

Start clean

Just adding antifreeze may not be enough this fall. Let our Total Service experts flush and fill your car's whole cooling system so it's properly prepared for winter.

1400

If your car is a few years old or has lots of aluminum parts, you should have the cooling system flushed because antifreeze loses its rust-inhibiting qualities in time. We flush the radiator and block with clean water, do a series of essential inspections and fill it with our Perma 3 antifreeze/coolant (extra).
