TIRE

Glass-belted radial for winter traction

WINTER EXPRESS provides vital drive-wheel traction essential in our northern snow areas. The smooth-riding combination of polyester casing and two glass belts matches the construction of many new car tires and can be mated with steel-belted radials in other wheel positions. Self-cleaning tread lug cleats dig in for a positive grip under the worst winter road conditions. Also gives great traction on slippery surfaces. Winter driving is just another snow sport with WINTER EXPRESS.

Seasonmaster all-season radial

48.45
P155/80R-12
WHITEWALL. Each

MARK II will take you through all the seasons... winter, spring, summer and fall... regardless of road conditions or temperature changes. Road-cushioning polyester casing and two tough glass belts provide top all-weather performance. Specially compounded tread maintains resiliency and tractability for added bite on slick ice and in deep snow... low noise generation on scorching hot pavement. Deeply grooved to channel away surface water for super wet traction. PLUS it has a special scuff-rib to shield the SEASONMASTER radial's whitewall from curb, rut and stone abrasion.

HIWAY-BYWAY built with 4 plies of resilient DuPont 66 Nylon—noted for minimal thermal set—quickly runs itself smooth. Deep-buttressed shoulder lugs plow through heaviest snow. Deep, self-cleaning lug cleats keep the tread in touch with the road at all times.

HIWAY-BYWAY built bigger in every respect, except for the price. Two super-tough, yet flexible glass belts encircle two cord plies of DuPont 66 Nylon. Extra-wide tread with rugged, chunky lugs that dig in on slippery road surfaces and claw through mud and snow.

Tires and a lot more

OPEN: Mon.-Sat. 8 a.m. to 5:30 p.m.;

Thurs & Fri. open to 9 p.m.

Change winter wheels not tires

Seasonal tire-mounting can cause bead damage and result in extra rebalancing. We carry original-equipment quality spare rims for most popular domestic and foreign cars, vans, and pick-ups right up to current models.
