MEDICAL SCHOOLS.
 We have received the following letter from a correspondent in Naples:—
 To the Editor of the Leader,
 Sir,—I am not the only one interested in the inquiry which I am about to make. I hope, therefore, as a public journal, you will give me the necessary information, inasmuch as it will enable me to decide what Medical School in the Province, as there are so many contradictory statements abroad, to attend. Have the Medical Schools in Toronto the right to attend the Hospital? Have they an equal right to do so? Have they the same opportunities and advantages offered them of seeing the Hospital practice? Or is one school more privileged than another?
 Further, can you inform me what are the advantages of the Medical School belonging to the University, as to Hospital practice and graduation, and what the superior advantages it possesses with regard to Practical Anatomy?—What time are the students obliged to Matriculate, and after Matriculation can they box at the College? The earliest information, with any more you think will be useful, will be welcomed by medical students in general, and your humble servant in particular.
 Yours truly,
R. H. HALL,
 Richmond Hill, Dec. 18, 1862. 211-26.

Important Notice.
 I HEREBY beg to inform persons indebted to me, that the principal part of their promissory notes and other claims have passed out of my hands, and that it would be prudent to make immediate payment to the holders thereof.
J. K. FALCONBRIDGE,
 Richmond Hill, Dec. 2, 1862. 211-27.

NOTICE IS HEREBY GIVEN
 THAT MARTIN MACLEOD will apply to the next Session of the Provincial Parliament for an Act to confirm his title to the Road allowance bearing his name, lot 61, in the 1st concession of King, being the town line between the Townships of King and Vaughan in the 1st Concession, granted to him by the Council of York.

TREMAINE'S MAP
of
Upper Canada.
 THE Subscriber to the above Work and the Public are respectfully informed that the Map is now completed, and is being furnished to the Subscribers as fast as possible. No trouble or expense has been spared in the preparation of this Work, which is on a large scale and is far more complete and accurate than any other Map published.
 Tremaine's
Topographical, Statistical
and
ILLUSTRATED MAP OF UPPER CANADA,
 will be ready in a few weeks, and will be embellished with beautifully engraved Views of Cities, Public Buildings, &c., &c.
 Subscribers to either of the above Works are particularly cautioned against being deceived by parties interested in the sale of a Map recently got up in New York. Their plan generally is to represent that Tremaine's Map will be published at all—or that the Subscribers will not have to take it in case it should come out—and they have got one from them, &c., &c. All such representations are false.
 TREMAINE'S MAP WILL BE FOR SALE BY THE REV. J. W. McCALLUM, in good time, but the delivery of the Map and the delivery of the same through the whole country is necessarily a work of months.
AGENTS WANTED!
 For the sale of the Map in every Township. All orders by mail promptly attended to. Office and Address

THE MAGIC TIME OBSERVER,
 The Perfection of Mechanism.
 BEING A HUNTING AND OPEN FACE, OR LADY'S OR GENTLEMAN'S WATCH COMPASS.
 One of the prettiest, most convenient, and decidedly the best and cheapest timepiece for general and reliable use, ever offered. It has within it and connected with its machinery, an easy winding attachment, rendering a key entirely unnecessary. The case of this watch is composed of two metals, the outer one being fine 16 carat gold. It has the improved ratchet fine lever movement, and is warranted an accurate timepiece. Price, superbly engraved, per case of a half dozen, \$24.00. Some of the Watches, to meet the mottoes boxes, for those proposing to buy at wholesale, \$35, sent by express, with bill payable on delivery. Soldiers must remit payment in advance, as we cannot collect from those in the army. Address

Scientific American!
 The Best Mechanical Paper in the World.
 18th YEAR.—VOL. VIII, NEW SERIES.
 A NEW volume of the popular Journal commences on the 1st of January. It is published Weekly, and every number contains sixteen pages of useful information, and four full columns of original and interesting articles, many of which are prepared expressly for its columns.
 TO THE MECHANIC & MANUFACTURER.
 No person engaged in any of the mechanical or manufacturing pursuits should think of doing without the SCIENTIFIC AMERICAN. It costs but six cents per week; every number contains many articles of great value to the mechanic and inventor, which cannot be found in any other publication.
 TO THE INVENTOR.
 The SCIENTIFIC AMERICAN is indispensable to every inventor, as it not only contains illustrated descriptions of many of the best inventions as they come out, but each number contains a full list of the claims of all the Patents issued from the United States Patent Office, during the week previous; thus giving a correct history of the progress of inventions in this country. We are also receiving every week the new scientific journals of Great Britain, France, and Germany, and the latest news from all that is transpiring in mechanical science and art in these old countries. We shall continue to transfer to our columns copies of extracts from these journals, of whatever may be deemed of interest to our readers.
 A pamphlet of instruction as to the best mode of obtaining Letters Pat on new inventions, is included free of application.
 Messrs. MUNN & Co. have acted as Patent Solicitors for more than sixteen years, in connection with the publication of the SCIENTIFIC AMERICAN, and they refer to 25,000 patents for whom they have done business.
 No charge is made for examining sketches and models of new inventions and for advising inventors as to their patentability.
 ARCHITECTS, MILL-WRIGHTS AND FARMERS.
 The SCIENTIFIC AMERICAN will be found a most useful journal to them. All the new discoveries in the science of chemistry are given in its columns, and the interests of the architect and painter are not overlooked; all the new inventions and discoveries pertaining to these pursuits being published from week to week. Useful and practical information pertaining to the interests of millwrights and millowners will be found published in the SCIENTIFIC AMERICAN, which information they cannot possibly obtain from any other source. Subscribers in which planters and farmers are interested will be found discussed in the SCIENTIFIC AMERICAN; most of the improvements in agricultural implements being illustrated in its columns.
 TERMS:
 To mail subscribers—Three Dollars a year. One Dollar for the first month. The volumes commence on the first of January and July. Specimen copies will be sent gratis to any part of the country.
 Western and Canadian money or post-office stamps taken at par for subscriptions. Canadian subscribers will please to remit 25 cents extra on each year's subscription, to pay postage.

FINKLE & LYON
SEWING MACHINE COMPANY.
 538 BROADWAY, NEW YORK.
 TO parties little acquainted with the Finkle & Lyon Sewing Machines the careful perusal of the Company's Circular is specially commended. This Circular can be had on application. It is very specific, and will be found highly instructive, having been prepared with much care, and we will advise by all means therein made.
 The following brief quotation is characteristic of the entire Circular:—
 "This Machine is better adapted than any other Sewing Machine in market to the frequent changes and almost endless variety of sewing required in a family; for it will sew from one, to twenty thicknesses of Muslin without stopping, and making every stitch perfect. Will sew from the finest gauze to the heaviest cloth, and even to the stoutest harness leather, without changing the feed, needle, or tension, or making any adjustment of machine whatever."
 "Thus have we successfully overcome the most difficult point in the Sewing Machine Art. It was no ordinary triumph. Defiantly can we say, 'No other Machine compares with it in this respect.' Hence have we uniformly—almost without exception—taken the highest premium, when the Machine has been properly exhibited in competition with other first-class Sewing Machines. Hence is it that we are able to offer the following guarantee, viz:—
 "We warrant every Machine we sell to give better satisfaction than any other Sewing Machine now in market, or money refunded."
 We never sell a Machine on any other terms. The guarantee is as reliable as the note of any business man in the land. For more than five years have we relied upon such facts for the reputation of our Machine; and without a single travelling agent in the field, there is scarcely a neighborhood on the continent where the Machine is not favorably known. We prefer such a reputation to one based on mere 'talking points,' as they are technically called in the trade. Hence we make but one kind of stitch; viz: the lock-stitch, alike on both sides, requiring only one-third the thread of other kinds of stitches.
 N. B. Local agents wanted in every county throughout the West. Special inducements offered.

 "This Machine is better adapted than any other Sewing Machine in market to the frequent changes and almost endless variety of sewing required in a family; for it will sew from one, to twenty thicknesses of Muslin without stopping, and making every stitch perfect. Will sew from the finest gauze to the heaviest cloth, and even to the stoutest harness leather, without changing the feed, needle, or tension, or making any adjustment of machine whatever."
 "Thus have we successfully overcome the most difficult point in the Sewing Machine Art. It was no ordinary triumph. Defiantly can we say, 'No other Machine compares with it in this respect.' Hence have we uniformly—almost without exception—taken the highest premium, when the Machine has been properly exhibited in competition with other first-class Sewing Machines. Hence is it that we are able to offer the following guarantee, viz:—
 "We warrant every Machine we sell to give better satisfaction than any other Sewing Machine now in market, or money refunded."
 We never sell a Machine on any other terms. The guarantee is as reliable as the note of any business man in the land. For more than five years have we relied upon such facts for the reputation of our Machine; and without a single travelling agent in the field, there is scarcely a neighborhood on the continent where the Machine is not favorably known. We prefer such a reputation to one based on mere 'talking points,' as they are technically called in the trade. Hence we make but one kind of stitch; viz: the lock-stitch, alike on both sides, requiring only one-third the thread of other kinds of stitches.
