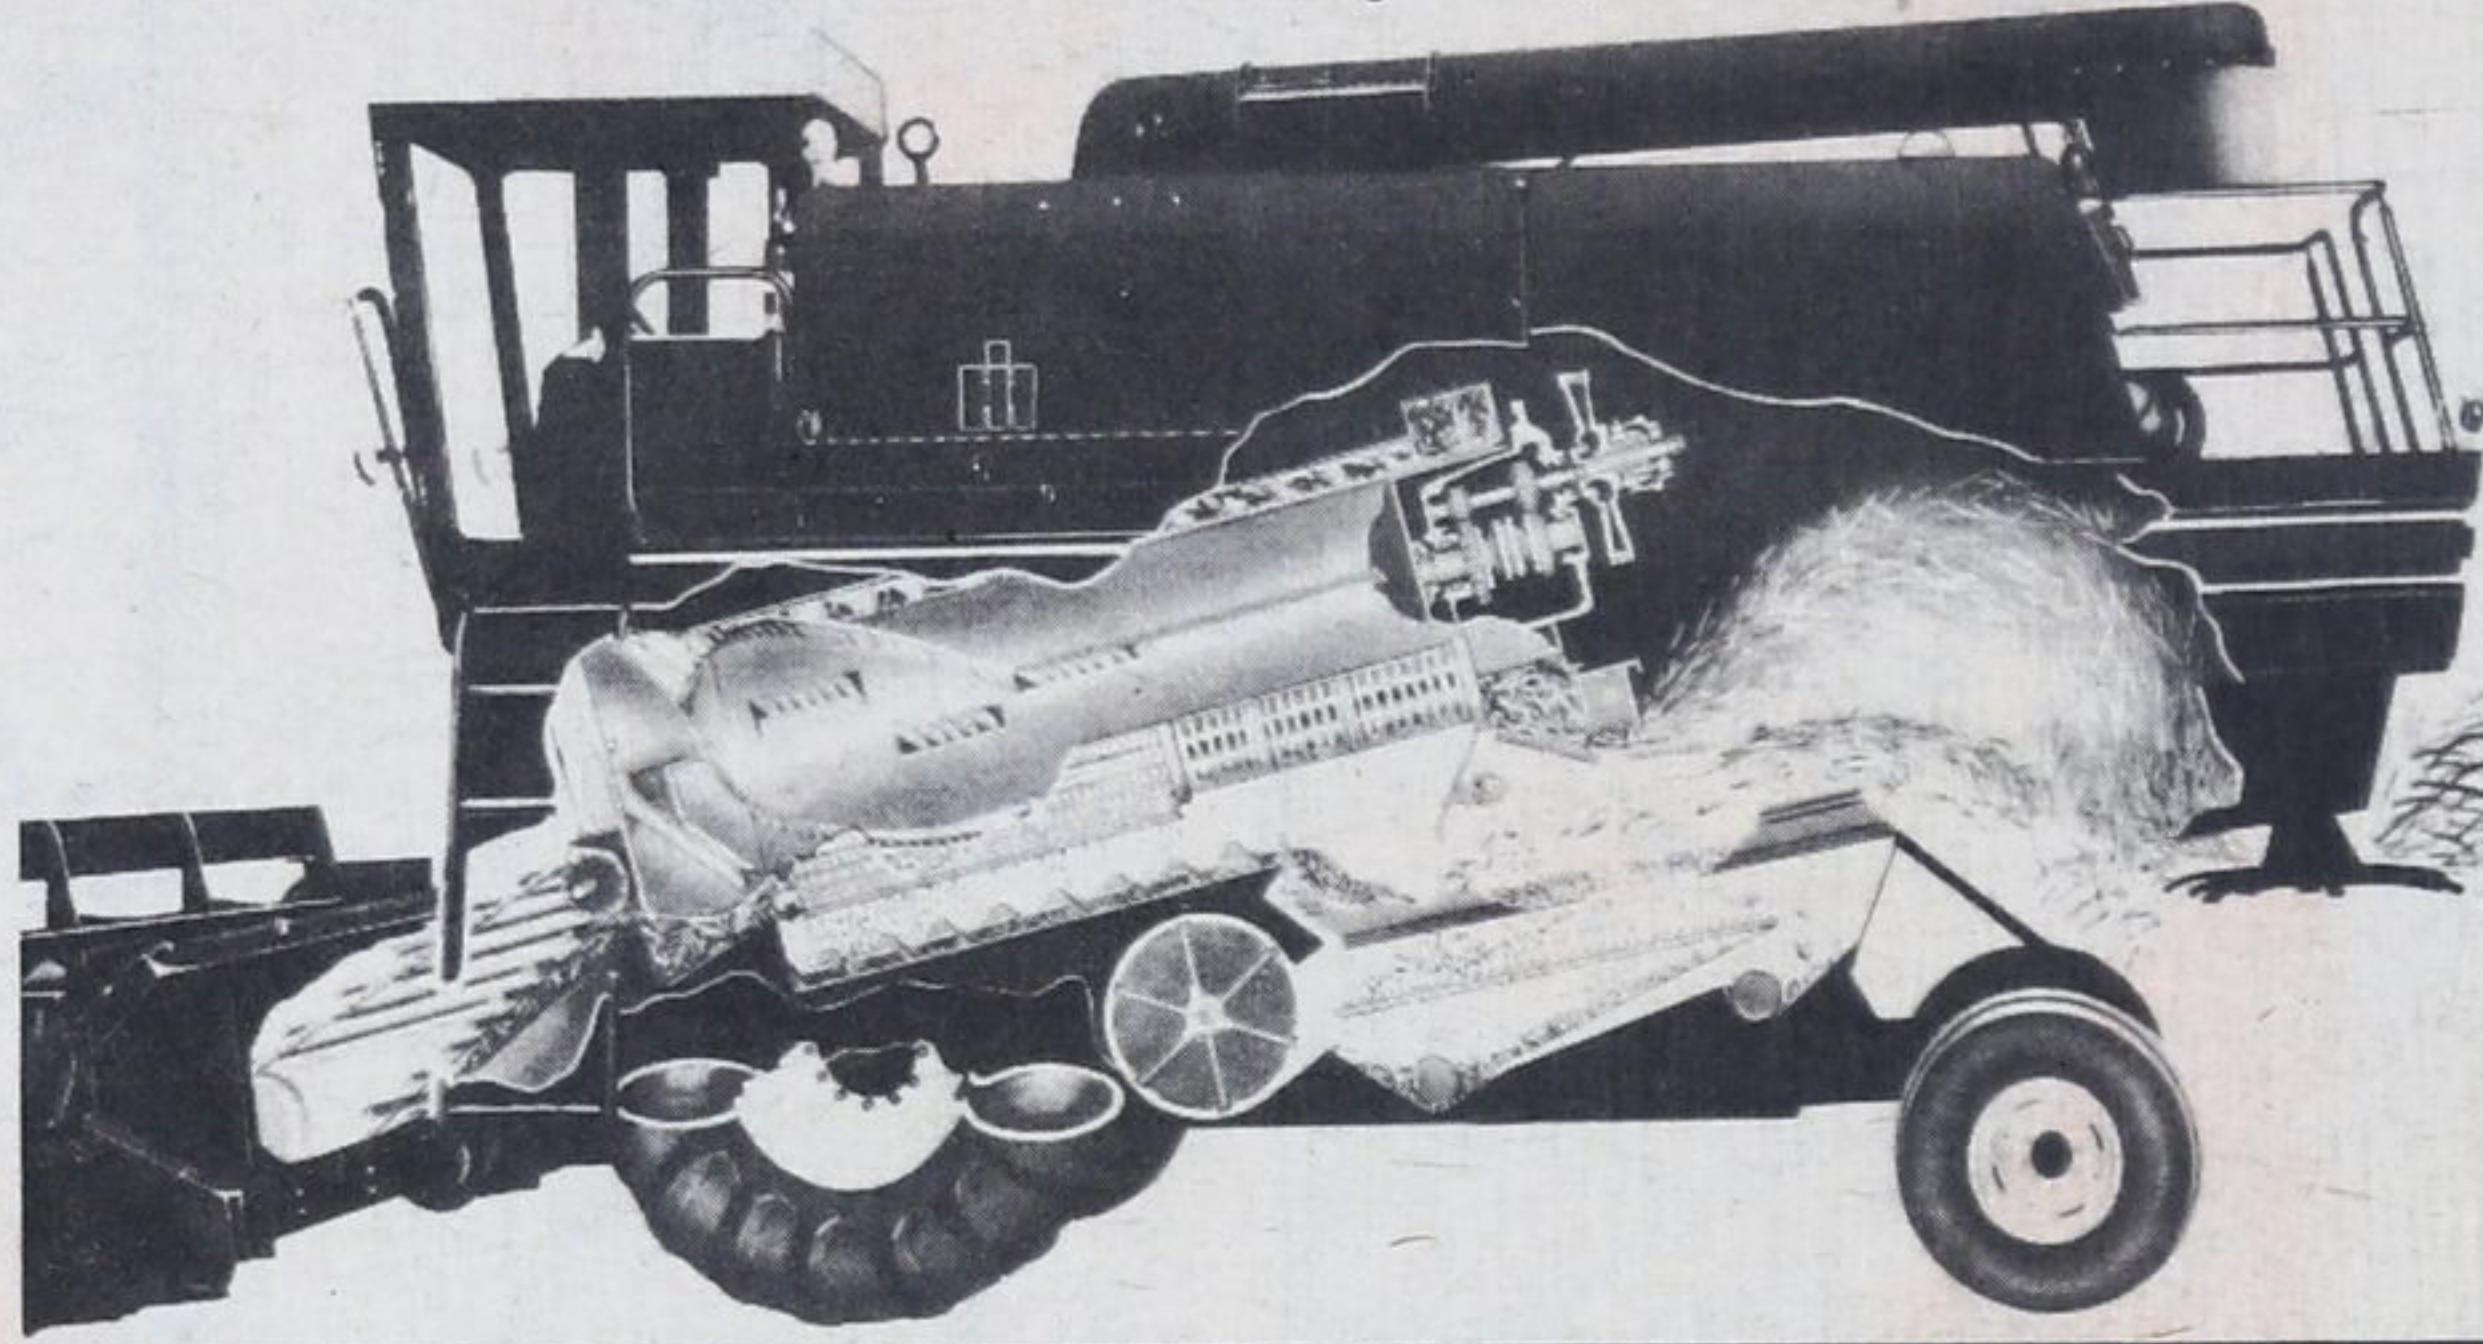

At the heart of the Axial-Flow Combine from IH is a threshing/separating system so simple, you'll wonder why it hadn't been thought of years ago. Straw walkers have been eliminated. Grain yield has been increased. Harvesting time is faster. Grain damage and mechanical problems have been reduced. Only two sets of concaves are needed for all crops, and they take one man only about 20 minutes to change. The Axial-Flow Combine is certain to revolutionize harvesting, yet it is carefully based on 14 years of development and testing to insure that it's top-of-the-line in all respects.

The Axial-Flow is easier to service and requires less maintenance. The 54 inch wide control centre is designed for greater operator efficiency — with climate control, good down front and grain tank visibility, and upholstered six way adjustable seat and steering post that tilts forward and back to five positions. Control consoles are conveniently located. And there are fewer levers, more switches and knobs.

Choose from three Axial-Flow models and mount them with an IH corn head, grain head or windrow pick-up.

*Compared to conventional combines under identical ground speeds and crop conditions.
