Home of the Handyman

It's NEW!

It's at Home Hardware

Microwave accessories featured in this flyer from RUBBERMAID and MICROAIDES are priced for everyday use.

In the past, microwave technology allowed for simple heating, re-heating and defrosting functions. Quick heating and serving of leftovers still constitutes over 50% of microwave cooking, but owners are looking for new ways to make their microwave work harder and more often.

With experience, oven users move up from simple heating jobs like making popcorn to jobs like full meal preparation, even baking. Cooking bacon, sausage, roasts and chicken are quick and mouth watering on the BACON N'ROAST RACK from RUBBERMAID. Casseroles are simple with COVERED CASSEROLE DISHES by MICROAIDES.

These microwave accessories are durable, dishwasher safe, easy to clean, and best of all they are value priced.

So stop at your nearest Home Hardware and see the latest in microwave accessories today!
