oats, and peas, appear to be full average

crop from the midge, which, they assert, rust is universally allowed to be the wait of proper drainage and of free circulation 2 00 of air. Two returns from Essex, two 2 00 from Kent, two from Frontenac, two from Middlesex, one from North Waterloo, and one from Elgin, report almost a tota failure in the oat crop-in all cases attributed to rust. With these exceptions the crop is reported nearly an average of about 30 bushels per acre.

With regard to potatoes the returns are by no means favourable as to quantity, although very much so as to quality. Almost all report a deficient crop from various cases. Twenty nine attribute the de-Sow, large Breed, one year and over, John Malcolm, Scarboro' - 3 00 \$13, and highly recommended by the judges. the time of planting. Seventeen to the common rot,-forty-two state distinctly that there is no rot,-and twelve have made no report. In parts of Northumber-BUREAU OF AGRICULTURE STATISTICS, I and. Durham. York and Leeds, the grasshopper has done very serious injury to the potatoe crop, as well as to clover, wheat,

&c. The general a erage given in the the average at 150 bushels of 56 lbs., the crop is about 331 per cent. deficient in quantity, but the excellence of the quality will in some degree compensate for 1 In the new Townships on the Free Grant Roads it is well worthy of remark that the slightest degree, and the crop is generally excellent both in quantity and quality.
