GETS THE DIRT OUT QUICK

Whether you find yourself digging a narrow trench or a foundation or swimming pool, there's a Kubota excavator just the right size. Small, 15.6 horsepower. Medium, 35 horsepower. Or large, 48 horsepower.

Each Kubota excavator has a 360° rotating cab. So even side ditching and digging along walls are easy chores.

And each Kubota is compact. So it can work in a confined area where a tractor/loader/backhoe won't fit. And unlike a tractor/loader/backhoe, a Kubota excavator's tracks won't sink into swampy or muddy ground.

So come in and see the Kubota excavators soon, before you dig yourself into a hole.

Bruce Thom Construction chose a Kubota KH 28 Excavator equipped with a purimuffler when they were awarded the Monroe contract.

"Working in a confined area is no problem," says Bruce, "I also like the quiet clean burning engine."

It's business as usual at Monroe even though the construction is taking place in the middle of the plant.
