now superior printing takes just a touch.

Complete control is right up front.

Star's new NX-10™ printer not only gives you crisp draft quality printing at 120 characters-per-second. And clear near-letter-quality printing at 30 cps. But something extra right up front: our easy-to-use front panel.

Here you can select the print mode, print pitch, type-face, margin setting, paper feed - 11 functions in all. Both single sheet and tractor feeds are standard.

IBM -PC compatible and easy to interface, the NX-10 has a 5K buffer - more than twice the memory capacity of any competitor!

Check out this new Star. And put the power of a Star at your fingertips.

In front with quality up front.

The new Star NX-10
