

Reason to be proud

Tay Township Reeve Dave Walker inspects the control panel in the new pump house. The system has a capability of processing 270,000 gallons of water daily.

A total of 9.6 kilometers of streets were reconstructed during the overhaul of the water distribution system in Waubaushehene.

Waubaushehene's new spanking white water tower stands high over the community. The structure has a storage capacity of 300,000 gallons of water.
