#### PREPARED FOR AN EARTHQUAKE.

A correspondent of the New York Herald. writing from Lima, Peru, on the 14th ult., says:—
The earthquake period has passed by, and in spite of the ominous perdictions of Abbe

Falb and Captain Saxby, Peru is still numbered among the nations of the earth.

On the 28th of last month a general exodus took place from Lima and Callao. Fully 20,000 people left the two cities, carrying themselves and their property to the plains and gardens in the vicinity, where, under the shelter of tents and improvised buildings, they were to pass through the fatal week. From the 28th to the night of the 30th we were threatened by the dreadful announcement of Falb, and from the 1st of this month to the 5th by the scarcely less terrible prediction of Saxby. Both periods passed by and with the exception of a slight shock on the night of the 1st, nothing unusual occur red, and the people have returned to their homes, wiser if not better.

Although no earthquake was experienced. the effects of the anxiety and fright caused by the prophecies are already apparent. Physicians report that the insufficient nature of the refuge sought for has augmented to a great degree the bad health of the community. Fever, not the yellow, but one similar to the tertian, has appeared in force, and the wet nights and damp atmosphere are aiding the evil. Moreover, several well organized bands of robbers improved the opportunity of attacking these persons encamped in the environs of the city, and in quite a number of cases succeeded in their designs while in others, serious loss of life occurred in repelling the assailants. From this it will be readily imagined how indignant the Peruvian mind is against the two false prophets Already they have been solemnly burnt in effigy; their names are held up to ridicule, and should they make their appearance in Peru, no Life Assurance Company would do well in taking a risk on their existence.

It is estimated that in the expense of moving and the loss sustained by merchants in consequence of the complete suspension of business nearly \$1,000,000 have the people of Peru paid owing to these predictions. The Government itself ordered the closing of the Custom Houses and public offices, thereby event, and the gainers are the only persons in the Republic inclined to view the authors of the scare with complacency. This, how ever, will be hereafter cited as a curious historical fact, that people, supposed and admitted to be enlightened, should flee almost en masse from their comfortable homes on the mere dictum of an obscure German as tronomer of whom the world has scarcely tion of earthquakes, and some of them desolating, is enough to make the inhabitants of night is enough to encourage the least ingenious Yankee to visit the country and speculate on this extraordinary credulity. For-tunately, it is all over. We remember the fable of "Wolf! wolf!" but sincerely trust that in the future these crudite German savants and gallant English sailors will keep their astronomical ideas to themselves until after the events prognosticated have occurred. A society is being formed here for the purpose of paying Mr. Falb for the injuries tion, and upwards of \$10,000 have been subno secret, although the members decline to make their names public. Some agents are to be sent to Europe to find this German
