When fair hands wake the ivory keys when har mands water thervory keys
To joyous notes, or sad and low,
And lips inspired sang songs which caused
My heart with estacy to glow:
And none of all he loved so well
As this, the summer's "ass lone rose,"
Now like an echo from the tomb
Its music o'er my spirit flows.

For cold the fingers now that played, For cold the ingers now that played,
And shelt are the lips that sung,
And sealed in death those e-es of fire,
on which mo own is rapture inung.
Then cease, th! cease, teamnot hear
From e her lips that sweet refrain;
That song is sacred to the dead.
To me each note is fraught with pain.

MINNIE MONTEITH

#### AGRICULTURAL ITEMS.

HOEING POTATOES .- The Ohio Farmer says One of the secrets of success in potato growing is in giving them a hosing at the proper stage of growth; one hilling is sufficient and this should be given when the vines are about six inches high. Previous to this use the cultivator freely—keep the carch loose on the surface and free from weeds. When at the stage of growth mentioned, give a good hilling, making the mound broad and flat on top and a little cupping; after this do no more than to cut out weeds. The hoeing is best done coon after a rain. Some additive. ing is best done soon after a rain. Some advocate flat culture and others two hillings, but we have never succeeded with either of those plans nor do the most successful potato growers advocate them. Two hillings will make two settings, and result in a large number of small potatoes at harvest time. Flat culture may do on a deep loamy soil where the roots may ramify and form tubers readily, but a clay soil hilling in the olded way, is the one most certain to

to the best time to cut wheat, judging from the common practice of farmers. It is generally cut when dead ripe, or at least when the grain has become hard. This is no doubt an error and one of the common practice of farmers. It is generally cut when dead ripe, or at least when the grain has become hard. This is no doubt an error and one of the common practice of farmers. It is generally cut when dead ripe, or at least when the grain has become hard. This is no doubt an error and one of the common practice of farmers. It is generally cut when dead ripe, or at least when the grain has become hard. This is no doubt an error and one of the common practice of farmers. It is generally cut when dead ripe, or at least when the grain has become hard. This is no doubt an error and one of the common practice of farmers. It is generally cut when dead ripe, or at least when the grain has become hard. This is no doubt an error and one of the common practice of farmers. It is generally cut when dead ripe, or at least when the grain has become hard. This is no doubt an error and one of the common practice of farmers. It is generally cut when dead ripe, or at least when the grain has become hard. This is no doubt an error and one of the common practice of farmers. grain has become hard. This is no doubt an error, and one of more importance than many suppose. It should be remembered that s composed of gluten, starch and bran. Gluten is the nourishing quality of the grain, makes the flour stick together in the hands of the baker, and gives weight to the grain—and there is the greatest quantity of gluten in the grain just when the straw is vellow two or three joints from the ground, the head turns downward, and you can mash a grain between your thumb and finger without producing any milk. It may therefore be set down as an indisputable truth that every day the wheat stands after this stage of its ripeness, the gluten decreases in quality and the branincreases in thickness. eness, the gluten decreases in quan

CARE OF FARM TOOLS -The Bowling Green Democrat says: We suggest to farmers the importance of remembering that the injury Paul! I have found a shelter in your true, done to hand tools and implements by long exposure to rain and sunshine amounts to always!" e than the wear and tear. Plows and hand loes are frequently left covered with wet earth pressed down on the surface, thus wet earth pressed down on the surface, thus facilitating the formation of a thick scale this policy. Farnum would have said it was of rust which wears out the steel and makes acting. But it was very pleasant, and I felt the tools unaccountably had. It should be more than ever like a man who has found one of the inflexible rules of the farm and garden to wipe the bright surfaces of all tools amulet on his breast.

fic Rural Press says: At the wool depot at San Francisco recently, we had the pleasure of meeting with Mr. Thos. Butterfield, the largest Cashmere goat importer and grower in State; and also of Cotswold, Lincoln, Leicester, Texel and South Down sheep. From him we learn of the continued and complete parts of the Pacific coast are making inquiries concerning them. The yield is from 4

miums, to be awarded at the annual fuir in October next: A premium of \$50 to the person producing the highest number not less than 1,000; and to the person producing the next highest number not less than 500, \$25; and to the person producing the next largest number not less than 100, \$5; and to the person producing the next largest number not less than 100, \$5; and to the person producing the next largest number not less than 100, \$5; and to the person producing the next largest number not less than 100, \$5; and to the person producing the next largest number not less than 100, \$5; and to the person producing the next largest number not less than 100, \$5; and to the person producing the next largest number not less than 100, \$5; and to the person producing the next largest number not less than 100, \$5; and to the person producing the next largest number not less than 100, \$5; and to the person producing the next largest number not less than 100, \$5; and to the person producing the next largest number not less than 100, \$5; and to the person producing the next largest number not less than 100, \$5; and to the person producing the next largest number not less than 100, \$5; and to the person producing the next largest number not less than 100, \$5; and to the person producing the next largest number not less than 100, \$5; and to the person producing the next largest number not less than 100, \$5; and to the person producing the next largest number not less than 100, \$5; and to the person producing the next largest number not less than 100, \$5; and to the person producing the next largest number not less than 100, \$5; and to the person producing the next largest number not less than 100, \$5; and to the person producing the next largest number not less than 100, \$5; and to the person producing the next largest number not less than 100, \$5; and to the person producing the next largest number not less than 100, \$5; and to the person producing the next largest number not less than 100, \$5; and to the person producing the "Just what might have been expected," of corn merchants in Marklane, who entered said Tewksbery. "Pretty and young widows and the next six highest numbers \$1.00 cach." don't go begging in this market!" and the next six highest numbers \$1.00 each.

In the count one panther or wolf is reckoned as equal to 30 sequirels, a wild cat as equal old Farnum. "Poor Folliot: There were the description had reached that terminus. killed between January and October.

HEAVY COTSWOLD FLEECES .- According to the Rural New Yorker, in the Cotswold flock of Jacob Flick, near Cleveland, Ohio, are six yearlings, which produced this season an agof seventy-seven and one-fourth nds of wool, unwashed but not dirty; this is an average of twelve pounds and fourteen ounces per fleece. One three-year-old ram gave eighteen pounds three ounces of very handsome wool. These sheep were shorn on the 13th of May.

"If the court please," said the counsel, "I wish to refer to this book for a moment, and at the same time picked up a volume. "There is no use of referring to any book," exclaimed the court, "I have decided the

point." "But, your honor," persisted the attorney. "Now I don't want to hear anything on the subject," yelled the court; "I tell you again that I have decided the pint." "I know that," was the rejoinder; "I am satisfied of that; but this is a volume of

Blackstone: 1 am sure he differs from your honor, and I only wanted to show what a fool Blackstone was."

"Ab, indeed," said the court, smiling all

over, "now you begin to talk." REPAIRING ROADS .- A correspondent of the Rural New Yorker suggests that it is cheapen and better to haul gravel to repair a road, after the road-bed is properly constructed, than to plow and scrape and pile up dirt in the center thereof. A few loads of gravel, a few furrows to let the water off, leaving the grassy roadsides undisturbed, is the best way of mending highways that I have ever known. If it is a stone country, stone broken fine may be substituted for gravel. There is a great deal of labor wasted on roads and not half enough applied as it should be. Provide for keeping the water out of the readway, and a bed of good wear-ing material for it, and we may soon have

good roads at all seasons of the year.

APPLETON KNITTING MACHINE COMPANY .-We call attention to an advertisement containing interesting information with regard to the business of the Appleton Machine Company. It also contains an illustration —Jonathan Sadler, of Heath, Allegan county, Mich., died from poison. He was eugaged in killing potato bugs, and in crushing one of them, the juice truck him upon and completeness of its working. Their machine is very simple in construction, requiring but little skill to understand, and not liable to get out of repair. It performs all the work of larger, more complicated and more expensive machines, and would be a very valuable article in the economy of every household. The factory of the Company is GRAY. RENNIE the will and went nome to Clara,

so you have done, and I don't know wh saving machines of most ingenious construc-tion. Once the Appleton Kinitting Machine comes to be generally known, we venture to predict that the demand for it will be very great.

> -The celebrated lion from which Landseer took his models for Nelson's monument in London, has just died at the Zoological Gardens, aged 22.

-The St. Albans (Vt.) Messenger thinks sky blue is a pretty color for ceilings, but not so tasty for country milk at eight cents a quart."

W HITE LEADS, "GENUINE." "No. 1," "No. 2," and "No. 3," of this brand, are unsurpassed for body and brilliancy of shade. Packages contain full net weight. The public are warned that certain other brands are 1½ ibs short in every so-called 25 pound package.

Examine the brand and do not be put with inferior paints. The best is always cheaperst.

Sold by respectable dealers in Paints throughout Ontario, and to dealers only by

Card to the Dominion Trade. FALL 1872,

FIL is needles to inform Merchants in any section of the country, of the almost universal advance in prices of European and American Manufactures. In a few instances, the advance may be temporary, but in most it is the result of a cemand, whether natural or inflated, in excess of production.

In many lines the effect of the advance will be to DETERIOLATE the QUALITY, especially in Gold, Silver, and other metals, in which immediate detection is difficult. Under these dreumstances, we make the following unnouncements:—

nouncements —
1st. Our CAPABILITIES OF PRODUCTION
in all departments are increased, not diminished.
2nd. Our QUALITIES are maintained to the
utport limit, not deteriorated.

2nd. Our QUALITIES are maintained to the unmost limit, not deteriorated.
3rd. Our PRICES are kept at old flaures, wherever practicable, or only advanced to cover outlay.

Having by personal efforts in Europe this spring made every-provision for our Season's trade in Fancy Goods, Watches, Jewelery, Clocks, Plate, Cutlery, Nickelite, Glassware, Musical Instruments, &c., we now respectfully solicite the patronage of our friends, customers, and merchants generally.

Importations now arriving every week by best routes from all patts of Europe.

Terms & Discounts liberal to prompt Dealers.

THE APPLETON

An examination of the claims below enumer. An examination of the claims below enumerated will convince every one, that they are among the most important of the requisite qualifications:—

Ist. Settling up the work on the needles without transferring stitches from a piece of web. web.
2nd. Forming single flat web selvage edge
from 1 to 72 needles in width,
3rd. Forming perfect ribbed or seamed fabrics
of every varie'y.
4th. Widening and narrowing on the above mentioned webs.

5th. The machine is constructed in a substantial manner, and in a high style of worknanship. 6th. The Bobbin stand, Winder, &c., are all 6th. The Bobbin stand, Winder, &c., are all attached to the machine.
7th. The ease of taking apart and simplicity of again putting together the maching.
8th. The mode of knitting on any particular needles without the displacement of others, the needles always being in operation.
8th. The Bobin holder is so constructed that it is always in a relative position with the yaru carrier and needles, thereby obviating all difficulties attending the tention of the yarn while knitting.

culties attending the tention of the yarn while knitting.

10th. The Machine will parrow and widento any desired shape
11th. The Winder is attached to the end. of Machine always ready for use.
12th. The set of pecilies will last for years, as they are made strong, and do not come in contact with anything but the yarn in operation.

13th. That any child can work the Machine, take it apart, and put it together again.

14th. It is the simplest Machine considering its great range of work.

15th. It is the most practicable Family Machine, and the cheapest Machine in the world. The above points are respectfully submitted to the candid consideration of all parties interested in Knitting Machines.
