

PRESERVING FRUIT—BEST AND CHEAPEST WAY.

(From the American Agriculturist.)

For several years past we have been trying to abolish the old mode of preserving fruit, viz: the addition of pound for pound of sugar, and stewing them down to an indigestible mass in order to make them "keep." Our efforts in this direction have been in a measure successful; the high price of sugar this year will do much towards the adoption of the newer and better mode. All kinds of fruit can be preserved for a year, or more, with the use of little or no sugar, and at the same time retain nearly all their natural flavor. The process is not more difficult, and is less costly than the stewing process, while the fruit is far more delicious and healthful. The whole operation depends upon simply heating the fruit through, and then keeping it entirely free from the access of air.

FRUIT JARS.—Periodically, as the fruit season approaches, there are numerous fruit jar inventions, patented and otherwise, brought before the public with wonderful assurance and an indefinite number of extravagant recommendations. Some seal with wax, others with India rubber and cast iron; in some the tops are screwed on, in others, wedged; and in others wired. Some tin, some glass, and some stone, but all are "perfect" if the claims of the inventors and manufacturers are fully credited. We have tried most of these fruit jars, and while many of them are good, our experience has led us to adopt the cheapest kind of glass bottles and jars. Tin cans are not safe. While in a majority of cases they may answer well for a season or two, there is always danger of their corrosion, or rusting, and the consequent production of poisonous salts of tin. Besides, it is desirable to have the fruit in transparent vessels so that it can always be examined. Good well-glazed stone-ware bottles and jars are not objectionable on account of corrosion, but they are opaque, so that the contents can not be seen, and are but little cheaper than cheap glass.

During the past year we have kept several bushels of fruit of different kinds, always in good condition, and the portion not unused is almost as fresh and delicious as when first picked. For keeping, we have used all sorts of glass bottles and jars, holding from a pint to two quarts each—including several of the patent jars with caps, of various patterns. Among these were a dozen glass jars with India rubber rings expanded by a compressing screw, of which five gave way and the fruit was lost. Of the common glass bottle and jars we have not lost one.—There is hardly a glass bottle of whatever form that can not be turned to account for preserving fruit—even junk bottles, soda water bottles, jars, etc. etc. The best form is a wide-mouthed quart bottle or jar, the neck drawn in to give a shoulder for the cork to rest upon. For the larger fruit wide necks are needed; for the smaller, berry fruits, narrow necks answer perfectly.

PREPARING THE FRUIT.—Our method is, to put the fruit in a preserving kettle of some kind—a glazed iron kettle, or even a tin one, or a tin pail will do—and sweeten it with just sugar enough to fit it for the table. The sweetening is added in the form of a syrup made by boiling from one to three pounds of sugar (usually 2 lbs.) with one quart of water. The more juicy fruits, such as strawberries, require less syrup, while pears and quinces require more. The fruit is heated with the syrup just long enough to scald it through. Some prefer to use less sweetening and add more when the fruit has to be used.—Others use no sugar; they think the fruit keeps just as well, and preserves its aroma better without any sugar. We prefer to use all the sugar that is to be needed, believing that the fruit will probably keep more certainly, and it is then always ready to pour out at once upon the table. The fruit to be preserved should be in good condition—ripe, but not over-ripe, nor containing any decayed portions. Tomatoes are peeled, and then cooked down one-half, as this makes a better sauce, and requires less bottle room.

TO BOTTLE THE FRUIT.—The bottles or jars are thoroughly cleaned, and each one fitted with a stopper. For these, soft corks are best; but they may be made of soft dry wood. For each bottle or jar we provide a little tin "patty-pan," costing 1 to 1 cent each by the quantity. Tea-saucers will answer. For cement we heat together in an old tin basin or iron kettle, one pound of rosin, and 1 1/2 to 2 ounces of tallow. This may be mixed in quantity, and melted from time to time as wanted. We formerly used a little over 1 ounce of tallow to one pound of rosin, but further experience is in favor of a softer cement, when the fruit is to stand in a cool cellar. While the fruit is being heated as above described, the bottles are well warmed by setting them near the

fire and frequently turning them; or better, by setting them in cold water in a wash-boiler and heating to the boiling point. The fruit being barely scalded through, it is dipped hot into the heated bottles, through a funnel, if the bottle necks are small. This is done care fully, so as not to mash the fruit. The bottles are filled up to where the bottom of the stoppers will come; they are then jarred a little to make the air bubbles rise, and more fruit or syrup added if needed. The tops and necks are then wiped clean, inside and out and the stoppers put in, and sunk to a level with the top. The cement being warmed in the meantime, a little is dipped on over the stoppers to close them tightly. The bottles are then turned necks down into the little patty-pans, or saucers, and a quantity of cement dropped in to completely enclose the stoppers and necks. When cold the bottles may be set either side up. The cooling will shrink the contents so as to create a strong inward pressure, but the patty-pans prevented the stoppers from being pressed in, and the cement shuts out air.

The whole process is simple and quickly performed. After the fruit is prepared, two persons will heat it, and put up 50 to 100 bottles in half a day. We prefer quart bottles, as these furnish enough for used opening. If cork stoppers are used, they are rendered soft and pliable, and may be crowded into a small orifice, by first soaking them in hot water.

SUBSTITUTE FOR PATTY-PANS.—The patty-pans are simply circular pieces of tin, stamped in the form of a cup or plate, 3 to 3 1/2 inches across. We buy them at wholesale for 87 cts., or \$1.25 per gross.—But any kind of cup to hold the wax, will answer. We have seen the common blacking boxes used, bottom for one jar or bottle, and the top or cover for another. Blocks of wood, or bits of board, cut out into cup-form with a gouge, or bored only part-way through with a large augur, answer every purpose.—They should be partly filled with cement, before turning the bottle into them. No one need look far for the materials. The old bottles about the house, thoroughly cleaned, the tin boxes, or old saucers, or wooden blocks, and some rosin are all the apparatus needed.

ANOTHER METHOD.—An associate editor of the *Agriculturist*, who has successfully practiced the general method above described, recommends a substitute for the stoppers and patty-pans, which he has used for some years, and successfully. Pieces of Canton flannel are dipped in heated grafting wax made by melting together 2 parts bees wax, 2 parts rosin, and 1 part tallow. After dipping they are laid, cotton side up, upon sheets of rather light, white printing paper, on a smooth table and additional wax laid on, and the air bubbles rubbed out if necessary. The cloth must be perfectly saturated with the wax, but a large quantity is undesirable. Glass jars are used with a cloth, so that the waxed cloth may be conveniently bound on. They are hot, when filled full, with the boiling hot preserves; the prepared cloth is cut into convenient squares of generous dimensions; and the jars or bottles are jarred a little, repeatedly, to force the escape of any air bubbles. The cloth caps being slightly warm are laid, wax down, upon the mouths, and the hand passed over the rims with a firm pressure; then with a stout cord or pack-thread wound round and round, the edges of the caps are bound down upon the neck of the bottle or jar. As soon as the bottles cool, a depression of the cap will indicate that they are airtight, while the least hole will prevent this concavity, and thus indicate at once the necessity of repeating the sealing process. Should the fruit ferment an inflation of the cap will be noticed, provided the jar is tight.

A Western paper has the following advertisement:—'To Rent—A house on Melville Avenue, located immediate alongside a fine plum orchard, from which an abundant supply of the most delicious fruit may be stolen during the season. Rent low, and the greater part taken in plums.'

A Heavy Blow, and Great Discouragement.—It seems very strange that at the present moment, in America, when they are experiencing the greatest difficulty in raising the wind, that every one should be rushing away as he can 'to get out of the draft.'—*Punch.*

Joke Made only to Warn of Correspondents.—Mr. Weed of New York, is on his way to England. We should have preferred an Importation of 'Virginia weed,' but the destiny of both is the same, a mission ending in smoke. [Do correspondents understand. We have used the weed joke, so they will let it alone.]—*Punch.*

J. B. DeGier,
COUNTY Constable.—Landlord's Warrants executed, Rent and Debts collected on the shortest possible notice.
Address—Richmond Hill P.O. 1-7

TEETH, TEETH!
For Eight Dollars.

DR. N. J. PECK,
Surgeon Dentist,
HAS just imported some of the most perfect Block Teeth, which he will insert for that sum if required, being the same kind as inserted by S. N. Peck, and made by the same man. He also keeps the best quality of Teeth, which he will insert on Gold, Silver, Platinum, or Vulcanized Rubber.

CHANGE OF ADVERTISEMENT.
Dr. Peck will be at
Richmond Hill, 1st day of each month
Maple, 2nd day of each month
Kleinburg, 3rd day of each month
Clareville, 4th day of each month
Aurora, 5th day of each month
(Except when any of the above days come on Sabbath, when he will attend the day following)

Altona, Dec. 23, 1859 4

IMPORTANT IF TRUE!
And every word is true.
For upwards of three years past, I have been engaged in a business, which has yielded me at the rate of \$3,000 per annum, but being desirous to retire from Europe, the course of a few months for the purpose of these introducing the business, I am willing to teach to any one who will send me \$1. The business is no humbug, but a highly useful and general character, adapted both to cities and villages, and one that any person of ordinary capacity, young or old, male or female, can acquire with a few lessons practice, and by which they can secure a very liberal income. Several young ladies who have received instructions from me, both in New York State and Pennsylvania, are earning upwards of \$20 per week by it, and there is no reason why any one else cannot do the same. I shall, even, can do well by it, as it is a peddling affair, but a business that is perfectly respectable. Gentlemen and ladies of leisure who would like to learn the business for their own amusement or pleasure, will find the practice of it a pleasant pastime, and one that they will take great interest in. On receipt of \$1, I will send printed instructions by which any person can readily acquire the art, and these instructions will also contain every particular relative to the carrying it out so that it will be highly profitable. The purchase of the "printed instructions" will also be authorized to teach it to others; and for teaching it personally to a single individual, I would state further that \$9.50 or \$3.00 will buy every thing that is necessary to commence the business with, and I will be glad to supply the same, in any country, or, if preferred, I can furnish them ANDRES, PRXPAID,

Miller Anderson

Richmond Hill, July 14, 1862.
I am afflicted for nearly four months from inflammation in one of my eyes, during which time I procured the best medical aid within my means, to no purpose. The inflammation continued; the eye swelled, and I began to entertain anxious apprehensions that it would lose its sight. I accidentally heard of effectual cures having been made by Mr. H. W. Peck's Eye Water, and procured two vials of it from him.—The application of which was effected in a few days. My eye is now well, and I have much pleasure in certifying to the above facts, and recommending the use of Mr. Peck's Eye Water to all persons afflicted with Inflamed Eyes.
JOHN HISS-OP.
Richmond Hill, July 14, 1862.

In the month of February last, I had a severe attack of inflammation in my right eye, and suffered very much. I consulted several medical men, and obtained medical advice, but my eye continued to get worse. I was recommended to call on Mr. H. W. Peck, who gave me a vial of his Eye Water; in three days it felt relief, and in about a week was able to see my eye. It is now well, and I have much pleasure in stating that I believe it is Mr. Peck's remedy that cured my eye. I have also recommended the use of it to others, and know that the result has been attended with equal success.
J. M. DAVIS.
For Sale at the Post Office, Richmond Hill, price 25 cents per bottle. 190

IMPORTANT.
DR. WISTAR'S PULMONIC SYRUP, is highly recommended for Coughs, Asthma, and all diseases of the Lungs and Throat. 25 cents per bottle.

Blackwood's Magazine
AND THE
BRITISH REVIEWS!
SCOTT & CO., NEW YORK, continue to publish the following leading British Periodicals, viz:—
1. THE LONDON QUARTERLY (Conservative)
2. THE EDINBURGH REVIEW (Whig)
3. THE NORTH BRITISH REVIEW (Free Church)
4. THE WESTMINSTER REVIEW (Liberal)
BLACKWOOD'S EDINBURGH MAGAZINE, (Tory).
The present critical state of European affairs will render these publications universally interesting during the forthcoming year. They will occupy a middle ground between the hastily written news-papers, and the slow and ponderous Tomes of the future historian, written after the living interest and excitement of the great political events of the time shall have passed away. It is to these Periodicals that readers must look for the only reliable and reliable history of current events, and as such, in addition to their well-established literary, scientific, and theological character, we urge them upon the consideration of the reading public.

EARLY COPIES.
The receipt of *Advance Sheets* from the British publishers gives an additional value to these Reviews, inasmuch as they can now be placed in the hands of subscribers about as soon as the original editions.
TERMS:
For any one of the four Reviews, Per Ann. 3 00
For any two of the four Reviews, " " 5 00
For any three of the four Reviews, " " 7 00

Consult the Old English Physician
FOR
AS THMA, INCIPENT CONSUMPTION, INFIRMITIES OF YOUTH, AND OLD AGE, &c.
No Mercury Used.
Dr. Amos & Son,
45 EAST GENESSEE STREET,
Buffalo, New York.
ARE the only Physicians in the State who use members of the Loyal College of Surgeons, London. May be consulted from 8 o'clock in the morning until 9 at night, in every state and symptom of disease.
The treatment they adopt is the result of upwards of thirty years' extensive and successful practice in a London Hospital.

PHOENIX
An instrument for the cure of Genital Debility, of Nocturnal Emissions, more properly known as Seminal Weakness, &c. Can be permanently cured in from 15 to 20 days, by the use of this instrument, when used constantly with medicine.
Dr. Amos & Son, in order to satisfy the most skeptical as to the merits of their instrument, pledge themselves that in any instance where it may prove unsatisfactory, after a fair trial, the money will be refunded by returning the instrument in good order. Price Ten Dollars, by mail or express.
YOUNG MEN TAKE PARTICULAR NOTICE.
Those who have injured themselves by certain practices indulged in when alone—a habit frequently learned from evil companions, or at school, the effects of which are nightly even when asleep, and if not cured, renders marriage impossible and destroys both mind and body, should apply to this instrument. Self-abuse is one of the most formidable enemies to health, for nothing else in the dire catalogue of human diseases causes so destructive a drain upon the human system, drawing its strength of vitality through a few years of suffering down to an untimely grave. It destroys the nervous system rapidly, wastes away the energies of life, causes mental derangement, prevents the proper development of the system, disqualifies for marriage, society, business, and all earthly happiness, and leaves the sufferer wrecked in body and mind, predisposed to consumption and a train of evils more to be dreaded than death itself.
PERSONS IN ANY PART OF THE WORLD may be successfully treated by forwarding a correct detail of their case.
Address Dr. Amos & Son, 45 East Genessee Street, three doors West of Elliott Street, Buffalo, N. Y. 88-1y

A NEW STORY
IN THE
Scottish American Journal:
A FIRST-CLASS AMERICAN NEWSPAPER.
ON May 9, 1862, was commenced a new story in the SCOTTISH AMERICAN JOURNAL, entitled:
DELLBURN HOUSE:
A Tale of the Scottish Rebellion of 1745,
BY THE AUTHOR OF
Chapters from the Life of Jas. Tackett.

This tale will prove to be one of the most interesting ever published, and most full to be appreciated by all classes of readers. The SCOTTISH AMERICAN JOURNAL is a paper peculiarly adapted to meet the requirements of the British people and their families from all parts of the old country resident on the American continent. It is, in fact, a family paper in the highest and best sense of the term. Its Home and Foreign News is simply given and carefully prepared from a wide range of British and foreign sources, and quite so fact or feature calculated to interest its readers, whether ladies or gentlemen; so that the SCOTTISH AMERICAN JOURNAL contains (presented in a concise and readable form) all the local, national, and political intelligence which could be only found scattered over a vast number of Scotch, English, Irish, and Continental newspapers. Another most important feature of this journal is, that it gives the leading articles of the prominent British newspapers and other periodicals upon the principal topics of the day. In reference to the 'editorials' of the SCOTTISH AMERICAN JOURNAL, it is the most able and interesting paper published in America.—A well-digested weekly summary is also given of the principal items of American news.

SLAVERY ABOLISHED.

Consult the Old English Physician
FOR
AS THMA, INCIPENT CONSUMPTION, INFIRMITIES OF YOUTH, AND OLD AGE, &c.
No Mercury Used.
Dr. Amos & Son,
45 EAST GENESSEE STREET,
Buffalo, New York.
ARE the only Physicians in the State who use members of the Loyal College of Surgeons, London. May be consulted from 8 o'clock in the morning until 9 at night, in every state and symptom of disease.
The treatment they adopt is the result of upwards of thirty years' extensive and successful practice in a London Hospital.

PHOENIX
An instrument for the cure of Genital Debility, of Nocturnal Emissions, more properly known as Seminal Weakness, &c. Can be permanently cured in from 15 to 20 days, by the use of this instrument, when used constantly with medicine.
Dr. Amos & Son, in order to satisfy the most skeptical as to the merits of their instrument, pledge themselves that in any instance where it may prove unsatisfactory, after a fair trial, the money will be refunded by returning the instrument in good order. Price Ten Dollars, by mail or express.
YOUNG MEN TAKE PARTICULAR NOTICE.
Those who have injured themselves by certain practices indulged in when alone—a habit frequently learned from evil companions, or at school, the effects of which are nightly even when asleep, and if not cured, renders marriage impossible and destroys both mind and body, should apply to this instrument. Self-abuse is one of the most formidable enemies to health, for nothing else in the dire catalogue of human diseases causes so destructive a drain upon the human system, drawing its strength of vitality through a few years of suffering down to an untimely grave. It destroys the nervous system rapidly, wastes away the energies of life, causes mental derangement, prevents the proper development of the system, disqualifies for marriage, society, business, and all earthly happiness, and leaves the sufferer wrecked in body and mind, predisposed to consumption and a train of evils more to be dreaded than death itself.
PERSONS IN ANY PART OF THE WORLD may be successfully treated by forwarding a correct detail of their case.
Address Dr. Amos & Son, 45 East Genessee Street, three doors West of Elliott Street, Buffalo, N. Y. 88-1y
