Destructive Fige in Goderich.

About four o'clock on Monday, our citizens were aroused from their slumbers by the cry of fire. It was found that the devouring element had seized upon the block of frame buildings on the south-west corner of Market Square. Being as dry as tinder, the buildings were soon in a blaze, and it became evident that the whole block must go. The boots and shoes in Mr. McAlbister's shop were removed, the tools and leather, however, having been determed. FINKLE & LYON

SEWING MACHINE COMPANY. 538 BROADWAY, NEW YORK,

TO parties little acquainted with the Finkle & Lyon Sewing Machines the careful perusal of the Company's Circular is specially commended. This Circular can be had on application. It is very specific, and will be found highly instructive, having been prepared with much care, and we will unide by all statements therein made.

therein made.

The following brief quotation is characteristic of the entire Circular:

"This Machine is better adapted than any changes and almost on less variety of sewing required in a femily; for it will sew from one to twenty thicknesses of Marseilles without stopping, and making every stitch perfect. Will sew from the finest games to the heaviest cloth, and even to the stoutest harness leather, without oven to the stoutest harness leather, without any adjustment of machine whateyer."

Thus have we successfully evergome the most difficult point in the Sewing Machine Art,

most difficult point in the Sawing Machine Art. It was no ordinary triumph. Defiantly can we say, "No other Machine compares with it is this respect." Hence have we uniformly—althis respect." Frence nav. we ambi-most without exception—taken the highest premium, when the Machine has been properly exhibited in competition with other first-class exhibited in competition with other first-class Sewing Machines. Hence is it that we are able to effer the following guarantee, viz :-"We Warrant every Machine we self to give
better satisfaction then any other Sewing Machine now in market, or money refunded."-We never sell a Machine on any other terms The guarantee is as reliable as the note of any business man in the land. For more than five years have we relied upon such facts for the reputation of our Machine; and without a single travelling agent in the field, there is scarcely a neighborhood on the continent where the Machine is not favorably known. We preferench a reputation to one based on mere "talking points," as they are technically called in the trade. Hence we make but one kind of stitchs vize the lock-stitch, alike on both sides, requir-ing only one-third the thread of other kinds o
