POLITICAL RE-ACTION.

We have foreseen and predicted the strong tide which is now setting in and which cre long will carry the Liberal Conservative Party triumphantly into power. The cause of it is self-evident.

The cause of it is self-evident.

The cause of the people the control of the people the control of the power in the hearts of the people the control of the power. The cause of the people the control of the people the people the control of the people the p We have foreseen and predicted the Deep in the hearts of the people the conviction is firmly seated that the Conservative party is the only one that really understands the Art of Government. They have made the English people, and have created all of Canadian History that is worthy the name. A glorious record indeed, and one which will not be long forgotten by a British or Canadian people. On the other hand the Grits are mere idealists and experimentalists; that is all of them who are not intriguists and conspirators. The best of them have that recklessness and uncalculating energy in abundance which springs from a vague and inaccurate idea of the true demands of statesmanship. They sometimes succeed well in part, but the work, as a whole, is lamentably deficient. They succeeded fairly enough, it is true, disposing of the Municipal Loan Fund, but in all their practical works they made the most disgraceful failures. Witness the most disgraceful failures. Witness the Central Prison Job, and the Model Farm Scandal, &c. They thought they had completely mastered the Policy of Mr John Sandfield McDenald's Government will consist of readings. recitations, and an address on temperance, with several bad on all sides to see such intelligence as the ship of State afterwards. Send the Poll at the gentlemen, and I presume you follow farming as an occupation, think it necessary that should take two days to harvest and bind twenty two acres of harley, (cheers) and then leave a portion of it unfinished. Yet the farmer who did so was the person an pointed by the Ontario Government, to impart knowledge to the sons of Canadian farmers. (A voice—"That's scientific farm ing with a vergeance.") Prof. McCandless, during his incumbency, never received fair play, and had no chance to carry ont his scientific knowledge. He, like the speaker, did not cringe sufficiently to the "powers that be," to be regarded with favor in the sight of McKellar and his minions, and, in consequence, were forced to retire and see their places filled by mere tools, many of them unfitted for the positions. (Cries of shame.) I have been 25 years a gardener, five of them in Canada and the remainder in the service of the Duke of Bristol, and have deviage that the service of the Duke of Bristol, and have deviage that the service of the Duke of Bristol, and the service of t consequence, were forced to retire and see have during that time taken over 400 prizes, besides gold and silver medals and diplomas.
