The off mooted question "Will Canada defend hæsslf," no longer needs an swer. The hearty enthusiasm with which the late sudden call has been responded ito, from all parts of the province, affords a gratifying proof of the efficiency as the volunteer System. Although the order did not reach many places until fate on Thursday morning, before the day elapsed, more than the requisite pumber of men were under arms, and goady to move to the appointed rendezvous. The Expected Raid.

We are not of the opinion that a Fenian raid will be attempted, nor do we believe that if it be, it will have any serious consequences, save to the foolhardy adventurers themselves. But he would be credulous indeed, who would rely for a moment on the statements of men or money, which the noisy oraters of Jone's Wood make use of to please their audience's or blind their

dupes. An invasion of this province in force would require such open military dis play, and preparation, as would be in direct violation of the neutrality laws, and would not be tolerated. Of this we have the distinct pledge, of the American Government. It is true that we hear rumors that such preparations are being really made; but the American press press has hitherto shown such countenance to this disreputable swindle, and evinced such a readiness to do the dirty tune.
