FOR THE SAKE OF PEACE.

dear, the years so swiftly fly ! Oh, dear, the years so swinny ny. We used to play at lovers, too,
When we were children gay and free
And now, the rogue, he quite insists
That he should still my lover he.

I really can't make up my mind To quarrel with the toolish boy, For maybe, if he went away, My life would lose one half its joy. And if the question I should try To argue with him why, you see,

Oh, how persistent men can be What can a timid maiden do? I think, just for the sake of peace, I'd hetter yield the point-don't you

The Birch Cance.

A young gentleman of Concord recently recently received the present of a birch bark canoe, and the following trial trip. After carefully parting his hair in the middle, and dividing his All orders from a distance promptly attended to, and medicine sent to any part of the Province. small change equally between his right serve an exact equilibrium, he stepped on board. The vessel "walked the waters like a thing of life," but the young man, just at that time, saw something on the bottom of the river that he wanted, and went down after it with a terrific splash, whereat his friends on the bank, stupidly supposing he had accidentally tipped over, indulged in unseemly mirth. The navigator, however, swam ashore, and administering a cutting rebuke to his friends, started again. The next time he tried it, he acknowledged that the frisky little boat did tip over, but felt confident that there would be no trouble after he had got the hang of the thing. Finally he nade a fourth and last attempt, the boat turned over as usual, and he came he did hot put in an appearance, plunged in after him, snaked him out, and then, under the impression that he needed resuscitating, stood him on his head, rolled him on a barrel, burned feathers under his nose, pounded his back, lauced his arms with a penknife, and otherwise maltreated him. As soon as he could get out of their clutches he seized an oar, "went for" the amateur doctors with so much energy that they vacated suddenly, and left him master of the situation. He is now anxious to find some pretty toy manufactured of nitroglycerine to send to his friend in return for the canoe.—Boston Globe.

The Art of Hanging

As long as capital punishment is the law of the land and hanging the mode of accomplishing it, there is DARRISTERS, SOLICITORS IN satisfaction in the thought that men are to be found who, regarding it as Office-Court Street, Toronto. Branch a scientific process, or an art, if you it perfect. An English clergyman, HORACE THORNE. Rev. S. Haughton, who is also a t fellow of the Royal Society, has been publishing a work on the "Principles ence Monthly." We recommend of Animal Mechanics," in which he them to the consideration of smokers: does not disdain to devote a portion 719-tf of the present state of science, and vertebræ, is recommended, the length which is essential to healthy life. of the drop to be obtained by the following rule: Divide 2,240 by the weight of the "patient" in pounds, and the quotient will be the required length in feet. This rule is simply obtained by supposing (as was found cast Corner of Toronto and Court Streets, shock is sufficient to cause fracture in any case, no allowance being made for difference of ago, weight or sex; thus by this rule, the lighter the criminal or "patient," the longer must be his drop, and the longer the time of his agony in the air.

The Paris Diamond Market.

+ +0+4

A curious account is given by the Ordre, of the place where the dealers in precious stones assemble in Paris to transact business, namely, at the Cafe des Varietes, Boulevard Montmartre. The following is an abstract from the last part of the article: "As soon as the various chapmen have assembled and have taken out their stores, 'Here,' cries one, 'is a real barancer, and Commission Agent for the sale or purchase of lands, farm stock, &c., gain, one of the finest ancient pieces of jewellery known. It is a necklace press doubt and indecision, and the to have a perfect day's health."

1804 from Mme. Merosini; the necklack afterwards belonged to Lady Temple, whose husband bought it at Candahar of Isaac Lieven, your grandfather, M. Lion; she left it to her daughter, Mme. De. X-, who sold it three days after her marriage; as for the sapphire in the middle, it came from Mile. Schneider's sale; all the rest is new, diamonds and settings, and came direct from Hamburg however, it is well made, and the 75 000 frames demanded seems to be a fair price.' The affair is settled. However extraordinary the above may appear, there are in the world five or six individuals who know all the diamonds of value and all the articles of jewellery of importance that

---How to Become a Distinguished Man.

seen them one minute.

In a great many instances young men spend half their lives in changing from one thing to another before they learn what they are competent to perform. A correspondent writes thus : As a general rule, the best place for a young man to begin life is right where he is. He need not go a hundred, or three hundred, or a thousand miles away from home to try the world; that particular spot where he lives is a part of the world, and just as good a place to try as some other particular spot three hundred miles off. In the Eastern States, where society is settled, and things change but little, where business is held in fixed channels, and certain families are supposed to have a prescriptive right to do overything that is done, there is not much inducement for a young man to remain at home, unless he possesses the genius and enterprise to break through the trahim, but no such condition of things ex- ployment to 1,200 workmen. ists out West; here everything is new, fresh and plastic; and a young maninay do his part in moulding things to his purposes. It is a very common mistake for youngsters, who have not yet butted their tender heads against the hard angles of the world, to imagine ap under it. His friends seeing that the possess superior talent, if they only had an opportunity to exhibit it. If they live on a farm, there is no change small to spread their wings in. They appreciated, and imagine that there is supply them a great deal cheaper. the field for them to rise to eminence and wealth, and yet they had better stay right where they are, and make their beginning in the locality where they were raised. If they really possess dred years ago. Then more than half develop them and test the metal they are only about a quarter. made of in the limited sphere of their native place, and, if the experiment proves satisfactory, afterwards transfer sands of young men who go to great cities to try the world, find the world in such cities too much for them, and they learn too late that it would have been better for them to make their trial in a

Newspapers

WHOLE NO. 795

Their value is by no means appreciated, but the rapidity with which people are waking up to their necessity and usefulness is one of the significant signs of the times. Few families are now content with one newspaper. The thirst for knowledge is not easily satisfied, and books, though useful, yea, absolutely neces-sary in their place, fail to meet the demand of youth or age. Our country newspaper is eagerly sought and its contents as eagerly devoured; then comes the demand for the city news, national and foreign news. Next to the political come the literarp and scientific journals. Lastly, and above all, come the moral and religious journals. All these are demanded to satisfy the cravings of the

active mind. Newspapers are also valuable to clost to mine, and ketcht holt of my hand, and squez it, and dropt on his knees, then it was that his eyes rolled kness, then it was that his eyes rolled may on which may de traced charand he began breathin hard, and his gallowses kept a creakin' and a creakin', till I thought in my soul somethin' terquires for the village newspaper; i rible was the matter with his in ards, a friend comes from a distance the his vitals; and that flustered and skeered me so that I bust out a cryin'. Secin' it was be enoughed for your willers or ings, he enquires for your village or York is becoming very popular, and the producers have been so successful that made me cry barder; and the that they announce a quarterly divibate the harder have been so successful that made me cry barder; and the forted if you are unable to find a late harder I cried the harder he creaked, copy, and confounded if you are compelled to say you do not take it.

Newspapers are just as necessary to fit a man for his true position in life as food or raiment. Show us a ragged, barefooted boy rather than an ignorant one.
