The York Herald.

RICHMOND HILL, OCT. 26, 1866

To be borne in mind.-Public Meetings of the electors in each Township (under the new Municipal Law) will be held on the last Monday but one in December, (the 24th) to nominate candidates for the offices of Reeve, Deputy Reeve, and Councillors to serve for the year 1867. Do not neglect to pay your taxes before the 16th December.

UNIVERSAL STANDARD OF WEIGHTS AND MEASURES.

Amidst the turmoil of the bloody Revolution of France, towards the close of the last century, when feuds in human form, at the behest of Robespierre, Marat and their party, caused the best blood of France to flow in torrents, and slaked their thirst in the warm crimson fluid that flowed from the veins of their victims, it is well to remember that great minds were otherwise engaged, with a view to redeem their country from the state of chaos which was likely to ensue; and amongst other weighty matters of state policy, they were not forgetful of Commerce. In consequence of the difficulties which have retarded the progress of trade between various nations, on account of the difference in their systems of Weights and Measures, some of the leading spirits of France gave their attention to endeavouring to bring about a system that would harmonise in all its parts, and by its correctness and simplicity recommend itself for adoption by all civilized nations. The result of their labours proved eminently successful, and France adopted the "Metrical System." The United States are about to make a change, and copy from France—having become satisfied that it is the best, and likely to supersede all others, and with a view to having one uniform system throughout America. For our Decimal currency we are greatly indebted to the energy and perseverance of the late W. L. Mackenzie, who for years advocated its introduction into this country, but owing to the early prejudices of certain parties, the reform was retarded until about eleven years ago, when a Committee of the House of Assembly was formed and reported upon "Decimal Currency, Weights and Measures"; of this Committee Mr. Mackenzie was Chairman, and the Report contains a large fund of information, and soon after the Decimal system of currency, as in use in the neighboring States, was introduced into Canada. No one, we believe, will question the advantage and convenience to be derived from the Decimal in preference to the old system. As it is with our currency, so we have good reason to believe it would be in regard to our Weights and Measures.

Extraordinary Surgical Operation. On Saturday the 20th inst., Dr. Jas. Langstaff, of Richmond Hill, performed a surgical operation upon a patient residing on the 6th con. of King, by removing a cancer (Fungus Hematodes,) weighing three pounds, from the right breast. Dr. Langstaff's reputation, as a successful surgeon, is becoming famous, not only in our own locality, where he has a very extensive practice, but we are aware that cases of a most difficult nature have been brought to him from a distance of eighty miles. Up to the present the patient is doing well.

A Correction. Mr. Wells, Member for North York, has no desire to rest under the odium of being instrumental in causing the Drill Shed, for the Military Headquarters of the County, to be erected at the village Newmarket, he wishes to be put right in this matter, knowing, as he does, that it is not the proper place, and that Aurora has been treated most unfairly. We insert Mr. Wells's letter with much pleasure, the more so as an erroneous impression had gone abroad in regard to it, Brigade Major Dennis appears to be the party who has taken upon himself to establish the Headquarters at the village of Newmarket; will he not send a staff of Medical men to assist those already in that place, to be in readiness to look after the health of our volunteers who may be compelled to inhale the miasma arising from the Mill dam in the centre of the village?

THE UNIT DECIMAL FUND. The Academie des Sciences was first requested to determine the length of a pendulum, vibrating seconds according to given rules, under certain circumstances. But this was objected to, because it was thought that the result, depending upon the weather and arbitrary division of time, was not susceptible of the requisite accuracy. It was therefore agreed to adopt the ten millionth part of the fourth part of the meridian, or of the quadrant comprised between the Equator and the North Pole, for the unit of this measure of length, and to derive all others from this standard.

PRINCIPLES OF THE METRICAL SYSTEM. It was then proposed that the new system should be founded upon the following principles: 1. That all weights and measures should be reduced to one uniform standard of linear measure. 2. That this standard should be an aliquot part of the circumference of the globe. 3. That the unit of linear measure applied to matter in its three modes of extension, length, breadth, and thickness, should be the standard of all measures of length, surface, and solidity. 4. That the cubic contents of the linear measure in distilled water, at the tempera-

The "Era" wrong again.

We are forced to conclude that our cotemporary, of the village of Newmarket, must have but just returned from the Bradford Races, (where, we are credibly informed, he had been sporting himself,) when he penned the article in his last issue,—for it bears evidence of either a faulty memory or something else, which we would prefer not to mention.—We will take the charitable view, and lay it to a defect in his memory. He says, "not long since the editor of the Herald was prating loudly about County expenditure: but he would support \$800 or \$1000 taxation upon the County, rather than Newmarket should be head-quarters: for by the arrangement now made, taxation of the county for a Drill Shed is entirely avoided," and with an indignant flourish he concludes with the crushing sentence: "What consistency?"

Seriously do we counsel our Lubricous neighbor to adopt the hint tendered by Burns to Baal Nebo, viz: "Tak' a thought, and mend!" Our readers will remember that we called upon the County Auditors for certain explanations in regard to a discrepancy which exists between the statement vouched for by them as correct and the Report of the Provincial Auditor,—one of the Auditors, who is also editor of the Era, tried to explain, but utterly failed to clear the matter up, and seeing that it was calculated to irritate him, we charitably allowed the matter to rest; having simply performed our duty, as public journalists, by what we did.

If the inhabitants of the village of Newmarket have forsaken their "Old Flag" for the Union Jack! we are only rejoiced at the conversion, and if they think proper to erect a Shed at their own expense, in which their new-born zeal may be displayed occasionally, by learning to defend British authority in Canada, we have no objection,—but we do object to the Head-quarters of this County being established so far from the centre, and in so inconvenient and unhealthy a locality as the village of Newmarket is,—a fact which does not appear to have had weight with those who have the arrangement of Military matters in this County.

The Concert.

We would call the attention of our readers to the Concert, advertised in another column, in aid of the Fire Engine Fund. Through the indefatigable energy of a few who were determined to procure so necessary an adjunct, we are now in the possession of an excellent Fire Engine. The object of the Concert is to procure sufficient means for the erection of a House for the same, without again applying to the public by way of subscription. We know of no easier way by which money may be raised for that purpose, than the one adopted by the Company, and we are pleased to hear that parties who are so well able to entertain the public with vocal and instrumental music, have taken hold of the matter with such commendable interest. We understand that in connection with the local amateur talent our own village affords, musical contributions from Toronto, and Newmarket will be forth coming for the occasion. The Concert will be given on Friday, Nov. 2nd, at half-past 7 o'clock. We hope that the people of our village who are all more or less interested in the matter will show their appreciation of the efforts of the community, by patronizing the entertainment by a full house.

"Some Pumpkins"

We copy the following from the Era of Newmarket village:—"Our thanks are due to those kind friends who remembered the printer at the late fall show in Newmarket,—among them were the following, "J. D. Phillips, for pumpkins, "W. Sowdon, for Turnips, "Reuben Lundy, for Cauliflowers, "Mr. Wall's for citrons, "Gentlemen, yours ever."

THURSDAY, November 6.—Important Sale of Stock and Furniture at Richmond Hill, the property of Mr. Thomas Cook. Sale at 12 o'clock. J. Ferris, Auctioneer.

Correspondence.

The Drill Shed.

To the Editor of the York Herald. SIR:—It was with much surprise that I observed a short time ago, that the Head Quarters of the York Battalion of Volunteer Militia, has been changed from Aurora to Newmarket. What is the cause of the change, it is difficult to surmise, for in making choice of Aurora the authorities seemed to have chosen the most suitable locality in every way. In the first place, Aurora is by far the more healthy situation, for Newmarket is built in a swampy hollow, bounding a large Mill pond, and is close to the extensive marsh of the Holland River, the principle branch of which runs through the village, and it must be at all times subject to the miasm rising from such an extent of swamp; particularly during the northwesterly winds, which are the most prevalent, and, sweeping a large portion of the marsh, pass over the village. Secondly, Aurora is the most central, and most easily accessible to the majority of the Companies composing the Battalion, namely the companies from Scarborough, King and Lloydtown, having a good macadamized road, and a Railroad running through its centre, whereas Newmarket is three miles further north and an additional mile and a half off the stone road, which mile and a half of road is the worst in the county, during spring and autumn. Their are also two Troops of Volunteer Cavalry south of Aurora, which, if the Force should be at any time Brigaded at Head Quarters, would have the extra distance and bad roads to encounter, neither is it improbable that their arms and accoutrements may be ordered to be stored at Head Quarters when suitable armouries are erected. Now there is only one Company of Infantry at Keswick north of Newmarket, and that is hardly yet organized, and because Newmarket happens to be central to it, all the other Companies are inconvenienced.

As to Newmarket becoming the County Town, which is another argument held out in its favour, it has no better chance for the distinction than Aurora or Richmond Hill, if so good. The authorities having once made their selection, and as it happened a good one, should have left it so, and not have been influenced by any secondary considerations. I remain Your's truly, AN OBSERVER King, Oct. 18, 1866.

Letter from Mr. Wells, M.P.P.

To the Editor of the York Herald. DEAR SIR:—Some kind friend has forwarded to me a copy of the last issue of the Herald, and has marked out for my special edification an article headed "The Drill Shed again," wherein you say "that you have been informed that Newmarket is indebted to Mr. Wells for the removal of the Drill Shed from Aurora." Now Mr. Editor, your informant, who ever he is entirely mistaken, as the only recommendation I ever made on this subject, was one to leave the selection in the hand of the Counties Council, this of course I strongly recommended to Brigade Major Dennis, and I had the assurance of that gentleman that such would be the case; I believed at the time and I am of the same opinion still, that if this course had been adopted, the unpleasant feelings that have been engendered on this subject, (particularly amongst the volunteers) would have been avoided, as I am fully convinced that any selection that would have been made by the Counties Council, would have been acquiesced in without a murmur; I cannot but think, Mr. Editor, that the Brigade Major is very much to blame, not because he has selected Newmarket, Aurora or Richmond Hill, but because he promised two of them at least, that they should have the honor of being the Head Quarters of the Battalion, thereby encouraging the spirit of rivalry, not only between the villagers themselves, but also between the different companies of volunteers, composing the Battalion, and after creating these difficulties then promising to leave the settlement to the Counties Council, and after that again making a selection. My opinion is that the straightforward and manly course would have been to have made a selection in the first instance, and adhered to it, or otherwise to have left it to the representatives of the County in Council assembled, so much Mr. Editor, as to the action I have taken, and what I think of the whole affair. There is evidently a doubt thrown out in your article about the loyalty of the good people of Newmarket, which is unworthy of notice, as I can assure you that it is every respect their loyalty is fully equal to that of the important village of Richmond Hill, which I suppose undoubted. Your obt. Servant, J. P. Wells, M.P.P. King, Oct. 17, '66.

Proposed New Atlantic Telegraph Company.

It is stated that a new company is about to be started for laying down another Atlantic cable. Fifty thousand prospectuses are, it appears, to be issued, and the charge for the transmission of messages is to be half a crown a word instead of £1 as at present. This company proposes to lay their wire from the north of Scotland to Norway, thence to the Faroe Island to Greenland, from which it will proceed southwards along the American seaboard.

Twenty acres of glass will be used in the Paris Exhibition building.

Latest from Europe.

LIVERPOOL, Oct. 22.—The steamers Erin and New York, arrived on Saturday. MADRID, Oct. 22.—Spain has announced her intention to uphold the temporal power of the Pope after the French forces leave Rome. LIVERPOOL, Oct. 22.—Cotton steady; sale to-day, 12,000 bales middling uplands at 15 1/2. Advice from Candia indicates that the insurrection was losing its serious character, and the public mind was becoming appeased. LIVERPOOL, Oct. 22.—The ship Daniel Webster, from London for New York, has put into Queenstown, dismasted. BRISTOL, Oct. 22.—The Prusso-Saxon treaty of peace was finally signed to-day. LIVERPOOL, Oct. 22.—Evening—Cotton unchanged; middling uplands at 15 1/2; tallow firm. LONDON, Oct. 22.—The steamship Nova Scotia, from Quebec, has arrived. PARIS, Oct. 23.—There are rumours that another manifesto is about to be issued to the different diplomatic representatives of the Empire. LONDON, Oct. 23.—Reports have been received here from Candia, stating that, after four days heavy fighting, the Christians had repulsed the Turkish army. LIVERPOOL, Tuesday, Oct. 23.—noon.—Cotton firm and quiet; sales, 8,000 bales; middling uplands, 15 1/2. Breadstuffs firmer. Flour and wheat tending upwards. Corn has advanced to 3 1/2 3d for mixed western. LONDON, Oct. 23.—noon.—Money firm. Consols, 89 1/2. Opening prices, American securities:—Erie, 50 1/2; Illinois C, 7 1/2; U. S. 6 20's, 69. VIENNA, Oct. 23.—The Vienna Presse of to-day says that the Baron von Beust is very likely to be the Foreign Minister. LONDON, Oct. 23.—Lord Clarendon is seriously ill. LIVERPOOL, Oct. 23, evening.—Market for lard inactive. LONDON, Oct. 23, evening.—Money market quiet. Consols 89 1/2 for money. Erie, 50 1/2 U. S. C. 7 1/2 Illinois 52 1/2 U. S. 6 20's, 69 1/2.

The honor of knighthood will be conferred on Mr. Canning and Mr. Glass, Captain Anderson of the Great Eastern, has also accepted the honour.

THE "WOODEN WALLS."—The Times asserts that the strongest iron-clad afloat might be sent to the bottom as easily as a wooden frigate, and iron-clads and wooden ships being thus placed on an equality of hopelessness it suggests whether the recent opinions on the worthlessness of wooden ships may not be reconsidered. The people at Sydney are about to erect a statue to Captain Cook, to celebrate the hundredth anniversary of the discovery of New South Wales.

A letter from Florence estimates the expense of the war to Italy up to the present time at 625 millions of francs, or 21 millions sterling. REM and CHOLERA.—It is ascertained by the cholera returns in London, that the cases were always heavier on Monday and Tuesdays than on any other days, owing to the greater drunkenness which prevails on Saturday night, often extending over Sunday morning. A Shet that his is better than a broad side that misses.

TORONTO MARKETS.

Table with 2 columns: Commodity, Price. Includes Flour, Wheat, Spring Wheat, Barley, Oats, Potatoes, Hay, Straw, Hutter, Apples, Wool.

UNPHILOSOPHICAL TREATMENT.

In Cholera-Asphyxia, Cholera-Morbus, Bilious Colic, and other agonizing and dangerous diseases of the bowels large doses of opium and rhubarb are often given. What can be more absurd—more empirical? The effect of the opium is, to constrict and constipate; of the rhubarb, to purge and relax; and the two antagonistic agents containing for the moment in the intestine, create disturbances that aggravate the disease. The only true and rational treatment is to stop the torture and suspend all the sharp and perilous symptoms with Radway's Ready Relief, giving it inwardly as a direct stimulant and antispasmodic; applying it outwardly as a rubefacient, and then to exhibit Radway's Regulating Pills, which being aperient and purifying in their nature will speedily relieve the digestive and discharging organs of all morbid matter.

ERRORS OF YOUTH.

A gentleman who suffered for years from Nervous and Genital Debility, Nightly Emissions, General Weakness, the result of youthful indiscretion, and came near ending his days in hopeless misery, will, for the sake of suffering man, send to any one afflicted, the simple means used by him, which effected a cure in a few weeks, after the failure of numerous medicines. Send a directed envelope and ten cents and it will cost you nothing. Address, ENGAR TREMAIN, Station L, 128th New York City.

A Card to Invalids.

A Clergyman, while residing in South America as a missionary, discovered a safe and simple remedy for the Cure of Nervous Weakness, Early Decays, Diseases of the Urinary and Sexual Organs, and the whole train of disorders brought on by baneful and vicious habits. Great numbers have been cured by this noble remedy. Prompted by a desire to benefit the afflicted and unfortunate, I will send the recipe for preparing and using this medicine, in a sealed envelope, to any of you who needs it, Free of Charge. Please enclose an envelope addressed to yourself. Address, JOSEPH T. BRIMAN, STATION D, BRIMAN HOUSE, New-York City.

THE PRIVATE MEDICAL ADVISER
