Telegraphic.

The Chicago Disaster.

CHICAGO, Oct. 11.-Those who know this city will understand the extent of the loss from the description given of the district burnt; but for the information of those who are not acquainted with the location of the city. I may explain that the parts of the city extends west about one mile, straight inland, then divides, one hranch running north about four miles, widening slightly from the lake shore as it extends, and the other branch runs south nearly parallel with the lake shore for about six miles, and has recently been completed. six miles, and has recently been completed to the Mississippi River. The portion of the city west of these canals is called the west side, and is composed principally of private residences, small retail shops, and public parks. This is the only part of the city left. Along these canabastood all the immense elevators, packing houses, foundries, machine shops and storehouses which mainly constituted the greatness of Chicago. The space between the two branches of the canal and the lake shore contained all the large business houses, banks, public buildings, and fine residences of the city, the south side particularly being nearly covered with im-mense marble palaces, which were the pride of the citizens and the admiration of visitors.

The following insurance items have been gathered from trustworthy sources:—Royal Insurance Company of Liverpool loss, \$133,-000; Imperial of Liverpool, \$900,000; North British of Liverpool, \$2,700,000. Good au thority foots up the losses of Liverpool and London insurance companies at \$4,500,000. the city. About \$4,000,000 euch are in the burnt district. The Phœnix, of Hartford, has \$700,000 insurance here. The Commercial and Mutual, of Clevelane, losees \$300,000 of their entire capital, but the stockholders have subscribed \$200,000, and the Company will commence anew.

The Pacific and Occidental Companies

loss their entire assets,

The President of the International Company telegraphs that he will be here in 36 hours, prepared to pay all their losses, amounting to \$800,000.

The Tradesmen's of New York, loss only

\$15,000, which is already paid.
CHICAGO, Oct. 12.—The Republican this morning issued half a sheet, and the Tribune the entire sheet, filled with a advertisements and announcements of merchants' charge of localities. There was no renewal of fires last night, and nothing occurred to disturb the city. Gen. Sheridan has complete con-

trol, and confidence is fully restored. CHICAGO, Oct. 12.—Eighty dead bodies are now lying in the Morgne, mostly found on the north side. It is certain this is but a small portion of the number caught in the mail portion of the number caught in the flames and utterly cons.med. The coroner yesterday held an inquest on 64 bodies, only two of them being recognized—one, Henry Ullman, a banker; and the other, Peter O'Ding.

O'Brien.
The following is a list of additional insurances on Chicago property destroyed:—New York—American, \$25,000; Atma, \$200,000; Germania, 220,000; Manover, 225,000; Kings County, \$20,000; Niagara, \$225,000; National, \$15,000; New Amsterdam, \$210,000; Relief.\$10,000; Republic, 225,000, Williamsburg City, \$70,000 St. Louis— American Central, \$350,000; Anchor, \$27,000; Citizens, \$25,000; Globe Mutual, \$25,000; Boatman's, \$20,000. Philadelphia— Enterprize, \$125,000; Franklin, \$500,000; Insurance Company of North America, \$600,000. Boston—Hide and Leuther, \$700.000 : Independent, suspended : Law merchant's, \$10,000; Manufacturer's, \$350.000; Merchant's, \$10,000; National, \$500,000; New England Marine, \$700,000. Also the following Andes, Cincinnati, \$250.000; Atlantsc, Brocklyn, \$250,000; Allemania, Cleveland, \$25,000; Commerce, Albany, suspended; German, Buffalo, \$5,000; Liverpool and London and Globe, England, \$2,000,000; Narragansett. Providence, \$38,000; North British and Mercantile, England, \$1,000,000-

Streetsville.

STREETSVILLE, Oct. 16 -A fire broke out at 7-o'clock yesterday morning in a large brick building, known as the Ontario Warehouse, formerly owned by J. C. Hyde, and at one time threatened the destruction of the whole village. A terrific gale was blowing at the time, and the whole block was enveloped in flames. The occupants, Mr. Thos. Grimshaw and Mrs. Cook, suc ceeded in saving most of their furniture. This building was one of the finest in Streetsville, and was owned by parties residing in England and represented by Smith & Woods, of Toronto, valued at six thousand dollars; insurance not known. The canse of the fire was sparks from a chimney of the Reciprocity Buildings, owned by M: John Graydon. The residence and work shop of Mr. Wm. Graydon, and a tenement house owned by Gooderham & Worts, and occupied by Mr. Cummins, were in great danger, the latter being on fire several times. but by the constant exertions of the citizens were eventually saved. The wind carried the burning shingles to the bush of Mr. George Brown, a mile distant, which ignited but was discovered and extinguished. it been blowing in a more easterly direction nothing would have saved the entire village from destruction.

The residence and outbuildings of Mr. Clarkson, Springfield, were eestroyed by fire yesterday morning. The wretches who set fire to the premises placed the carriage in such a position that it was impossible to gain access to the stables, and the whole contents, including a valuable horse, were consumed. It is understood nothing was saved from the house.

A fire is now raging in the woods near The residence of Mayor Magrath, ons of the finest in this section, is in imminent danger, and if rain does not soon fall it is impossible to estimate the destruction of proper,y that

Halifax.

HALIFAX, N. S., Oct. 16.—On Thursday evening-last Halifax was visited by a tremendous gale blowing from the south east. It commenced at half part four with great intensity, attaining its culminating point at seven o'clock. A great deal of damage has been done to the wharves and the property on them. The steamer Chase broke loose and ran at four wharves, smashing them, but sustaining little damage herseif. Symonds, the engineer, has been a great loser. His works have been much damaged. News is arriving from all parts of the province as to the great damage done. The loss of life, as far as entertained, is less than expected. The gale was the sevenest that has been experienced here for nany years. The railway between Halifax and Bedford has been much kamaged and trains are not yet

Correspondence.

VERACITY OF THE RICHMOND HILL SCHOOL BOARD.

To the Editor of the York Herald.

SIR,-I trust you are willing that facts relating to the school at Richmond Hill shall be made known to your readers who have an interest in the school, are taxed for it, send their children to it, and expect that the future prospects in life of those children to be largely influenced by its management. Still further, every ratepayer in the county has a right to know how the High School is managed and everything that is done relating to the said High School; but the trustees sit with closed doors and do everything they can to hide from the public those facts which the public have a right to know. The constituents of those trustees have a right to know, as their masters who pay for the working of the school, how those trustees discharge their duties, what is the character

of the teachers and how the school is conducted. Holding these views I ventured catiously to publish some facts relating to the school in your issue of the 29th September last. For this the Board The Ætna of Hartford, and Home, of New 29th September last. For this the Board York, have each \$6,000,000 of insurance in of Trustees appointed Mr. Z. to give me a severe lecture and reprimand; they likewise passed a resolution declaring the whole thing false, and by way of a kind of affidavit, ordered the said veracious resolution to be recorded in the minute book. Now I am very anxious to learn whether those trustees really know that they are living in the nineteenth century, or do they think this is the tenth or eleventh century-the dark or leaden age-and that the public will take their ipse dixit as if they were so many bishops with a pope at their head, thinking that, as in the dark ages, no one dare question their authority. The resolution pessed by the trustees is as follows: "Resolved that this Board. having heard the Secretary readthe communication in the YORK HERALD entitled . Troubles in our schools,' and signed 'J. L.,' take this opportunity of declaring that the assertions made therein are not true, and that Mr. Scott be requested to publish this contradic tion." You will ooserve, Mr. Editor, that the Board were very easily convinced

-just heard it read and pronounced it untrue at once, and they exp ct the publie to believe them without a word of proof; but those who sent them where are witnesses in their own favor, and. therefore, not to be believed on their own evidence. Yet as they have put themselves in the witness-box, I will put to them the following questions, and wish their letter-writer, Mr. Z., to note

Did the board not agree to give Mr. surplus, but at length gave him \$50 of Truth No. 1.

Did not Mr. Jolly go into the second department and press-gang Mathew Currie, Armand Teefy, Miss Copeland, &c.,

into his department a few days before the Inspector visited the school? Truth No 9.

Now, Mr. Editor, I believe these are all the assertions I made in regard to the school, and I would recommend Mr. Z. when he writes again, to put a few facts into his letter by way of variety, and indulge in less "high-fallutin"." Neither Mr. McLean or Mr. Gray left on account of ill health, although they endured enough to make them sick. Mr. McLean, as a rare, good teacher, was looked after and engaged by another section at once. As to Mr. Grav he has always been able to walk through this village as quickly as any man in it, and is now meeting with good success as an

I remain yours truly, Richmond Hill, Oct. 12, 1871.

YORKVILLE NEWS.

To the Editor of the York Herald. Our Corporation, or the fragments of the original body, is still derelect. Nothing seems to-rouse this fearful lethargy. Fire! fire! everywhere, and not a drop of water to check the frightful enemy if it should appear in our midst. Three months ago the tax for this purpose was levied, and a large proportion of the same has been paid into the Treasury -but at the present moment no definite scheme has been decided upon, or any contract offer, of course, for such work. I maintain, and I believe that the tax having thus been paid to the corporation, and a reasonable time having been allowed for them to supply of water, in case of fire the corporate body would be liable for all damages arising from their negligence. A vacancy has occurred in the Council through the resignation of Mr. W. McMullen. Only one aspirant to the noble office has yet appeared, viz: our village Doctor Philbrick; and he being very deaf will never be able to hear the counsels of others, and consequently will have to run the complicated machinery on his own hook.

The medical department of Victoria University was duly opened for the season on the 2nd of this month. The inaugural address was delivered by Dr. Berryman. The subject matter of the Doctor's lecture was: The debt of gratitude we owe to the crude knowledge of they are as their servants know that they our ancestors, who-through superstition covered by a veil of scientific ttuthreally laid the foundation for much of the curative art of the present day in all its richness. The Doctor dwelt at some length on this theme, and wound up by calling the attention of his audience to Darwin's humiliating theory of the origin of man; that after all to be told at the Lafferty all the surplus over \$600, in present boasted period of our great sciencase there should be a surplus by his tific knowledge, we are but improved very reluctant to give him any of the consideration, or even the belief in such theories would be calculated to sap our it, and used the rest towards putting religious belief. The Dr. spoke strongly down a well at the school grounds? against the invectives sometimes hurled from the pulpit against theories in connection with science, which are as yet not Mr. McMurchy, Mr. Duncan, Mr. but little elaborated, and which, to the Patterson, Mr. Megill, Mr. Bennet, &c., unscientific mind, must be totally uninbeing pupils from a distance, leave? telligible. He stated, moreover, that if parsons were better physiologists they would be more useful teachers of the nard, Miss Sedman, Miss Miller, Ernest Gospel: they who teach of that which Langstaff, &c., in the village, leave? they caunot see, and cannot possibly understand except from Divine revelation, Did not Mr. Jolly cruelly beat a little certainly should first understand someboy ten years old, till is temple and the thing of the casket in which God has
