Fashion and Health.

Do we women realize how large a proportion of time most of us spend day after day in studying how to ornament our bodies, and how little to keep them strong and healthy? Many of us, who say we have no time from morning until night to read the morning have no difficulty whatever in finding time When to sit for hours with our dressmakers, dis-

We can not deny that, with most of us, our bodies have decided precedence of our minds. No matter how meagre the supply is to the latter, the former must bear their fash-ionable burdens though they sink under the load. And they are sinking under the load, as thousands of us can sorrowfully testify. Yet we keep on in our foolish chase after fashion, and teach our

—An Indian town has 'the following dog ordinance: "Dogs that are not collared and labeld, no matter how respectably connected, will have their narratives amputated one inch south of their ears." -- He who sedulously attends, pointedly

asks, calmly speaks, coolly answers, and ceases when he has no more to say, is in pos-

county for 63 years. --Lake Choggoggaggoggmangchoggaggoggagg, Michigan, is a good place to go for the summer. The place is particularly recom-mended for people afflicted with stammer ing; by the time they can tell where they are they are wholly cured.
