this habit, we are unable to put our finone another to car tickets because they happen to meet on the same seat. We never saw a man take out his pocketbook on encountering an acquaintance, and say "Ah George! delighted to see you! Do take a few postage stamps! It's my treat!" > A traveller may go all over the conti-nents of Europe, Asia, and Africa, without seeing any man but a Yankee offer to "treat," and the Frenchmen are quite social enough, but when they turn into a cafe to sip their wine or brandied coffee together, each man pays for his own.

When two Gormans, long separated, meet, they will be very likely to embrace, and then turn to an adjacent beer-cellar, sit down and drink loger and eat pretzels,

and chat; cut when they part again, each man settles his own score independently. So in Italy. The Italians are proverb-ially merry and generous, but every man ELECTRO AND CLOSE SILVER PLATER state; but the moment it touches a cold shaft pays for his own wine, maccaroni, and cigars. They never go into each other's pocket books in the sacred name of friendship. They would as soon think of transferring to each their washerwoman's bills.

The preposterous fashion of "treating" is responsible for the terrible drunkenness in America. There would be as little need of temperance societies and as little work for the Good Templars as there is in Germany, France and Italy, if this pernicious and insidious habit was abolished. It is, take it all in all, the most ridiculous, the most unreasonable and beings.

IMPORTANT TO PARTIES USING MACHINERY.

STOCK'S EXTRA MACHINE OIL.

This oil excells all others for Lubricating urposes, both animal and vegetable. We are prepared to have the merits of this

oil tested against all oils now heing used on machinery—both light or heavy; from a clock r sewing machine, to the heaviest of Steamboat shafts.

The following are the points in which it excells all other oils : It will not gum, hence machinery can be kept clean with but little trouble, and it will

clean machinery that has been gummed by other oils. It will not congeat or thicken in the coldest of weather—this is a quality of the highest importance, from the fact that an oil not having this quality will not lubricate a cold it is congealed, and it will not begin to lubricate until the journal, by friction, acquires that temperature necessary to reduce it to a liquid state. In acquiring a higher temperature by friction, the journal expands, and the box is in-jured. It is as impossible to use oil that will chill on a cold shaft without this result, as it is to mingle oil with water. Stockes' oil will lubricate the coldest machinery the moment it is applied ; it is now used in over two hundred establishments, and all unite in saying the pre-fer it to Refined Sperm, or pure olive oil ; it is free from all objections urged against all other oil as it neither gums or freezes.

Now, as the public are aware that many worthless things a o pased into notoriety, in order to prove that this is no humbug, and at

the same time to secure ourselves against the operations of unscrupulous oil agents, ; many Stocks extra machine oil ; we prepose to those who are largely interested in the truth of those Also maintracturer of isnow Cases, more who are largely interested in the tath of and Sash Bar for Store fronts, &c., importer of statements, to send to them on applica-tion by express, or otherwise free of charge, a 612-1y sample of the oil that it may speak for itself, we will with the sample furnish applicants free of charge, with a few simple tests as ef-fective, as those test: by which Gold is known DRINTING OF EVERY DESCRIPTION from the base metals, and which will enable parties ordering to secure themselves against DECENTLY ADDED, A NO. 2 GORDON Card Press, to the Herald Book and the sample.
